Looseleaf Textbook Financial Accounting:

Looseleaf Textbook, Financial Accounting, 2005-07 **Loose Leaf for Financial Accounting** Patricia Libby, Robert Libby, Frank Hodge, 2022-01-21 Libby Libby Hodge wrote this text based on their belief that the subject of financial accounting is inherently interesting but financial accounting textbooks are often not. They believe that accounting is an exciting field of study and one that is important to future careers in business. When writing this text they considered career relevance as their guide when selecting material and the need to engage the student as their guide to style pedagogy and design. Financial Accounting 11e successfully implements a real world single focus company approach in every chapter. The companies chosen are engaging and the decision making focus shows the relevance of financial accounting regardless of if a student has chosen to major in accounting. Libby Libby Hodge believes in the building block approach to teaching transaction analysis. Most faculty agree that mastery of the accounting cycle is critical to success in financial accounting and yet most financial texts introduce and develop transaction analysis in one chapter bombarding a student early in the course with an overload of new concepts and terms. The authors slow down the introduction of transactions giving students time to practice and gain mastery. This building block approach leads to greater student success in their study of later topics in financial accounting such as adjusting entries.

LOOSE LEAF FOR FINANCIAL ACCOUNTING Patricia Libby, Daniel G Short, Robert Libby, 2013-07-01 Libby Libby Short wrote this text based on their belief that the subject of financial accounting is inherently interesting but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text they considered career relevance as their guide when selecting material and the need to engage the student as their guide to style pedagogy and design. Libby Libby Short successfully implements a real world single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real world financial statements. The companies chosen are engaging and the decision making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting. Libby Libby Short believes in the building block approach to teaching transaction analysis. Most faculty agree that mastery of the accounting cycle is critical to success in financial accounting. And yet all other financial books introduce and develop transaction analysis in one chapter bombarding a student early in the course with an overload of new concepts and terms. The authors believe that most faculty take more time with the accounting cycle but other financial accounting textbooks don't. By slowing down the introduction of transactions and giving students time to practice and gain mastery this building block approach leads to greater student success in their study of later topics in financial accounting such as adjusting entries.
