Reviving The Industrial City The Politic:

Reviving the Industrial City Jerry A. Webman, 1982 *Power and City Governance* Alan DiGaetano, 1999 *The State and the City* Ted Robert Gurr, Desmond King, 1987-08-27

Many of the oldest and largest Western cities today are undergoing massive economic decline. The State and the City deals with a key issue in the political economy of cities: the role of the state. Ted Robert Gurr and Desmond S. King argue that theoreticians from both the left and the right have underestimated the significance of state action for cities. Grounding theory in empirical evidence, they argue that policies of the local and national state have a major impact on urban well-being. Gurr and King's analysis assumes modern states have their own interests, institutional momentum, and the capacity to act with relative autonomy. Their historically based analysis begins with an account of the evolution of the Western state's interest in the viability of cities since the industrial revolution. Their argument extends to the local level, examining the nature of the local state and its autonomy from national political and economic forces. Using cross-national evidence, Gurr and King examine specific problems of urban policy in the United States and Britain. In the United States, for example, they show how the dramatic increases in federal assistance to cities in the 1930s and the 1960s were made in response to urban crises which simultaneously threatened national interests and offered opportunities for federal expansion of power. As a result, national and local states now play significant material and regulatory roles that can have as much impact on cities as all private economic activities. A comparative analysis of thirteen American cities reflects the range and impact of the state's activities at the urban level. Boston, they argue, has become the archetypal postindustrial public city; half of its population and personal income are directly dependent on government spending. While Gurr and King are careful to delineate the limits to the extent and effectiveness of state intervention, they conclude that these limits are much broader than formerly thought. Ultimately, their evidence suggests that the continued decline of most of the old industrial cities is the result of public decisions to allow their economic fate to be determined in the private sector.

The Emergence of Stability in the Industrial City Martin Hewitt, 2016-12-05

The rapid eclipse of Chartism and the relative tranquility of the period 1848-67 has been one of the most enduring puzzles of nineteenth-century British history. This book takes a fresh look at this conundrum, treating the period between the Reform Acts of 1832 and 1867 as a coherent whole for the first time. It suggests that previous depictions of 1848 as a watershed in British history have both exaggerated the nature of the transitions which occurred at mid-century and have overestimated both the collapse of radical attitudes and the fading of working-class resentment. The experiences of the Manchester working class show that poverty, unemployment, and hardship persisted through the mid-Victorian boom. While some workers may have taken advantage of economic opportunities and the various movements of social and moral reform promoted by the middle class to acquire respectability in general, attempts at middle-class moral imperialism brought only marginal changes to popular culture and attitudes. Instead, it is argued, the roots of the radical collapse and of political stability lie elsewhere, in the initial failure of

radical leaders to sustain a firm consensus on effective strategies of reform and in changes in the political culture of the mid century city which closed off spaces in which independent working class politics could continue to function In the context of the most important industrial city of the era this study provides a wide ranging analysis of the complex forces which forged the uneasy compromise on which mid nineteenth century stability rested **The Industrial Revival in Soviet Russia**

America **Class, Politics, and Early Industrial Capitalism** Ronald Aminzade, 1981-06-30 Ronald Aminzade provides an original analysis of how the development of early industrial capitalism transformed the political landscape in mid nineteenth century France and gave rise to the revolutionary political upheavals of 1848 and 1871 In a detailed local case study of the city of Toulouse the author carefully documents how the developing solidarities and antagonisms of social class were reflected in the changing character of working class associations cultural institutions collective actions and political ideologies Aminzade employs a coherent and sophisticated Marxist class analysis to systematically explore a wide variety of important issues ranging from the changing organization of the industrial workplace to the decline of patronage politics and the central role of artisans in revolutionary working class politics His study of the role of the Republican party in forging the changing political class alliances of the period and his analysis of the contradictory character of working class political incorporation and repression are provocative and incisive The book concludes with a theoretical interpretation of the concept of hegemony exploring the role of ideologies political parties and the state in the development of hegemonic forms of class domination

Judd, 2015-09-16 This text provides a foundation for understanding the politics of America's cities and urban regions Praised for the clarity of its writing careful research and distinctive theme that urban politics in the United States has evolved as a dynamic interaction among governmental power private actors and a politics of identity City Politics remains a classic study of urban politics

Hubbard's newspaper and bank directory of the world, with gazeteer and atlas combined Harlan Page Hubbard, 1882 [Contesting the Postwar City](#) Eric Fure-Slocum, 2013-06-28 Focusing on mid century Milwaukee Eric Fure Slocum charts the remaking of political culture in the industrial city Professor Fure Slocum shows how two contending visions of the 1940s city working class politics and growth politics fit together uneasily and were transformed amid a series of social and policy clashes Contests that pitted the principles of democratic access and distribution against efficiency and productivity included the hard fought politics of housing and redevelopment controversies over petty gambling questions about the role of organized labor in urban life and battles over municipal fiscal policy and autonomy These episodes occurred during a time of rapid change in the city's working class as African American workers arrived to seek jobs women temporarily advanced in workplaces and labor unions grew At the same time businesses and property owners sought to re establish legitimacy in the changing landscape This study examines these local conflicts showing how they forged the postwar city and laid a foundation for the neoliberal city

The City of London and Social Democracy Aled Davies, 2017-06-15 The City of London and Social Democracy examines the relationship between the financial sector and the state in post war Britain The key argument made in Aled Davies's study is that changes to the financial sector during the 1960s and 1970s undermined the state's capacity to sustain and develop a modern industrial economy Social democratic economic strategy was constrained by the institutionalization of investment in pension and insurance funds the

fragmentation of the nation's oligopolistic domestic banking system the emergence of an unregulated international capital market based in London and the breakdown of the Bretton Woods international monetary system Novel attempts to reconfigure social democratic economic strategy in response to these changes ultimately proved unsuccessful Meanwhile the assumption that national prosperity could only be achieved through industrial growth was challenged by a reconceptualization of Britain as a fundamentally financial and commercial nation an idea that was successfully promoted by the City itself These findings assert the need to place the Thatcher governments subsequent neoliberal economic revolution which saw the acceleration of deindustrialization and the triumph of the City of London as a pre eminent international financial centre within a broader material institutional and cultural context previously underappreciated by historians
