International Organizations and Post-Soviet Conflicts in Georgia, Moldova, and Ukraine Nina Lutterjohann,2024-08-06 International Organizations and Post Soviet Conflicts in Georgia Moldova and Ukraine The Limitations of Imagining Peace and the Failure and Success in Negotiations addresses the protracted history of international conflict resolution efforts to the Georgian Abkhaz Moldovan Transnistrian and Eastern Ukraine conflicts The author explores the origins and onset of these first two conflicts in the early 1990s but also looks at the eruption of conflict in Eastern Ukraine in 2014 and at the first months after the Russian invasion of Ukraine in 2022 This book shows how from a conflict transformation perspective local vested interests and strategic interests have created obvious obstructions that have both fueled the conflicts and prevented their resolution This volume develops a comprehensive theoretical framework for understanding the success and failure of international engagement that offers a new understanding of the extent to which international responses may or may not be helpful Through an analysis of over 500 closed source documents and about 70 interviews the efforts of pan European international organizations with mandates from the OSCE EU UN and NATO are examined on both political and cultural levels This work s innovative analyses of those institutions performances shows how successes have often been overlooked and identifies misperceptions that reshape our understanding of the limitations to imagining peace

Diasporas and Transportation of Homeland Conflicts Élise Féron,Bahar Baser,2024-05-07 This book explores the transformation and reinvention of conflict generated diaspora groups politics in countries of residence Numerous narratives

link diasporas and conflicts diasporas are seen alternatively as peace wreckers or peace makers as products of forced migration related to conflicts or as targets of securitization policies Transported conflicts occurring within and between diasporas in their countries of residence however remain relatively underexplored tend to be misunderstood and often associated with criminal or terrorist activities The chapters in this volume draw our attention to various interconnected temporalities explaining patterns of conflict transportation such as the temps long of diasporic mobilisation the here and now of what is happening in both host and home countries and micro temporalities and diasporans life trajectories Finally the contributions demonstrate that patterns shapes and even occurrence of conflict transportation vary according to scale and space Highly politicized forms of confrontation are not necessarily representative of everyday interactions between diaspora groups which can entail discrete but tangible forms of cooperation and even solidarity This edited volume calls for nuancing our approach to the links between diasporas and conflicts to avoid falling into the essentialisation trap The chapters in this book were originally published in *Ethnopolitics* Complexity Science and World Affairs Walter C. Clemens Jr., 2013-12-01 Applies complexity science to the study of international politics Why did some countries transition peacefully from communist rule to political freedom and market economies while others did not Why did the United States enjoy a brief moment as the sole remaining superpower and then lose power and influence across the board What are the prospects for China the main challenger to American hegemony In *Complexity Science and World Affairs* Walter C Clemens Jr demonstrates how the basic concepts of complexity science can broaden and deepen the insights gained by other approaches to the study of world affairs He argues that societal fitness the ability of a social system to cope with complex challenges and opportunities hinges heavily on the values and way of life of each society and serves to explain why some societies gain and others lose Applying theory to several rich case studies including political developments across post Soviet Eurasia and the United States Clemens shows that complexity science offers a powerful set of tools for advancing the study of international relations comparative government and more broadly the social sciences Clemens has written an outstanding book the culmination of a half century s experience in and analysis of world affairs It is bound to interest not only political and other social scientists but all thoughtful persons concerned with understanding and perhaps improving the human condition from the Foreword by Stuart A Kauffman This breakthrough book provides a new promising general paradigm exploring and explaining the complexity of world politics For scholars and analysts pushing the boundaries of our field this is a must read volume Jacek Kugler Claremont Graduate University Complexity can be overwhelming and complexity science can be daunting and yet in Walter Clemens s skilled hands both become accessible understandable and useful tools for both scholars and practitioners Once again Clemens has shown that sophisticated academic theorizing only benefits from clarity elegance and wit The book is ideal for graduate and undergraduate students as a supplementary text in international relations or comparative politics Alexander Motyl Rutgers University Newark Clemens offers a fresh even startling paradigm and process for analyzing the seemingly

unpredictable relations within and among human societies With impressive clarity he proposes that the capacity to cope with complexity has become a key determinant of success in our intricately interrelated world Careful study of this capacity in specific contexts can lead to revealing analyses in comparative politics and international relations A provocative and stimulating treatise S Frederick Starr Johns Hopkins University Walt Clemens s provocative new book can be appreciated at several levels as an analytical framework in international relations complexity science that offers a compelling alternative to realism and neoliberalism as an incisive critique of the fitness of the supposedly most developed societies to deal with our complex world and as a humanistic value set that provides better standards for assessing governments than do GDP trade levels or military spending Clemens skillfully integrates theory and practice to explore US hyperpower the two Koreas China and other states from new angles and with consistent objectivity IR specialists should find this book exciting while IR and international studies students will be challenged by the new paradigm it presents Mel Gurtov Portland State University Clemens proposes a powerful new way of looking at international relations and politics and offers a productive method for assessing the fitness of societies in the early twenty first century Guntis midchens University of Washington Seattle You don t have to be a political scientist to wonder why some states succeed and others do not why some societies flourish while others suffer stagnation and conflict Employing the relatively new tool of complexity science Walter Clemens evaluates the fitness of states and societies i e their ability to cope with complex challenges and opportunities He does so in a way that is erudite how many studies quote Walt Whitman and Karl Marx in the same chapter yet clear and accessible Clemens challenges both existing political science paradigms and policy perspectives This is a stimulating rich volume that can be read and re read with profit and appreciation for its breadth and depth and most of all for its insistence that we see the world and the states in it in all their complexity Ronald H Linden University of Pittsburgh *Geopolitics Reframed* M. Kuus, 2007-08-06 This book traces the shifting meanings of security and geopolitics in Central European states that acceded into the EU or NATO in 2004 The author examines assumptions that shaped these debates and influenced policy making combining fresh theoretical approaches from international relations and political geography with rich empirical material from Central Europe This book provides the first in depth analysis of security discourse in the region
