## **Revolutionary America 1750 1815 Sources And Interpretation:**

**Revolutionary America, 1750-1815** Cynthia A. Kierner, 2003 A core text or supplementary reader for advanced undergraduate courses on the era of the American Revolution Unique in both coverage and focus this collection of primary documents and original interpretive essays provides an unusually well balanced introduction to the era of the American Revolution Chronologically the text explores the period from 1750 to 1815 examining sources of both stability and discontent within the British Empire and thereby discouraging students from assuming the inevitability of the Revolution and ending with the War of 1812 which many Americans saw as securing independence and the ideals of the Revolution Topically the text covers traditional political and military subjects as well as the newer social and cultural history of the era providing students with a broad understanding of the Revolution as both a war for independence and an occasion for political social and cultural conflict and transformation The wide variety of documents range from classic texts such as Common Sense and the Federalist to excerpts from diaries and travelers accounts to newspapers advertisements and selections from contemporary histories and novels *Studyguide for Revolutionary America 1750-1815* Cram101 Textbook Reviews, 2007-08 Never HIGHLIGHT a Book Again Virtually all of the testable terms concepts persons places and events from the textbook are included Cram101 Just the FACTS101 studyguides give all of the outlines highlights notes and quizzes for your textbook with optional online comprehensive practice tests Only Cram101 is Textbook Specific Accompanys 9780130898678

**Revolutionary War Almanac** John C. Fredriksen, 2006 Offering a day by day chronology of the people and events important to the American Revolution this title provides a look at this historic time It covers people battles and other details and includes more than 130 maps photographs and illustrations pair with an index a bibliography cross references and a chronology **The Long Road to Change** Eric Nellis, 2019-02-06 Breaking from traditional historical interpretations of the period Eric Nellis takes a long view of the origins and consequences of the Revolution and asserts that the Revolution was not as others have argued generated by a well developed desire for independence but rather by a series of shifts in British imperial policies after 1750 Nellis argues that the Revolution was still being shaped as late as 1820 and that many racial territorial economic and constitutional issues were submerged in the growth of the republic and the enthusiasm of the population In addressing the nature of the Revolution Nellis suggests that the American Revolution and American political systems and principles are unique and much less suited for export than many Americans believe Settlers, Liberty, and Empire Craig Yirush, 2011-02-28 Traces the emergence of a revolutionary conception of political authority on the far shores of the eighteenth century Atlantic world Based on the equal natural right of English subjects to leave the realm claim indigenous territory and establish new governments by consent this radical set of ideas culminated in revolution and republicanism But unlike most scholarship on early American political theory Craig Yirush does not focus solely on the revolutionary era of the late eighteenth century Instead he examines how the political ideas of settler elites in British North

America emerged in the often forgotten years between the Glorious Revolution in America and the American Revolution against Britain. By taking seriously an imperial world characterized by constitutional uncertainty, geopolitical rivalry, and the ongoing presence of powerful Native American peoples, Yirush provides a long-term explanation for the distinctive ideas of the American Revolution.

*Against Popery* Evan Haefeli, 2020-12-15 Although commonly regarded as a prejudice against Roman Catholics and their religion, anti-popery is both more complex and far more historically significant than this common conception would suggest. As the essays collected in this volume demonstrate, anti-popery is a powerful lens through which to interpret the culture and politics of the British American world. In early modern England, opposition to tyranny and corruption associated with the papacy could spark violent conflicts not only between Protestants and Catholics but among Protestants themselves. Yet anti-popery had a capacity for inclusion as well and contributed to the growth and stability of the first British Empire. Combining the religious and political concerns of the Protestant Empire into a powerful if occasionally unpredictable ideology, anti-popery affords an effective framework for analyzing and explaining Anglo-American politics, especially since it figured prominently in the American Revolution as well as others. Taking an interdisciplinary approach written by scholars from both sides of the Atlantic working in history, literature, art history, and political science, the essays in *Against Popery* cover three centuries of English, Scottish, Irish, early American, and imperial history between the early sixteenth and early nineteenth centuries. More comprehensive, inclusive, and far-reaching than earlier studies, this volume represents a major turning point, summing up earlier work and laying a broad foundation for future scholarship across disciplinary lines.

Liebell, St. Joseph's University; Brendan McConville, Boston University; Anthony Milton, University of Sheffield; Andrew R. Murphy, Virginia Commonwealth University; Gregory Smulewicz, Rutgers University, New Brunswick; Laura M. Stevens, University of Tulsa; Cynthia J. Van Zandt, University of New Hampshire; Peter W. Walker, University of Wyoming.

