Revolution in Time David Saul Landes,1985 **Revolution in Time** David S. Landes,1983 **The Mental Universe of the English Nonjurors** John William Klein,2021-09-21 The Glorious Revolution of 1688 which pushed James II from the throne of England was not glorious for everyone in fact for many it was a great disaster Those who had already taken an oath of allegiance to James II and to his heirs and lawful successors now pondered how they could take a second oath to William and Mary Those who initially refused to swear the oaths were called Nonjurors In 1691 Archbishop Sancroft eight bishops and four hundred clergy of the Church of England as well as a substantial number of scholars at Oxford and Cambridge were deprived removed from their offices and their license to practice removed The loss of this talent to the realm was incalculable Ten different paradigms shaped the English Nonjurors worldview Passive Obedience was paramount the Apostolic Succession essential a Cyprianist mentality colored everything they held a conscientious regard for oaths the Usages Controversy brought Tradition to the fore printing presses replaced lost pulpits patronage was a means of protection and proliferation they lived with a hybridized conception of time creative women spiritual writers complemented male bishops and a global ecumenical approach to the Orthodox East was visionary These ten operated synergistically to create an effective tool for the Nonjurors survival and success in their mission The Nonjurors influence out of all proportion to their size was due in large measure to this mentality Their unique circumstances prompted creative thinking and they were superb in that endeavor These perspectives constituted the infrastructure of the Nonjurors world and they help us to see the early eighteenth century not only as a time of rapid change but also as an era of persistent older religious mentalities adapted to new circumstances Revolution in Time David S. Landes,1983 Making Time Gavin Lucas,2021-04-25 Making Time grapples with a range of issues that have crystallized in the wake of 15 years of discussion on time in archaeology since the author s seminal volume The Archaeology of Time synthesizing them for a new generation of scholars The general understanding of time held by both archaeologists and non archaeologists is often very simple a linear notion where time flows along a single path from the past into the future This book sets out to complicate this image to draw out the key problems and issues with time that impact archaeological interpretation Using concrete examples drawn from different periods and places the book challenges the reader to think again Ultimately the book will suggest that if we want to understand what archaeological time is then we need to accept that things do not exist in time they make time The crucial question then becomes what kinds of time do archaeological materialities produce Written for upper level undergraduates and researchers in archaeology the book is also accessible to non academics with an interest in the topic The book is relevant for cognate disciplines especially history heritage studies and philosophy **Routledge Handbook of Historical International Relations** Benjamin de Carvalho,Julia Costa Lopez,Harvard Leira,2021-06-28 This handbook presents a comprehensive concise and accessible overview of the field of Historical International Relations HIR It summarizes and

synthesizes existing contributions to the field while presenting central themes approaches and methodologies that have driven the development of HIR providing the reader with a sense of the diversity and research dynamics that are at the heart of this field of study The wide range of topics covered are grouped under the following headings Traditions Demonstrates the wide variety of approaches to HIR Thinking International Relations Historically Different ways of thinking IR historically share some common concerns and areas for further investigation Actors Processes and Institutions Explores the processes actors practices and institutions that constitute the core objects of study of many HIR scholars Situating Historical International Relations Critically reflects about the situatedness of our objects of study Approaches Examines how HIR scholars conduct and reflect about their research often in dialogue with a variety of perspectives from cognate disciplines Summarizing key contributions and trends while also sketching out challenges for future inquiry this is an invaluable resource for students academics and researchers from a range of disciplines particularly International Relations global history political science history sociology anthropology peace studies diplomatic studies security studies international political thought political geography international law

Clocks of New York Chris DeSantis, Vinit Parmar, 2011-02-28 The phrase in a New York minute is virtually synonymous with all that is fast paced and technologically advanced One of the first cities founded on the eastern seaboard New York has been a horological trendsetter for almost four hundred years When the first Dutch settlers came to Manhattan in the early years of the 17th century they established America's first stronghold of capitalism Over the next few

