Wolfert, 2012-12-06 Rural areas need to fulfil a large variety of functions and to accommodate many activities The complexity of the problems limited funds and the almost irreversible character of some interventions result in a compelling need to evaluate ex ante the effects of alternative solutions for designation of land for measures to develop infrastructure and for soil and water management Scenario studies are undertaken to help manage the complexity to place bounds on uncertainties and to create new visions After an overview of the nature variety and scope of scenario studies the book illuminates various European examples and reviews under the following headings regional soil and water management nature development and landscape quality rural planning and the future of regions *The Future of Global Conflict* Volker Bornschier, Christopher Chase-Dunn, 1999-07-06 This critical analysis of long term trends and recent developments in world systems examines such questions as Will the cycles of boom and bust peace and war of the past 500 years continue Or have either long term trends or recent changes so profoundly altered the structure of world systems that these cycles will end or take on a less destructive form The noted international contributors to this volume examine the question of future dominance of the core global systems and include comprehensive discussions of the economic political and military role of the Pacific Rim Japan and the former Soviet Union

Long-term Prospects for the World Economy Organisation for Economic Co-operation and Development, 1992 *Economy—Energy—Environment Simulation* K. Uno, 2005-12-08 In the policy arena as well as in the academic world a new challenge is having to deal with the global community We are increasingly aware that the world is linked through economy energy environment interactions We are increasingly aware at the same time that the emergence of the global community does not imply an integrated harmonious world rather it is a community where countries regions of different interests and values face each other directly Global governance has to be achieved through actions of national governments under different motives and constraints We need to have an analytical tool that is capable of producing a global picture yet with detailed country resolution If the world is a better place now compared to 100 years ago in terms of per capita income this is due to the industrialization that continued throughout the 20th century We entered the 21st century knowing that the human aspiration that translates into ever increasing production may not be tenable in the long run Sustainability of the global community is at stake In contrast to incremental decision making through the market mechanism that should lead to some optimal state under some assumptions such as perfect knowledge smooth movement of resources no externalities and so forth we need to have an analytical tool to provide us with details of the future state of the world **Handbook of Public**

Foresight in Action Marjolein van Asselt, 2012-06-25 Assessing the future is vital in informing public policy decisions One of the most widespread approaches is the development of scenarios which are alternative hypothetical futures Research has indicated however that the reality of how professionals go about employing scenarios is often starkly at odds with the theory a finding that has important ramifications for how the resulting images of the future should be interpreted It also shows the need for rewriting and updating theory This book based on an intensive five year study of how experts actually go about assessing the future provides a groundbreaking examination of foresighting in action Obtained via ethnographic techniques the results lay bare for the first time the real processes by which scenarios are made It is also the first book to examine foresighting for public policy which is so often overlooked in favour of business practice From handling of discontinuity to historical determinism the analysis reveals and explains why foresight is difficult and what the major pitfalls are Each chapter ends with a toolkit of recommendations for practice The book aims to help readers to reflect on their own practices of public oriented foresight and thus to foster a deeper understanding of the key

principles and challenges Ultimately this will lead to better informed decision making **Perspectives on Uncertainty and Risk** Marjolein B.A. van Asselt, 2013-03-09 This volume is intended to stimulate a change in the practice of decision support advocating an interdisciplinary approach centred on both social and natural sciences both theory and practice It addresses the issue of analysis and management of uncertainty and risk in decision support corresponding to the aims of Integrated Assessment A pluralistic method is necessary to account for legitimate plural interpretations of uncertainty and multiple risk perceptions A wide range of methods and tools is presented to contribute to adequate and effective pluralistic uncertainty management and risk analysis in decision support endeavours Special attention is given to the development of one such approach the Pluralistic fRamework for Integrated uncertainty Management and risk Analysis PRIMA of which the practical value is explored in the context of the Environmental Outlooks produced by the Dutch Institute for Public Health and Environment RIVM Audience This book will be of interest to researchers and practitioners whose work involves decision support uncertainty management risk analysis environmental planning and Integrated Assessment The Future of Medicines in Health Care Steering Committee on Future Health Scenarios, 1995-07-31 The future place of medicines in health care is both exciting and uncertain With an aging population an increasing number of chronic sick a growing range of treatment options and a developing European market the one certainty is that medication patterns will change radically over the next 15 years or so How the future might look in terms of quality volume and cost of pharmacotherapy is the subject of this report Four scenarios for the future are set out all of which take account of already visible trends Sobriety in sufficiency envisages rational and restrained consumption patterns Risk of avoidance is dominated by fears of iatrogenic harm and hence minimal drug use The central feature of Technology on demand in contrast is confidence in technological progress Free market unfettered finally is marked by a Europe without frontiers and minimal state intervention The reader is encouraged to reflect without preconceptions on the future of medicines in health care No ready made answers are offered rather a wealth of information and analysis is provided which serves to underpin decision making and policy development not just by central government but also by every institution concerned with the role of medicines in health care
