Gerontology Judith E Phillips, Kristine J Ajrouch, Sarah Hillcoat-Nalletamby, 2010-03-18 Far from a dictionary the concepts are portrayed as complex and conflicting definitions and usages are both noted and evaluated Each article includes a necessarily selective set of references and cross references to other concepts included in the book Moreover the coverage and evaluation of the concepts is right at the current leading edge in a rapidly moving field Victor Marshall Department of Sociology and Institute on Aging University of North Carolina at Chapel Hill The concepts are very clear and very relevant and fantastic for my group of undergraduate students I found each concept to be succinctly and simply captured holding enough information to satisfy initial cravings and complex enough to tempt further reading I had originally thought that this book would provide supplementary reading as part of my Healthy Ageing course but have changed my mind to essential reading now I have had the opportunity to read the entire book Dr Meredith Tavenner Groningen University Social gerontology is a new and dynamic field reflecting the increasing interest in ageing across the world This book provides a readily accessible guide to well established and contested issues as well as new concepts emerging through cutting edge research in the discipline The entries give concise lucid knowledge on what constitutes the building blocks of social gerontology and sets out a clear review of the core concepts both classic and emerging in this subject area Each concept is explored in terms of its history application usefulness to theory and research and significance in practice They go beyond simple definitions of the concepts to look at how each issue has shaped the discipline of social gerontology today This book is authored by social gerontologists from the UK and the USA Together they present an interdisciplinary perspective and reflect a global approach to the presentation of key concepts in social gerontology

Biology of Aging Robert Arking, 2006-02-02 Robert Arking's Biology of Aging is an introductory text to the biology of aging which gives advanced undergraduate and graduate students a thorough review of the entire field The mass of data related to aging is summarized into fifteen focused chapters each dealing with some particular aspect of the problem His prior two editions have also served admirably as a reference text for clinicians and scientists This new edition captures the extraordinary recent advances in our knowledge of the ultimate and proximal mechanisms underlying the phenomenon of aging

Sociality, Hierarchy, Health National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, 2014-09-16 Sociality Hierarchy Health Comparative Biodemography is a collection of papers that examine cross species comparisons of social environments with a focus on social behaviors along with social hierarchies and connections to examine their effects on health longevity and life histories This report covers a broad spectrum of nonhuman animals exploring a variety of measures of position in social hierarchies and social networks drawing links among these factors to health outcomes and trajectories and comparing them to those in humans Sociality Hierarchy Health revisits both the theoretical underpinnings of biodemography and the empirical findings that have emerged over the past two decades

Chemically Modified Minds Matthew Hall, Mark Forshaw, Catharine Montgomery, 2020-10-30 This innovative edited collection brings together leading

international academics to explore the use of various non prescription and prescription substances From a psychosocial perspective the authors discuss the complex reasons behind their adoption the ways in which they are misused and links between use and cognitive enhancement While studies on substance use to date have examined the aetiology and effects in the context of sporting performance addiction and recreational use there has been little work which explores their wider misuse to improve cognitive enhancement With medical sociology and social psychology at its core this important volume shows the complex reasons behind the misuse of various substances how these are connected to contemporary desire for increased mental performance and why the potential health risks and possibly harmful side effects do not act as deterrents

A Public Health Perspective on End of Life Care

Joachim Cohen, Luc Deliens, 2012-01-19 Worldwide more than 50 million people die each year and it is estimated on the basis of the conditions leading to death that up to 60% of them could benefit from some form of palliative care It is a public health challenge to ensure that these people can access good palliative or end of life care Pursuing good population health essentially also implies striving for a good enough death and a good quality of care at the end of life Safeguarding a good quality of the end of life for patient populations for whom it is appropriate requires a public health approach In most developed countries ageing populations that increasingly die from chronic diseases after a prolonged often degenerative dying trajectory make up the public health challenges for palliative care The very large baby boom generation will soon reach old age and can be expected to pose strong demands regarding the circumstances and care at their end of life Only by applying a public health approach to palliative care instead of individual patient perspectives can societies successfully help to organize and plan end of life care in accordance with these aspirations A Public Health Perspective on End of Life Care presents a synthesis and overview of relevant research and empirical data on the end of life that can bear a basis for a more systematic public health of the end of life The book focuses on population health rather than clinical interventions or other aspects of individual health and discusses studies using different methodologies not only epidemiological research The focus is on the quality of the end of life of populations in particular from social sciences environmental sciences and humanities perspectives