centuries precise schedules became an inescapable reality of modernization and precision timepieces became an art form in Europe and America As the center of commercial and industrial activity New York City developed a particular preoccupation with time and hence became a showplace for an astonishing array of timepieces From tower clocks to time balls this richly illustrated work chronicles the history of public clocks in New York City It discusses the premiere clock makers of the 19th century such as the Ansonia Clock Company and the Self Winding Clock Company the heyday of American public clock making and the ever increasing importance of clocks Post clocks church clocks sundials and labor timepieces are all discussed herein Photographs of subject pieces and an index are included International Law and Time Klara Polackova Van der Ploeg, Luca Pasquet, León Castellanos-Jankiewicz, 2022-12-16 This book explores the close complex and consequential yet to a large extent implicit relationship between international law and time There is a conspicuous discrepancy between international law s technical preoccupation with the mechanics of temporal rules and the absence of more foundational considerations of how time both as an irrepressible physical dimension manifesting in the passage of time and as a social construct shaped by diverse social and cultural factors impacts and interacts with international law Divided into five parts and 21 chapters this book explores key aspects of the relationship between international law and time and puts the spotlight on time s fundamental significance for international law as a legal order and as a discipline Pursuing diverse approaches to international law the authors consider the notion significance manifestations uses and implications of time in international law in a wide range of contexts and offer insights into the various ways in which international law and international lawyers cope with time both in terms of constructing narratives and in devising and employing particular legal techniques *Flesh and Stone: The Body and the City in Western Civilization* Richard Sennett, 1996-03-17 This vivid history of the city in Western civilization tells the story of urban life through bodily experience Flesh and Stone is the story of the deepest parts of life how women and men moved in public and private spaces what they saw and heard the smells that assailed them where they ate how they dressed the mores of bathing and of making love all in the architecture of stone and space from ancient Athens to modern New York Early in Flesh and Stone Richard Sennett probes the ways in which the ancient Athenians experienced nakedness and the relation of nakedness to the shape of the ancient city its troubled politics and the inequalities between men and women The story then moves to Rome in the time of the Emperor Hadrian exploring Roman beliefs in the geometrical perfection of the body The second part of the book examines how Christian beliefs about the body related to the Christian city the Venetian ghetto cloisters and markets in Paris The final part of Flesh and Stone deals with what happened to urban space as modern scientific understanding of the body cut free from pagan and Christian beliefs Flesh and Stone makes sense of our constantly evolving urban living spaces helping us to build a common home for the increased diversity of bodies that make up the modern city *Building 14, Burton Jewelry Store, Harpers Ferry National Historical Park, Harpers Ferry, West Virginia* Carol A. Popkin,J.E. Force,2001-07-31 The influence of millenarian thinking upon Cromwell s England is well known The cultural and intellectual conceptions of the role of millenarian ideas in the long 18th century when so the official story goes the religious sceptics and deists of Enlightened England effectively tarred such religious radicalism as enthusiasm has been less well examined This volume endeavors to revise this official story and to trace the influence of millenarian ideas in the science politics and everyday life of England and America in the 17th and 18th centuries **The Upright Thinkers** Leonard Mlodinow,2015-05-05 A few million years ago our ancestors came down from the trees and began to stand upright freeing our hands to create tools and our minds to grapple with the world around us Leonard Mlodinow takes us on a passionate and inspiring tour through the exciting history of human progress and the key events in the development of science In the process he presents a fascinating new look at the unique characteristics of our species and our society that helped propel us from stone tools to written language and through the birth of chemistry biology and modern physics to today s technological world Along the way he explores the cultural conditions that influenced scientific thought through the ages and the colorful personalities of some of the great philosophers scientists and thinkers Galileo who preferred painting and poetry to medicine and dropped out of university Isaac Newton who stuck needlelike bodkins into his eyes to better understand changes in light and color and Antoine Lavoisier who drank nothing but milk for two weeks to examine its effects on his body Charles Darwin Albert Einstein Werner Heisenberg and many lesser known but equally brilliant minds also populate these pages each of their stories showing how much of human achievement can be attributed to the stubborn pursuit of simple questions why how bravely asked The Upright Thinkers is a book for science lovers and for anyone interested in creative thinking and in our ongoing quest to understand our world At once deeply informed accessible and infused with the author s trademark wit this

Millenarianism and Messianism in Early Modern European Culture J.E. Force, R.H. Popkin, 2013-04-17 Thanks to the work of legions of scholars the millenarian expectations within large segments of the population in Cromwellian England have been carefully examined The widespread belief that England with its messianic leader 1 Cromwell heralded the millennium is well known Less well examined perhaps has been the cultural conceptions of the role of millenarian and messianic ideas in the long eighteenth century Especially during the stable Hanoverian era until the American and French Revolutions the common place millennial expectations of the English Civil War appeared to recede By the end of the eighteenth century with the Napoleonic wars millenarian views and interpretations underwent a minor renaissance but with nothing like the fervor it is commonly thought of the Puritan era when so many believed that the end was near By the end of the eighteenth century so the official story goes the religious sceptics and deists of Enlightened England such as David Hume had done too well their work of tarring such religious radicalism with the brush of enthusiasm Happily this official interpretation of the events of the early modern period in which scholars have too often taken their cue from writers such as Hume and simply ignored millenarian contexts and expectations in the Age of Reason has undergone a marked shift in the past twenty years *The Future of Privacy: Private life and public policy* Perri 6, 1998
