Math Strategies in Action Did you know that meteorologists use weather balloons to collect data? They use the temperature, limidity, and other data in mathematical models to bring you the daily weather forecast. As more data become available—from weather bullooms and satellites, for examplethe models, and therefore the weather reports, become more accurate.

Similarly, in math problems, you can make an initial conjecture. You can test your conjecture. If it is not the right answer, you can use what you learn from your first conjecture to make a better, second conjecture.
