Long Trip The Prehistory Of Psychedelia:

The Long Trip Paul Devereux, 1997 A wide variety of psychedelics primarily plants and mushrooms have been used consistently by human societies for ritual purposes for centuries This illuminating book presents a pioneering study of the uses of psychedelic drugs from ancient times to the present Illustrations **Deeper Learning with Psychedelics** David J. Blacker, 2024-06-01 In both clinical and informal settings psychedelics users often report they have undergone something profound and even life altering Yet there persists a confounding inability to articulate just what has been imparted Informed by multidisciplinary emerging research this book provides an account of the specifically educational aspects of psychedelics and how they can render us ready to learn Drawing from indigenous peoples worldwide who typically revere these substances as plant teachers and from canonical thinkers in the western tradition such as Plato Spinoza Kant and Heidegger the author proposes an original set of categories through which to understand the educational capabilities of entheogens psychedelics with visionary qualities It emerges that entheogens real power lies not in destabilizing and decentering turning on and dropping out but as powerful aids in restoring and reenchancing our shared worlds **Tripping** Charles Hayes, 2000-11-01 Provides the much needed coming out of the closet that the psychedelic movement has lacked These stories will captivate inspire caution and educate This courageous book exceeds expectations Rich Doblin President Multidisciplinary Association for Psychedelic Studies MAPS A collection of transformational psychedelic experiences and a guidebook for how to understand them Flash back to a generation ago when the world of psychedelics still coasted in the gritty adventurous do it yourself ethos of Sixties counterculture Hang on for the bumpy thrill ride of the psychedelic experience before it was traded in for the white lab coat of pharmaceutical medicine Read up on the early anecdotes and field reports that have made ketamine and MDMA the newest drugs in mental health treatment In Tripping journalist Charles Hayes compiles fifty narratives of psychedelic odysseys from respectable Baby Boomers and young ravers to renowned Beat poet Anne Waldman and preeminent spokesperson Terence McKenna to give readers a glimpse into this transgressive experimental world of self discovery As he liberates psychedelics from their social stigma Hayes explores ancient Greek rites and ecstasy fueled raves sacred indigenous plants and synthetic smart drugs alien encounters and connections with nature the terrifying and the sublime A history cultural timepiece and resource guide all in one Tripping is a compendium of forbidden memories whose otherworldly tales and expository advice will provide insight and inspiration to readers even and especially now twenty years after its original publication **Otherworlds** David Luke, 2019-05-24 Scientist and psychonaut David Luke weaves personal experience and scientific research in this comprehensive exploration of chemically mediated extra ordinary human experiences Emphasizing parapsychological aspects of the psychedelic experience Luke s new book fills in a fascinating and previously neglected lacuna in the burgeoning field of human studies with these compounds Rick Strassman PhD A psychedelic Indiana Jones Matt Colborn PhD David Luke s delightful one liner about his book is that it s

about weird people in weird places taking weird substances doing weird things and importantly having weird experiences On reflection it's much more profound than that So weird reader forge ahead without fear Dean Radin PhD In his fascinating book David plunges into this controversial topic and gives the backstory the front story and possible ways forward to bring paranormal and psychedelic research together and further our understanding of both Dennis J McKenna PhD A remarkable collection and a necessary one This body of research illuminates aspects of psychedelic experiences usually obscured or denied in the medical and clinical research and sensationalized in the popular press James Fadiman PhD A real Dr Gonzo Will Self The Acid Queen Susannah Cahalan, 2025-04-22 Shines a light on one of the twentieth century's most amazing untold life stories An essential read and an unforgettable trip Robert Kolker author of Hidden Valley Road Cahalan details a piece of lost but fascinating history the story of a woman who embodied an era of freedom experimentation and psychedelic adventure Meticulously reported and beautifully crafted Susan Orlean The untold story of the woman who played a critical role in bringing psychedelics into the mainstream until her audacious exploits forced her into the shadows from the 1 New York Times bestselling author of Brain on Fire Rosemary Woodruff Leary has been known only as the wife of Timothy Leary the Harvard professor turned psychedelic high priest whose jailbreak captivated the counterculture and whose life on the run with Rosemary inflamed the government But Rosemary was more than a mere accessory She was a beatnik a psychonaut and a true believer who tested the limits of her mind and the expectations for women of her time Long overlooked by those who have venerated her husband Rosemary spent her life on the forefront of the counterculture working with Leary on his books and speeches sewing his clothing and shaping for better and for worse the media's narrative about LSD Ultimately Rosemary sacrificed everything for the safety of her fellow psychedelic pioneers and the preservation of her husband's legacy Drawing from a wealth of interviews diaries archives and unpublished sources Susannah Cahalan writes the definitive portrait of Rosemary Woodruff Leary reclaiming her narrative and her voice from those who dismissed her Page turning revelatory and utterly compelling *The Acid Queen* shines an overdue spotlight on a pioneering psychedelic seeker *Failed God* John A. Rush, 2019-04-16 On a 2001 trip to the cathedrals of Europe anthropologist John Rush and his wife entered St Mark's Basilica in Venice and encountered a mosaic depicting Jesus surrounded by mushrooms with an Amanita muscaria cap in his hand Examining the space with new eyes they discovered images of mushrooms and mind altering plants all over the Basilica Intrigued Dr Rush spent seven years researching and reflecting on the profound effects hallucinogens had on the founding of all three major Western religions He concluded that Judaism Christianity and Islam are political constructions evolving out of the use of not only Amanita muscaria but a plethora of mind altering substances *Failed God* Fractured Myth in a Fragile World re-examines the scriptural stories of Judaism Christianity and Islam as told in the Bible and Qur'an and reveals them as concocted mythical charters stemming from drug induced romps with the supernatural Rush shows how mind altering substances played an instrumental role in the birth and development of Western religions and explains how they contributed

