Revolution From Above:

Russia's Revolution from Above, 1985-2000 Gordon Hahn, 2018-04-27 The fall of the Soviet communist regime in 1991 offers a challenging contrast to other instances of democratic transition and change in the last decades of the twentieth century The 1991 revolution was neither a peaceful revolution from below as occurred in Czechoslovakia nor a negotiated transition to democracy like those in Poland Hungary or Latin America It was not primarily the result of social modernization the rise of a new middle class or of national liberation movements in the non Russian union republics Instead as Gordon Hahn argues the Russian transformation was a bureaucrat led state based revolution managed by a group of Communist Party functionaries who won control over the Russian Republic RSFSR in the mid 1990s Hahn describes how opportunistic Party and state officials led by Boris Yeltsin defected from the Gorbachev camp and proceeded in 1990 91 to dismantle the institutions that bound state and party These revolutionaries from above seized control of political economic natural and human resources and then separated the party apparatus from state institutions on Russian Republic territory With the failed August 1991 hard line coup Yeltsin banned the Communist Party and decreed that all Union state organs including the KGB and military were under RSFSR control In Hahn s account this mode of revolutionary change from above explains the troubled development of democracy in Russia and the former Soviet republics Hahn shows how limited mobilization of the masses stunted the development of civil societies and the formation of political parties and trade unions with real grass roots The result is a weak society unable to nudge the state to concentrate on institutional reforms society needs for the development of a free polity and economy Russia s Revolution from Above goes far in correcting the historical record and reconceptualizing the Soviet transformation It should be read by historians economists political scientists and Russia area scholars

Revolution From Above David Kotz, Fred Weir, 2013-04-15 Controversially this book argues that the ruling party state elite in the USSR itself moved to dismantle the old system Topics discussed include the beginnings of economic decline in 1975 Gorbachev s efforts to democratize and decentralize the complex political battle through which the coalition favouring capitalism took power the flaws in economic policies intended to rapidly build capitalism the surprising resurgence of Communism Research includes interviews with over 50 former Soviet government and Communist party leaders policy advisors new private businessmen trade union leaders and intellectuals

[Revolution from Above](#) Kerry Raymond Bolton, 2011 Dr Bolton demonstrates that the supposed rivalry between Marxist inspired movements and capitalism has always been an illusion He shows that the ultimate goal of capitalism is to create a worldwide collectivist society of consumers and Marxism is merely one means of attaining this He traces this idea back to Plato through the Illuminati the Freemasons the French Revolution and Communism

Revolution, a Sociological Interpretation Michael S. Kimmel, 1990 Examines why the study of revolution has attained such importance and provides a systematic historical analysis of key ideas and theories The book surveys the classical perspectives on revolution offered by nineteenth century and early twentieth century theorists such as Marx Weber Durkheim Tocqueville and Freud Kimmel argues that their perspectives on revolution were affected by the reality of living through the revolutions of 1848 1917 a reality that raised crucial issues of class state bureaucracy and motivation back cover

Tucker, 2017-07-05 In the years since Stalin's death his profound influence upon the historical development of Communism has remained elusive and in need of interpretation Stalinism as his system has become known is a phenomenon which embraced all facets of political and social life While its effect upon the Soviet Union and other nations today is far less than it was while Stalin lived it is by no means dead In this landmark volume some of the world's foremost scholars of the subject in a concerted group inquiry present their interpretations of Stalinism and its influence on all areas of comparative Communist studies from history and politics to economics sociology and literary scholarship The studies contained in this volume are an outgrowth of a conference on Stalinism held in Bellagio Italy sponsored by the American Council of Learned Societies In his major contribution to this book Leszek Kolakowski calls Stalinism a unified state organism facing atom like individuals This extraordinary volume augmented by a revealing new introduction by the editor Robert C Tucker can be seen as amplifying that remark nearly a half century after the death of Joseph Stalin himself Contributors to this work are Wlodzimierz Brus Katerina Clark Stephen F Cohen Alexander Erlich Leszek Kolakowski Moshe Lewin Robert H McNeal Mihailo Markovic Roy A Medvedev T H Rigby Robert Sharlet and H Gordon Skilling Robert C Tucker's principle work on Stalin has been described by George F Kennan as the most significant single contribution made to date anywhere to the history of Soviet power **Re-distribution from Above** Karuti Kanyinga, 2000 Using empirical evidence from the coastal district of Kenya an area with a long history of private land ownership this report challenges the key assumptions of the proponents of land individualization The author points to the many dysfunctions associated with land privatization and reinforces the growing critique that customary land tenure is far more complex and flexible than its critics are prepared to concede *A Dictionary of 20th-Century Communism* Silvio Pons, Robert Service, 2012-03-04 Shelf List Add To Favorites With more than 400 concise entries this unique reference provides encyclopedic coverage of 20th century communism and its enormous impact on world history from the Russian Revolution through the collapse of the Soviet Union and beyond Drawing on the archives of former communist states this indispensable work reflects the most up to date understanding of communism as an ideological and political force Examines the political intellectual and social influences of communism around the globe Features contributions from an international team of 160 scholars Includes more than 400

