**Revolution, Socialism, and Nationalism in Viet Nam: Winning the war and losing the peace** Ken Post,1989 This final volume completes the history and analysis of the Vietnamese Revolution by bringing it up to final Communist victory in 1975 Although it deals with the relevant developments in the North it basically concentrates on the struggle in the South following the massive US intervention in 1965 Unlike other analyses it focuses primarily on the Vietnamese protagonists the Communists and the Republic of Viet Nam examining above all the questions of why the former were able to win and whether the latter could ever have been a viable regime

**Revolution and Dictatorship** Steven Levitsky, Lucan Way,2024-10-29 Why the world's most resilient dictatorships are products of violent revolution Revolution and Dictatorship explores why dictatorships born of social revolution such as those in China Cuba Iran the Soviet Union and Vietnam are extraordinarily durable even in the face of economic crisis large scale policy failure mass discontent and intense external pressure Few other modern autocracies have survived in the face of such extreme challenges Drawing on comparative historical analysis Steven Levitsky and Lucan Way argue that radical efforts to transform the social and geopolitical order trigger intense counterrevolutionary conflict which initially threatens regime survival but ultimately fosters the unity and state building that supports authoritarianism Although most revolutionary governments begin weak they challenge powerful domestic and foreign actors often bringing about civil or external wars These counterrevolutionary wars pose a threat that can destroy new regimes as in the cases of Afghanistan and Cambodia Among regimes that survive however prolonged conflicts give rise to a cohesive ruling elite and a powerful and loyal coercive apparatus This leads to the downfall of rival organizations and alternative centers of power such as armies churches monarchies and landowners and helps to inoculate revolutionary regimes against elite defection military coups and mass protest three principal sources of authoritarian breakdown Looking at a range of revolutionary and nonrevolutionary regimes from across the globe Revolution and Dictatorship shows why governments that emerge from violent conflict endure

Michael J. Hogan,1995 A survey of the historical literature on intelligence and national security during the Cold War      **The Cold War and After** Richard Saull,2007-01-20 The Cold War is often presented as an international power struggle between the Soviet Union and the US Richard Saull challenges this assumption He broadens our understanding of the defining political conflict of the twentieth century by stressing the social and ideological differences of the superpowers and how these differences conditioned their international behaviour Saull argues that US Soviet antagonism was part of a wider conflict between capitalism and communism involving states and social forces other than the superpowers The US was committed to containing revolutionary and communist movements that emerged out of uneven capitalist development In highlighting the socio economic and ideological dimensions of the Cold War Saull not only provides a richer history of the Cold War than mainstream approaches but is also able to explain why revolutionary domestic transformations caused international crises Tracing the origins of new resistance to American global power Saull s book provides an ideal alternative perspective on the Cold War and its end      **The State and Revolution in the Twentieth-Century** Berch Berberoglu,2006-12-25 This book deals with a topic that is central to the most important and decisive issues and events of our time the state and revolution in the twentieth century Social scientists have made numerous attempts to understand the causes of revolutions by examining the underlying factors that contribute to revolutionary uprisings To further these efforts this book addresses some of the key issues related to this process through both theoretical and empirical inquiry into the nature and dynamics of the state and revolution as a basis for an understanding of the major socialist revolutions of the twentieth century The book provides a comparative historical analysis of the state and socialist revolutions in Russia China Vietnam Cuba and Nicaragua The thread that runs through each of the chapters that make up this book especially the case studies of revolutions taken up for study is the class nature of the state and the class forces involved in the revolutionary process leading up to the taking of state power as well as and more importantly so the class nature of the forces that have taken power and rule over society in the post revolutionary period Applying class analysis to the study of the state and revolution this book helps us understand the nature and dynamics of class struggles in societies that have gone through a revolutionary process      **Regaining Marxism** Ken Post,2016-07-27 This book responds to recent events by proposing a radical reshaping of Marxist theory Taking the core problem as that of the historical subject it conceptualises human life in terms of four interrelated practices It explores these in turn in the context of a capitalism divided into centre and periphery primarily through nine theoretical reconstructions which attempt to meet such problems as the labour theory of value the nature and role of the state and consciousness      **Subject Guide to Books in Print** ,2001      [The Communist Road To Power In Vietnam](#) William J Duiker,2018-03-05 In this new edition of his widely acclaimed study William Duiker has revised and updated his analysis of the Communist movement in Vietnam from its formation in 1930 to the dilemmas facing its leadership in the post Cold War era Making use of newly available documentary sources and recent Western scholarship the

author reevaluates Communist revolutionary strategy during the Vietnam War Based on primary materials in several languages this respected work is essential for an understanding of Vietnam in the twentieth century     **Empire and Revolution** Peter L. Hahn, Mary Ann Heiss, 2001 The ten essays in this volume represent state of the art surveys of ten singular episodes in U S interaction with the Third World since 1945 Each author seeks to present a unique approach to a specific topic within U S Third World relations The essays cover the globe and include studies of the Middle East Latin America Africa and Asia They make use of a variety of source material and employ a wide range of analytical devices such as the national security paradigm the idea of economic development and culture The essays present a multihued portrait of the different ways policy makers in the United States dealt with Third World problems The essays make clear the multitude of considerations that affected policy making the many different actors both official and nonofficial who came to influence the policy making process and the possibilities for future research into U S relations with the nations of the Third World They are designed not only to present the current state of the literature but also to suggest some avenues for future research