to reports of prophetic experiences including angry and disturbing messages from the divine With chapters on Judaism Christianity and Islam Rush fully addresses the effects of mind altering substances on each tradition convincingly discrediting the idea that they stem from actual human interaction with the divine He also shows how an intoxicated and over zealous Apostle Paul corrupted Jesus s simple message of human decency forming an oppressive religious system based on fear In a thought provoking conclusion Rush asks how we can continue to attribute authority to traditions that were so clearly irrationally founded and incompatible with today s world

Powell,2011-06-23 How psilocybin mushrooms facilitate a direct link to the wisdom of Nature and the meaning of life Examines the neurochemistry underlying the visionary psilocybin experience Explains how sacred mushrooms help restore our connection to the natural intelligence of Nature Reviews the research on

psilocybin's ability to dispel anxiety in the terminally ill and its helpful effects on obsessive compulsive disorder. It has been more than 50 years since sacred mushrooms were plucked from the shamanic backwaters of Mexico and presented to the modern world by R Gordon Wasson. After sparking the psychedelic era of the 1960s, however, the divine mushroom returned underground from whence it mysteriously originated. Yet today the mushroom's extraordinary influence is once again being felt by large numbers of people due to the discovery of hundreds of wild psilocybin species growing across the globe. In *The Psilocybin Solution*, Simon G Powell traces the history of the sacred psilocybin mushroom and discusses the shamanic visionary effects it can induce. Detailing how psilocybin acts as a profound enhancer of consciousness and reviewing the research performed by the Multidisciplinary Association for Psychedelic Studies (MAPS), Johns Hopkins University, and the Heffter Research Institute on psilocybin's ability to dispel anxiety in the terminally ill and its helpful effects on obsessive compulsive disorder, he examines the neurochemistry, psychology, and spirituality underlying the visionary psilocybin experience, revealing the interface where physical brain and conscious mind meet. Showing that the existence of life and the functioning of mind are the result of a naturally intelligent self-organizing Universe, he explains how sacred mushrooms provide a direct link to the wisdom of Nature and the meaning of life.

Neurons, Oxygen & Nanak Abhijit Naskar, One of twenty-first century's most influential minds in Brain Science investigates the molecular underpinnings of one of the youngest religions of the world, Sikhism. With the tools of modern Neuroscience at his disposal, Abhijit Naskar, a globally acclaimed author, delves deep into the neuronal basis of the origin of Sikhism. He coaxes us to look behind the curtain of a legendary divine experience that led to the rise of this less-known religion from India. In his peerlessly lucid explanatory ways, Naskar takes us inside the protoplasmic realm of the brain of Guru Nanak, the founding father of Sikhism, and reveals to us how a conscientious man from the 15th century stepped outside the primeval cocoon of religious orthodoxy in order to restore humanism in the heart of humanity.

Neurons, Oxygen, Nanak is the work of a twenty-first-century humanitarian thinker about another humanitarian thinker from the fifteenth century.

