Development Indicators WDI is the World Bank's annual compilation of data about development. This statistical work allows readers to consult over 800 indicators for more than 150 economies and 14 country groups in more than 90 tables. It provides a current overview of regional data and income group analysis in six thematic sections: World View, People, Environment, Economy, States and Markets, and Global Links. This book presents current and accurate development data on both a national level and aggregated globally. It allows readers to monitor the progress made toward meeting the Millennium Development Goals endorsed by the United Nations and its member countries, the World Bank, and a host of partner organizations. These goals, which focus on development and the elimination of poverty, serve as the agenda for international development efforts. The CD-ROM contains time series data for more than 200 economies from 1960-2009, single year observations, and spreadsheets on many topics. It contains more than 1,000 country tables and the text from the WDI 2010 print edition. The Windows-based format permits users to search for and retrieve data in spreadsheet form, create maps and charts, and fully download them into other software programs for study or presentation purposes.

The Asymmetries of Globalization Pan Yotopoulos, Donato

Romano, 2007-01-24. The discourse on globalization has become polarized. Proponents consider globalization as the silver bullet for targeting growth in the world economy and for poor countries specifically, while opponents see it as the poisoned arrow of exploitation and impoverishment of the Third World. Splendidly edited, *The Asymmetries of Globalization* deals with the what and how but primarily with why globalization has most often negative outcomes for developing countries. It breaks new ground in approaching globalization not only as trade in commodities but also as trade in positional goods, decommodified trade. The two novel and munificent forms of post-Ricardian decommodified trade—trade in services and trade in hard currency in the form of currency substitution—are sculpted in the introductory chapter as the foundation of the systematic asymmetries of globalization. The analytical approach of introducing positional goods in the form of decommodified trade in the discourse on globalization is original. It is also timely in a situation where the tail of trade in services has grown enough to wag the traditional trade in commodities dog of globalization. The balance of the chapters in this volume constitute a tapestry of case studies that elaborate and empirically investigate the causes of systematic asymmetries of globalization. The book's appeal transcends economics to make it also highly useful to students across the disciplines of sociology and political science, especially in the fields of international political economy and the politics of international trade. It will certainly enlighten all those working in the general areas of globalization, poverty, and economic development.

The Unmaking of Arab Socialism Ali Kadri, 2016-10-01 Conditions of malnutrition conflict or a combination of both characterize many Arab countries but this was not always so As in much of the developing world the immediate post independence period represented an age of hope and relative prosperity But imperialism did not sleep while these countries developed and it soon intervened to destroy these post independence achievements The two principal defeats and losses of territory to Israel in 1967 and 1973 as well as the others that followed left in their wake more than the destruction of assets and the loss of human lives the Arab World lost its ideology of resistance The Unmaking of Arab Socialism is an attempt to understand the reasons for Arab world's developmental descent from the pinnacle of Arab socialism to its present desolate conditions through an examination of the post colonial histories of Egypt Syria and Iraq
