Revision Of North American Trichodes Her:

Revision of North American Trichodes (Herbst) (Coleoptera, Cleridae) David E. Foster, 1976 A Critical Revision of the The Evolution and Fossil Record of Parasitism Kenneth De Baets, John Warren Genus Aristida Jan Theodoor Henrard, 1926 Huntley, 2021-05-07 This two volume edited book highlights and reviews the potential of the fossil record to calibrate the origin and evolution of parasitism and the techniques to understand the development of parasite host associations and their relationships with environmental and ecological changes The book deploys a broad and comprehensive approach aimed at understanding the origins and developments of various parasite groups in order to provide a wider evolutionary picture of parasitism as part of biodiversity This is in contrast to most contributions by parasitologists in the literature that focus on circular lines of evidence such as extrapolating from current host associations or distributions to estimate constraints on the timing of the origin and evolution of various parasite groups This approach is narrow and fails to provide the wider evolutionary picture of parasitism on and as part of biodiversity Volume one focuses on identifying parasitism in the fossil record and sheds light on the distribution and ecological importance of parasite host interactions over time In order to better understand the evolutionary history of parasites and their relationship with changes in the environment emphasis is given to viruses bacteria protists and multicellular eukaryotes as parasites Particular attention is given to fungi and metazoans such as bivalves cnidarians crustaceans gastropods helminths insects mites and ticks as parasites Researchers specifically evolutionary paleo biologists and parasitologists interested in the evolutionary history of parasite host interactions as well as students studying parasitism will find this book appealing **Beetles of Western North America** Arthur V. Evans, 2021-09-28 Beetles are incredibly diverse with over 23 000 named species in the United States alone They take on all hues shapes and sizes from the iridescent green of the Western Cedar Borer to the striking red of the Rose Curculio They can also be found in a wide range of habitats from cold mountain streams to scorching deserts Similar to its eastern counterpart Beetles of Eastern North America this book is a comprehensive guide to the beetles of the US and Canada that can be found west of the Continental Divide It covers over 1 400 species across 130 different families The book begins with a general introduction to beetles with sections on morphology behavior and natural history and conservation as well as information on how to find and photograph beetles After the introduction there is an illustrated key to common beetle families The family descriptions include information on natural history collection identification common genera and species and similar families
