Sustainable Work Ability and Aging Clas-Håkan Nygård,2020-02-13 In many industrialized countries there is a sharp increase of the aging population due to a decrease in fertility rate and an increase in life expectancy Due to which the age dependency ratio rises and may cause increased economic burden among working age population One strategy to combat this problem is to prolong peoples working career A sufficient work ability is a requirement for a sustainable and prolonged employment Work ability is primarily a question of balance between work and personal resources Personal resources change

with age whereas work demands may not change parallel to that or only change due to globalization or new technology Work ability on average decreases with age although several different work ability pathways exist during the life course Work related factors as well as general lifestyle may explain the declines and improvements in work ability during aging A sustainable work ability throughout the life course is a main incentive for a prolonged working career and a healthy aging Work ability and work related factors are therefore important occupational and public health issues when the age of the population increases This Special Issue Sustainable Work Ability and Aging includes in all 16 original articles and one opinion paper organized in three sections The research topics cover wide aspects of work ability from determinants older employees coping with their work methodological issues as well as results of interventions on promoting work ability Bibliography of Agriculture ,1971 Current Bibliographies in Medicine ,1988 Research in Education ,1973 **The Air Force Comptroller** ,1977 *Looking Ahead* ,1996-01 Produced by a task group of teachers and careers advisors in East Sussex as part of the Year 9 10 Careers Guidance Initiative and trialled in schools this pack for Year 9 contains material on a range of activities The pack covers the following areas finding out about yourself helps students to develop a greater self awareness analyze their skills qualities and interests and plan for change in the future making decisions helps the students develop the skills to make effective decisions using your careers library helps students develop the skills to use the range of careers information options helps students consider and make choices and become aware of the implications of choice and widening horizons helps students to look at their perceptions of work explore gender stereotyping and increase awareness of part time work *Factors and Health Outcomes of Job Burnout* Angela Stufano, Luigi Vimercati, John Koku Awoonor-Williams, 2022-12-02 Sustainable Development Goals Saravanan Krishnan, A. Jose Anand, Raghvendra Kumar, 2024-11-07 Sustainable Development Goals SDGs are goals set by the United Nations to address the global challenges and foster sustainable development and harmony To effectively achieve these goals leveraging advanced technologies and engineering techniques is paramount This edited volume explores the pivotal role of technology and engineering in advancing the SDGs across various sectors such as green energy water management healthcare agriculture and smart manufacturing From innovative solutions in clean energy production to precision agriculture and smart cities technological advancements offer scalable and efficient approaches to tackle complex sustainability issues **Individual and Organizational Vulnerability and Resilience Factors in the COVID-19 Pandemic** Barbara Hildegard Juen, Eva-Maria Kern, Sigridur Thormar, 2023-10-23 Vulnerability and resilience are concepts that have long been treated as individual and contradicting topics In recent times we have seen that vulnerabilities and resilience can go hand in hand and that vulnerabilities cannot be conceptualized only in simple terms because intersectionality must be considered as well as social organizational and systemic aspects and processes One example is that women are more vulnerable higher values in nearly all stress related measures in the COVID 19 pandemic This finding has to be analyzed from an intersectional perspective

because socio economic factors cultural factors exposure to COVID 19 and the type of occupation e g healthcare sector frontline workers play an important role in how vulnerable or resilient women can be in a given society The large number of studies on COVID 19 vulnerabilities makes it necessary to take a closer look at the resilience factors that often go hand in hand with potential vulnerabilities As we see in the literature about pandemics in general and COVID 19 there are some individual organizational and systemic vulnerabilities that can be found in all pandemics From that we can assume that there will be resilience factors within the same concepts that may buffer vulnerabilities
