The American Soul Rush Marion Goldman, 2012-01-01 Yoga Humanistic Psychology Meditation Holistic Healing These practices are commonplace today Yet before the early 1960s they were atypical options for most people outside of the upper class or small groups of educated spiritual seekers Esalen Institute a retreat for spiritual and personal growth in Big Sur California played a pioneering role in popularizing quests for self transformation and personalized spirituality This soul rush spread quickly throughout the United States as the Institute made ordinary people aware of hundreds of ways to select combine and revise their beliefs about the sacred and to explore diverse mystical experiences Millions of Americans now identify themselves as spiritual not religious because Esalen paved the way for them to explore spirituality without affiliating with established denominations The American Soul Rush explores the concept of spiritual privilege and Esalen s foundational influence on the growth and spread of diverse spiritual practices that affirm individuals self worth and possibilities for positive personal change The book also describes the people narratives and relationships at the Institute that produced persistent almost accidental inequalities in order to illuminate the ways that gender is central to religion and spirituality in most contexts

Processing Reality John H. Buchanan, 2022-10-27 In this book John Buchanan takes us on a journey through the early death of a parent the ups and downs of addiction the extraordinary revelations of psychedelic experiences and the rewards of a sober and meaningful life Reflecting on these experiences the author identifies five pivotal events that drove him to seek a deeper understanding of the significance of extraordinary experiences the nature of mind and the universe the meaning of life and most generally to ask What is Reality Drawing on his wide ranging studies and explorations Buchanan discusses the ideas that most influenced his search and led him to conclude that transpersonal psychology and process philosophy especially as developed by Stanislov Grof and Alfred North Whitehead offer the most satisfying answers He presents in some detail the essence of Grof s and Whitehead s thought as it pertains to these basic questions about life

and reality so that readers can appreciate these ideas for themselves Buchanan argues that taken together process thought and transpersonal theory offer the kind of enspirited worldview capable of providing both the necessary inspiration and the intellectual understanding for confronting the great challenges facing our world Loving God's Wildness Jeffrey Bilbro, 2015-04-30 Analyzing writings ranging from the Puritans to the present day Loving God's Wildness traces the effects of Christian theology on America's ecological imagination revealing the often conflicted ways in which Americans relate to and perceive the natural world **Subject Guide to Books in Print**, 2001 **Whitaker's Books in Print**, 1998

Interreligious Dialogue and Cultural Change Catherine Cornille, Stephanie Corigliano, 2012-08-17 The challenges and changes that take place when religions move from one cultural context to another present unique opportunities for interreligious dialogue In new cultural environments religions are not only propelled to enter into dialogue with the traditional or dominant religion of a particular culture religions are also invited to enter into dialogue with one another about cultural changes In this volume scholars from different religious traditions discuss the various types of dialogue that have emerged from the process of acculturation While the phenomenon of religious acculturation has generally focused on Western religions in non Western contexts this volume deals predominantly with the acculturation in the United States It thus offers a fresh look at the phenomenon of acculturation while also lifting up an often implicit or ignored dimension of interreligious dialogue Interactive World, Interactive God Carol Rausch Albright, John R. Albright, Mladen Turk, 2017-11-06 Since the dawn of science ideas about the relation between science and religion have always depended on what else is going on in a society During the twentieth century daily life changed dramatically Technology revolutionized transportation agriculture communications and housework People came to rely on scientific predictability in their technology Many wondered whether God's supposed actions were consistent with scientific knowledge The twenty first century is bringing new scientific research capabilities They are revealing that scientific results are not totally predictable after all Certain types of interaction lead to outcomes that are unpredictable in principle These in turn may lead to a whole new range of potential interactions They do not rule out the reality of a dynamic God who can act in the world without breaking the known principles of science God may in fact work with the way things really are Human experience of God may accurately reflect this reality Interactive World Interactive God illustrates such new understandings in religion and science by describing recent developments in a wide range of sciences and providing theological commentary The book is written for intelligent readers who may not be specialized in science but who are looking for ways to understand divine action in today's world Exploring The Orville David Kyle Johnson, Michael R. Berry, 2021-05-10 This is the first book to take a deep dive into the philosophical social moral political and religious issues tackled by Seth MacFarlane's marvelous space adventure The Orville These new essays explore what The Orville has to say on everything from climate change artificial intelligence and sexual assault to gender feminism love and care Divided into six acts just like every episode of The Orville with the show as its

