## **Revolution For Nature From The Environment To The Connatural World:**

Revolution for Nature Klaus Michael Meyer-Abich, 1993-01-01      *The Oxford Handbook of Ecocriticism* Greg Garrard, 2014 The Oxford Handbook of Ecocriticism provides a broad survey of the longstanding relationship between literature and the environment The moment for such an offering is opportune in many respects multiple environmental crises are increasingly inescapable at both transnational and local levels the role of the humanities in addition to technology and politics is increasingly recognized as central for exploring and finding solutions and the subject of ecocriticism has reached a kind of critical mass both within its Anglo American heartlands and beyond From its origins in the study of American Nature Writing and British Romanticism ecocriticism has developed along numerous theoretical historical cultural and geographical axes the most contemporary and exciting of which will be represented in the Handbook The contributors include eminent founders of the field including Cheryll Glotfelty and Jonathan Bate a number of key second wave ecocritics and the best up and coming scholars Topics covered include Green Shakespeare the Bard s subversive uses of the pastoral John Clare s sacred relationship with the land Thoreau s profound political passion the natural landscape as symbol of postcolonial resistance in works by Lessing Naipaul and Coetzee the relation between feminism and environmentalism language and the concept of biosemiotics and concerns over pollution and toxicity in films like Erin Brockovitch Michael Clayton and Al Gore s *An Inconvenient Truth*      **The Intrinsic Value of Nature** Leena Vilkkä, 2021-11-15 What is intrinsic value What is the origin of value Are people always superior to nature This book is a philosophical analysis of the human relationship to the non human world It is a pioneering study of the philosophy of nature conservation in relation to the discussion of intrinsic value Vilkkä develops a naturalistic or naturocentric theory of value that is based on ethical extensionism and pluralism Vilkkä analyzes natural values and environmental attitudes zoocentrism biocentrism and ecocentrism This book forms a taxonomy for nature having intrinsic value The theory of intrinsic value is based on naturocentric and naturogenic values The book questions the thesis of weak anthropocentrism that denies the existence of naturogenic values In Vilkkä s theory animals and nature are the origin of value She defends the existence of zoogenic and biogenic values in the non human world and discusses the possibility of ecogenic value nature as a whole having value independent of human or animal minds Vilkkä analyzes the goodness and rights of nature the problem of priorities and ecological humanism A naturocentric recommendation is that the well being of animals and nature should have priority over human values at least in some real decision contexts Ecological humanism recommends an attitude of respect for people animals and nature The book includes an extensive glossary index and bibliography      The future of DNA J. Wirz, E.T. Lammerts van Bueren, 2012-12-06 The rapid progress in biological and biomedical sciences in the last twenty years has brought with it an extensive development of the methods of molecular genetics This has had impacts on society in many fields Practical applications in medicine pharmacology agriculture food design and biotechnology are firmly established and will grow enormously in the years to

come The scientific views of DNA and genes which underpin these applications are challenging our fundamental concepts of life nature society and humanity It is beyond doubt that these developments need to be evaluated and reflected upon both from a scientific and philosophical point of view as well as from a cultural and social perspective This book provides a wide range of discussions about the effects of DNA thinking in science and society in biology and in relation to what it is to be human Insights are provided into trans disciplinary approaches and divergent views are compared The reports on the plenary discussions and the many workshops show progress towards a power free dialogue i e an exchange of thoughts free of economic and political pressure The viewpoints of a variety of specialists including scientists microbiologists molecular geneticists and clinical researchers clinicians philosophers and members of NGOs are presented The contents will be of particular interest to those involved in genetic engineering from students to policy makers who face the challenge of the new technology in their work and who are looking for a substantial expansion and complementation of their basis for judgement forming

A New Environmental Ethics Holmes Rolston III, 2012-04-23 No one looking ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crises Now more than a decade into the next century no one can ignore it A New Environmental Ethics the Next Millennium for Life on Earth offers clear powerful and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment Rolston an early and leading pioneer in studying the moral relationship between humans and the earth surveys the full spectrum of approaches in the field of environmental ethics This book however is not simply a judicious overview Instead it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future As a result this focused forward looking analysis will be a necessary complement to any balanced textbook or anthology in environmental ethics and will teach its readers to be responsible global citizens and residents of their landscape helping ensure that the future we have will be the one we wish for