A Secret History of Consciousness Gary Lachman, 2003

For the last four centuries, science has tried to account for everything in terms of atoms and molecules and the physical laws they adhere to. Recently, this effort was extended to try to include the inner world of human beings. Gary Lachman argues that this view of consciousness is misguided and unfounded. He points to another approach to the study and exploration of consciousness that erupted into public awareness in the late 1800s. In this secret history of consciousness, consciousness is seen not as a result of neurons and molecules but as responsible for them; meaning is not imported from the outer world but rather creates it. In this view, consciousness is a living, evolving presence whose development can be traced through different historical periods and which evolves along a path to a broader, more expansive state. What that consciousness may be like and how it may be achieved is a major concern of this book. Lachman concentrates on the period since the late 1800s when Madame Blavatsky first brought the secret history out into the open. As this history unfolds, we encounter the ideas of many

modern thinkers from esotericists like P D Ouspensky Rudolf Steiner and Colin Wilson to more mainstream philosophers like Henri Bergson William James Owen Barfield and the psychologist Andreas Mavromatis Two little known but important thinkers play a major role in his synthesis Jurij Moskvitin who showed how our consciousness relates to the mechanisms of perception and to the external world and Jean Gebser who presented perhaps the most impressive case for the evolution of consciousness An important contribution to the study of consciousness a must read Contents Foreword by Colin Wilson Introduction Consciousness Explained The Search for Cosmic Consciousness Esoteric Evolution The Archaeology of Consciousness Participatory Epistemology The Presence of Origin Last Words Playing for Time Selected Bibliography A marvelously exhilarating gallop through every important modern theory of consciousness from Steiner to Maslow from Bucke s cosmic consciousness to Gebser s integral consciousness Colin Wilson author of *The Outsider* and *Access to Inner Worlds* Opens up vast vistas of possibility suggesting that what we experience as the earth may in itself be inseparable from our state of mind and that the evolution of human consciousness may be as fundamental a process as our development through genetics A must read for those seeking an escape from our contemporary culture s cul de sac Daniel Pinchbeck author of *Breaking Open the Head* Thinking outside the box Lachman challenges many contemporary theories by reinserting a sense of the spiritual back into the discussion Profoundly erudite yet easy to read this book is a provocative mind stretcher Leonard Shlain author of *Art Physics Alphabet* versus the Goddess and *Sex Time Power* *Shamans/Neo-Shamans* Robert J. Wallis, 2003-12-08 In popular culture such diverse characters as occultist Aleister Crowley Doors musician Jim Morrison and performance artist Joseph Beuys have been called shamans In anthropology on the other hand shamanism has associations with sorcery witchcraft and healing and archaeologists have suggested the meaning of prehistoric cave art lies with shamans and altered consciousness Robert J Wallis explores the interface between new and prehistoric shamans The book draws on interviews with a variety of practitioners particularly contemporary pagans in Britain and north America Wallis looks at historical and archaeological sources to explore contemporary pagan engagements with prehistoric sacred sites such as Stonehenge and Avebury and discusses the controversial use by neo Shamans of indigenous particularly native American shamanism **The Beauty of the Primitive** Andrei A. Znamenski, 2007-07-12 Publisher description **Testing the Canon of Ancient Near Eastern Art and Archaeology** Amy Gansell, Ann Shafer, 2020-01-06 Testing the Canon of Ancient Near Eastern Art and Archaeology invites readers to reconsider the contents and agendas of the art historical and world culture canons by looking at one of their most historically enduring components the art and archaeology of the ancient Near East Ann Shafer Amy Rebecca Gansell and other top researchers in the field examine and critique the formation and historical transformation of the ancient Near Eastern canon of art architecture and material culture Contributors flesh out the current boundaries of regional and typological sub canons analyze the technologies of canon production such as museum practices and classroom pedagogies and voice first hand heritage perspectives Each chapter thereby critically engages with

the historiography behind our approach to the Near East and proposes alternative constructs Collectively the essays confront and critique the ancient Near Eastern canon s present configuration and re imagine its future role in the canon of world art as a whole This expansive collection of essays covers the Near East s many regions eras and types of visual and archaeological materials offering specific and actionable proposals for its study Testing the Canon of Ancient Near Eastern Art and Archaeology stands as a vital benchmark and offers a collective path forward for the study and appreciation of Near Eastern cultural heritage This book acts as a model for similar inquiries across global art historical and archaeological fields and disciplines

A Transatlantic Political Theology of Psychedelic Aesthetics Roger K. Green, 2019-04-02 Arguing that we ought to look to psychedelic aesthetics of the 1960s in relation to current crises in liberal democracy this book emphasizes the intersection of European thought and the psychedelic The first half of the book focuses on philosophical influences of Herbert Marcuse and Antonin Artaud while the second half shifts toward literary and theoretical influences of Aldous Huxley on psychedelic aesthetics Framed within an emergent discourse of political theology it suggests that taking a postsecular approach to psychedelic aesthetics helps us understand deeper connections between aesthetics and politics