backdrop the book asks questions about the dangers of democracy and social media the show s relationship to Star Trek and the puzzle of time travel **Religion Index Two** ,1994 In Pursuit of the Great Peace Zhao Lu,2019-06-01 Examines the Great Peace taiping one of the first utopian visions in Chinese history and its impact on literati lives in Han China Through an examination of the Great Peace taiping one of the first utopian visions in Chinese history Zhao Lu describes the transformation of literati culture that occurred during the Han Dynasty Driven by anxiety over losing the mandate of Heaven the imperial court encouraged classicism in order to establish the Great Peace and follow Heaven s will But instead of treating the literati as puppets of competing and imagined lineages Zhao uses sociological methods to reconstruct their daily lives and to show how they created their own thought by adopting modifying and opposing the work of their contemporaries and predecessors The literati who served as bureaucrats in the first century BCE gradually became classicists who depended on social networking as they traveled to study the classics By the second century CE classicism had dissolved in this traveling culture and the literati began to expand the corpus of knowledge beyond the accepted canon Thus far from being static classicism in Han China was full of innovation and ultimately gave birth to both literary writing and religious Daoism Zhao s study presents a model of intellectual history Smartly written it excels in connecting the analysis of specific texts and concepts with broader trends in the social political realm His work helps demythologize Chinese thought and makes it legible to scholars around the world Miranda Brown University of Michigan *American Book Publishing Record Cumulative 1998* R R Bowker Publishing,1999-03 *Transforming Process Theism* Lewis S. Ford,2000-05-26 Traces variations of theism in Whitehead s principle works identifying a major problem in conventional understanding of process theism and constructing an original and provocative solution Spiritual Being and Becoming Eric J Kyle,2017-05-25 As many as 100 billion neurons make up the human nervous system a system that is incredibly complex and a fundamental part of what makes us who we are But there is far more to human beings than biology Many academic disciplines study the human condition and there are many schools of thought within that study We must also appreciate that the study of human nature did not begin in contemporary times History is full of texts that offer detailed explorations of the human condition However no consensus has yet emerged Consensus or not those working towards religious and spiritual formation pursue the transformation of their communities This book offers a fuller understanding of some of the common views of human nature and also insights into how we might utilise this knowledge in our ministries ministries that strive towards the spiritual being and becoming of our world **Surplus** A. Kiarina Kordela,2012-02-01 Opposing both popular neo Spinozisms Deleuze Negri Hardt Israel and their Lacanian critiques Z iz ek and Badiou Surplus maintains that Lacanian psychoanalysis is the proper continuation of the Spinozian Marxian line of thought Author A Kiarina Kordela argues that both sides ignore the inherent contradictions in Spinoza s work and that Lacan s reading of Spinoza as well as of Descartes Kant Hegel Marx Freud and Wittgenstein offers a much subtler balance of knowing when to take the philosopher at face value and when to read him against himself Moving

between abstract theory and tangible political ethical and literary examples Kordela traces the emergence of enjoyment and the gaze out of Spinoza's theories of God truth and causality Kant's critique of pure reason and Marx's pathbreaking application of set theory to economy Kordela's thought unfolds an epistemology and an ontology proper to secular capitalist modernity that call for a revision of the Spinoza Marx Lacan line as the sole alternative to the anti Platonist tradition

Liturgy, Theurgy, and Active Participation Kjetil Kringlebotten, 2023-09-08 Providing a metaphysical grounding for liturgical participation this book argues that active participation in the liturgy must be understood principally as our participation in God's act particularly in the act of Christ and only secondarily as our ritual involvement Utilizing Neoplatonist philosophy Kjetil Kringlebotten proposes that this should be understood in terms of theurgy which is the human participation in divine action which finds its consummation in the incarnation of Christ Without the incarnation all acts will remain extrinsic and imposed but acts can become real and intrinsic precisely because the incarnation makes possible true union with the divine a metaphysical union in distinction without confusion because this union is not extrinsic Through union with Christ as the one common focus of the divine human relation we can have true union with God and may offer true worship In order to make sense of active participation then we need to understand theology in theurgic terms where theurgy is understood not as a mechanical coercion of God but as a participation in His act in creation and through Christ as the true theurgist the master theurgist Whose work transforms our act and the liturgy