**The Natural and the Artefactual** Keekok Lee, 1999-01-01 In this book philosopher Keekok Lee challenges one of the central assumptions of contemporary environmentalism that if we could reduce or eliminate pollution we could save the planet without unduly disrupting our modern industrialized societies Lee argues instead that the process of modernization with its attendant emphasis on technological innovation has fundamentally transformed nature into just another manmade artefact Ultimately what needs to be determined is if nature has value above and beyond human considerations whether aesthetic spiritual or biological This provocative book attempts to reconfigure environmental ethics positing the existence of two separate ontological categories the natural and the artefactual Natural entities be they organisms or inert matter are morally considerable because they possess the ontological value of independence whereas artefacts are created by humans expressly to serve their own interests and ends

*Vitalizing Nature in the Enlightenment* Peter H. Reill, 2005-06-06 This far reaching study redraws the intellectual map of the Enlightenment and boldly reassesses the legacy of that highly influential period for us today Peter

Hanns Reill argues that in the middle of the eighteenth century a major shift occurred in the way Enlightenment thinkers conceived of nature that caused many of them to reject the prevailing doctrine of mechanism and turn to a vitalistic model to account for phenomena in natural history the life sciences and chemistry As he traces the ramifications of this new way of thinking through time and across disciplines Reill provocatively complicates our understanding of the way key Enlightenment thinkers viewed nature His sophisticated analysis ultimately questions postmodern narratives that have assumed a monolithic Enlightenment characterized by the dominance of instrumental reason that has led to many of the disasters of modern life

**Food Ethics** Ben Mephram,2012-10-02 None of us can avoid being interested in food Our very existence depends on the supply of safe nutritious foods It is then hardly surprising that food has become the focus of a wide range of ethical concerns Is the food we buy safe Is it produced by means which respect the welfare of animals and sustain the land Are modern biotechnologies employed in food production immoral This book addresses such issues by applying ethical principles to many areas of current concern The contributors provide original and thought provoking treatments of a number of highly topical issues from global hunger and its ethical implications to the cultural habits affecting consumption This interdisciplinary study will prove to be essential reading for all those concerned with food as professionals students or consumers IBSS: Economics: 1993 Vol 42 ,1994 This bibliography lists the most important works published in economics in 1993 Renowned for its international coverage and rigorous selection procedures the IBSS provides researchers and librarians with the most comprehensive and scholarly bibliographic service available in the social sciences The IBSS is compiled by the British Library of Political and Economic Science at the London School of Economics one of the world s leading social science institutions Published annually the IBSS is available in four subject areas anthropology economics political science and sociology

*Imagining the Nation in Nature* Thomas M. Lekan,1999 **Nova Et Vetera** ,2004 **The Environmental Resource Handbook** ,2002 **The Motherly Earth** Joseph Peruma,2002 The Environmental Resource Handbook 2010/11 Laura Mars-Proietti,2009 This edition is the most up to date and comprehensive source for Environmental Resources and Statistics Section I Resources provides detailed contact information for thousands of information sources including Associations Organizations Awards Honors Conferences Foundations Grants Environmental Health Government Agencies National Parks Wildlife Refuges Publications Research Centers Educational Programs Green Product Catalogs Consultants and much more Section II Statistics provides statistics on hundreds of important topics including Children s Environmental Index Municipal Finances Toxic Chemicals Recycling Climate Air Water Quality and more This kind of up to date environmental data all in one place is not available anywhere else on the market place today This new edition is a must have for all public and academic libraries as well as any organization with a primary focus on the environment *The Arboricultural Journal* ,2002 CR. *The Centennial Review* ,1998 *Agriculture and Human Values* ,1984 *Resurgence* ,1994 *Earth Works* Jim Dwyer,1996 *Earth Works* is the only comprehensive guide available to the best new and classic books about nature and the
