Nation In The Village:

The Nation in the Village Keely Stauter-Halsted, 2015-09-25 How do peasants come to think of themselves as members of a nation The widely accepted argument is that national sentiment originates among intellectuals or urban middle classes then trickles down to the working class and peasants Keely Stauter Halsted argues that such models overlook the independent contribution of peasant societies She explores the complex case of the Polish peasants of Austrian Galicia from the 1848 emancipation of the serfs to the eve of the First World War In the years immediately after emancipation Polish speaking peasants were more apt to identify with the Austrian Emperor and the Catholic Church than with their Polish lords or the middle classes of the Galician capital Cracow Yet by the end of the century Polish speaking peasants would cheer Long live Poland and celebrate the centennial of the peasant fueled insurrection in defense of Polish independence The explanation for this shift Stauter Halsted says is the symbiosis that developed between peasant elites and upper class reformers She reconstructs this difficult halting process paying particular attention to public life and conflicts within the rural communities themselves The author s approach is at once comparative and interdisciplinary drawing from literature on national identity formation in Latin America China and Western Europe The Nation in the Village combines anthropology sociology and literary criticism with economic social cultural and political history The Nation in the Village Keely