Quatri me de couverture *Cronies or Capitalists? The Russian Bourgeoisie and the Bourgeois Revolution from 1850 to 1917* David Lockwood, 2009-05-27 Why wasn't there a successful bourgeois revolution in Russia Was it because Russian capitalists were too servile in their relationship with the Tsarist autocracy Or was it because Russian states Tsarist republican and Soviet were just too strong This book is a political history of the Russian capitalist class from 1850 to 1917 that seeks to answer these questions The book covers the consistent opposition of the Russian bourgeoisie to the Tsarist autocracy up to and including the revolution of 1905 It then considers its alliance from 1909 with new state elements officials politicians army officers and technical experts who were convinced of the possibility of reform and renovation through a radically reorganised state cleansed of its autocratic detritus Such a reorganisation was expected as a result of the Great War While these ideas came to a temporary fruition in the February Revolution of 1917 they also laid the basis for a much more demanding Soviet state in October and the destruction of the bourgeoisie itself The book ends with a consideration of the wider implications for the concept of the bourgeois revolution implications that stretch well beyond Russia that are revealed by the rise and fall of the Russian bourgeoisie

From Above and Below Craig Livingston, 2013-06-01 2014 Best International Book Award Mormon History Association For the first century of their church's existence Mormon observers of international events studied and cheered global revolutions as a religious exercise As believers in divine human co agency many prominent Mormons saw global revolutions as providential precursors to the imminent establishment of the terrestrial kingdom of God French Revolutionary symbolism socialist critiques of industrialism American Indian nationalism and Wilsonian internationalism all became the raw materials of Mormon millennial theologies which were sometimes barely distinguishable from secular utopianism Many Mormon thinkers accepted secular revolutionary arguments that the old world order needed to be destroyed not merely reformed to clear the way for the new In *From Above and Below* author Craig Livingston tells the story of Mormon commentary on global revolutions from the European revolutions of 1848 to the collapse of Mormon faith in progress in the 1930s when revolutionary communist and fascist regimes exposed themselves as violent and repressive As the Church bureaucratized and assimilated to mainstream American and capitalist values Mormons became champions of the conservative view of political and social development for which they are known today The first Mormon converts in Mexico and France both political radicals would scarcely recognize the arch conservative twenty first century Church

The Affirmative Action Empire Terry

Martin,2001-02-15 The Soviet Union was the first of Europe's multiethnic states to confront the rising tide of nationalism by systematically promoting the national consciousness of its ethnic minorities and establishing for them many of the institutional forms characteristic of the modern nation state In the 1920s the Bolshevik government seeking to defuse nationalist sentiment created tens of thousands of national territories It trained new national leaders established national languages and financed the production of national language cultural products This was a massive and fascinating historical experiment in governing a multiethnic state Terry Martin provides a comprehensive survey and interpretation based on newly available archival sources of the Soviet management of the nationalities question He traces the conflicts and tensions created by the geographic definition of national territories the establishment of dozens of official national languages and the world's first mass affirmative action programs Martin examines the contradictions inherent in the Soviet nationality policy which sought simultaneously to foster the growth of national consciousness among its minority populations while dictating the exact content of their cultures to sponsor national liberation movements in neighboring countries while eliminating all foreign influence on the Soviet Union's many diaspora nationalities Martin explores the political logic of Stalin's policies as he responded to a perceived threat to Soviet unity in the 1930s by re-establishing the Russians as the state's leading