Early American Histories *The Greenwood Encyclopedia of Daily Life in America* Randall M. Miller, 2008-12-30 The course of daily life in the United States has been a product of tradition, environment, and circumstance. How did the Civil War alter the lives of women, both white and black, left alone on southern farms? How did the Great Depression change the lives of working-class families in eastern cities? How did the discovery of gold in California transform the lives of native American, Hispanic, and white communities in western territories? Organized by time period as spelled out in the National Standards for U.S. History, these four volumes effectively analyze the diverse whole of American experience, examining the domestic, economic, intellectual, material, political, recreational, and religious life of the American people between 1763 and 2005. Working under the editorial direction of general editor Randall M. Miller, professor of history at St. Joseph's University, a group of expert volume editors carefully integrate material drawn from volumes in Greenwood's highly successful *Daily Life Through History* series with new material researched and written by themselves and other scholars. The four volumes cover the following

periods The War of Independence and Antebellum Expansion and Reform 1763 1861 The Civil War Reconstruction and the Industrialization of America 1861 1900 The Emergence of Modern America World War I and the Great Depression 1900 1940 and Wartime Postwar and Contemporary America 1940 Present Each volume includes a selection of primary documents a timeline of important events during the period images illustrating the text and extensive bibliography of further information resources both print and electronic and a detailed subject index

**Natural Rights Individualism and Progressivism in American Political Philosophy: Volume 29, Part 2** Ellen Frankel Paul, Fred D. Miller (Jr.), Jeffrey Paul, 2012-08-27 In 1776 the American Declaration of Independence appealed to the Laws of nature and of Nature's God and affirmed these Truths to be self evident that all Men are created equal that they are endowed by their Creator with certain unalienable Rights that among these are Life Liberty and the Pursuit of Happiness In 1935 John Dewey professor of philosophy at Columbia University declared Natural rights and natural liberties exist only in the kingdom of mythological social zoology These opposing pronouncements on natural rights represent two separate and antithetical American political traditions natural rights individualism the original Lockean tradition of the Founding and Progressivism the collectivist reaction to individualism which arose initially in the newly established universities in the decades following the Civil War

**Shaping the New World** Eric Guest Nellis, Canadian Historical Association, 2013-01-01 Shaping the New World introduces students to the origins growth and consolidation of African slavery in the Americas and race based slavery's impact on the economic social and cultural development of the New World

**Program of the Annual Meeting - American Historical Association** American Historical Association, 2003 Some programs include also the programs of societies meeting concurrently with the association

Early American Literature, 2007

**American Book Publishing Record**, 2002

**Program of the ... Annual Meeting** American Historical Association. Meeting, 2007 *Infantry*, 1999 **Jovellanos and His English Sources** John H. R. Polt, 1964 This is a print on demand edition of an important hard to find publication

**Social Disorder in Britain 1750-1850** J. E. Thomas, 2011-07-30 In the eighteenth and nineteenth centuries revolutionary dissent political upheaval and social protest spread throughout Europe and Wales was no exception In this unique examination of British social history J E Thomas focuses upon the power of the local gentry in Wales and their relationship with the poor and potentially revolutionary population Early explosions of protest were seen all over Wales coinciding with the aftermath of the American Revolution and the equally seismic events of the French Revolution while later revolts went on to provide serious challenges to the British state Social Disorder in Britain is an important contribution to the study of the history of religion social protest and the rise of revolutionary movements and will be essential reading for students and researchers of British history as well as those interested in revolution more generally

**Britain and the Regency of Tripoli** Sara M. ElGaddari, 2022-12-15 By the early 1820s British policy in the Eastern Mediterranean was at a crossroads Historically shaped by the rivalry with France the course of Britain's future role in the region was increasingly

affected by concern about the future of the Ottoman Empire and fears over Russia's ambitions in the Balkans and the Middle East. The Regency of Tripoli was at this time establishing a new era in foreign and commercial relations with Europe and the United States. Among the most important of these relationships was that with Britain. Using the National Archive records of correspondence of the British consuls and diplomats from 1795 to 1832 and within the context of the wider Eastern Question, this book reconstructs the Anglo-Tripolitanian relationship and argues that the Regency played a vital role in Britain's imperial strategy during and after the Napoleonic Wars. Including the perspective of Tripolitanian notables and British diplomats, it contends that the activities of British consuls in Tripoli and the networks they fostered around themselves reshaped the nature and extent of British imperial activity in the region. *In Dependence* Jacqueline Beatty, 2023-04-25

Despite legal, social, and economic restrictions on their rights and power, women in the revolutionary era were able to advocate for themselves and express a relative degree of power over their own lives, not in spite of their dependent status but because of it. **Revolutionary Brotherhood** Steven C. Bullock, 2011-02-01

In the first comprehensive history of the fraternity known to outsiders primarily for its secrecy and rituals, Steven Bullock traces Freemasonry through its first century in America. He follows the order from its origins in Britain and its introduction into North America in the 1730s to its near destruction by a massive anti-Masonic movement almost a century later and its subsequent reconfiguration into the brotherhood we know today. With a membership that included Benjamin Franklin, George Washington, Paul Revere, and Andrew Jackson, Freemasonry is fascinating in its own right, but Bullock also places the movement at the center of the transformation of American society and culture from the colonial era to the rise of Jacksonian democracy. Using lodge records, members' reminiscences, and correspondence, and local and Masonic histories, Bullock links Freemasonry with the changing ideals of early American society. Although the fraternity began among colonial elites, its spread during the Revolution and afterward allowed it to play an important role in shaping the new nation's ideas of liberty and equality. Ironically, however, the more inclusive and universalist Masonic ideas became the more threatening to its members' economic and emotional bonds, seeming to outsiders to spark an explosive attack on the fraternity after 1826. *American History* The Bill of Rights and the States Patrick T. Conley, 1992

Fourteen individual state essays elucidate the complexities of local and regional interests that shaped the debate over individual rights and the eventual adoption of the Bill of Rights.
