National Civic Review No 2 Summer 2005:

National Civic Review, No. 2, Summer 2005 National Civic Review, 2005-06-23 The PerformanceStat Potential
Robert D. Behn, 2014-06-24 It started two decades ago with CompStat in the New York City Police Department and quickly jumped to police agencies across the U S and other nations It was adapted by Baltimore which created CitiStat the first application of this leadership strategy to an entire jurisdiction Today governments at all levels employ PerformanceStat a focused effort by public executives to exploit the power of purpose and motivation responsibility and discretion data and meetings analysis and learning feedback and follow up all to improve government s performance Here Harvard leadership and management guru Robert Behn analyzes the leadership behaviors at the core of PerformanceStat to identify how they work to produce results He examines how the leaders of a variety of public organizations employ the strategy the way the Los Angeles County Department of Public Social Services uses its DPSSTATS to promote economic independence how the City of New Orleans uses its BlightStat to eradicate blight in city neighborhoods and what the Federal Emergency Management Agency does with its FEMASStat to ensure that the lessons from each crisis response recovery and mitigation are applied in the future How best to harness the strategy s full capacity The PerformanceStat Potential explains all

Reinventing Los Angeles Robert Gottlieb, 2007-10-12 Describes how water politics cars and freeways and immigration and globalization have shaped Los Angeles and how innovative social movements are working to make a more livable and sustainable city Los Angeles the place without a sense of place famous for sprawl and overdevelopment and defined by its car clogged freeways might seem inhospitable to ideas about connecting with nature and community But in Reinventing Los Angeles educator and activist Robert Gottlieb describes how imaginative and innovative social movements have coalesced around the issues of water development cars and freeways and land use to create a more livable and sustainable city Gottlieb traces the emergence of Los Angeles as a global city in the twentieth century and describes its continuing evolution today He examines the powerful influences of immigration and economic globalization as they intersect with changes in the politics of water transportation and land use and illustrates each of these core concerns with an account of grass roots and activist responses efforts to reenvision the concrete bound fenced off Los Angeles River as a natural resource Arroyofest the closing of the Pasadena Freeway for a Sunday of walking and bike riding and immigrants initiatives to create urban gardens and connect with their countries of origin Reinventing Los Angeles is a unique blend of personal narrative Gottlieb himself participated in several of the grass roots actions described in the book and historical and theoretical discussion It provides a road map for a new environmentalism of everyday life demonstrating the opportunities for renewal in a global city

Communication and Conflict Transformation through Local, Regional, and Global Engagement Peter M. Kellett, Thomas G. Matyók, 2016-12-13 Central to a transformational approach to conflict is the idea that conflicts must be viewed as embedded within broader relational patterns and social and discursive structures and must be addressed as such

This implies the need for systemic change at generative levels in order to create genuine transformation at the level of particular conflicts. Central also to this book is the idea that the origins of transformation can be momentary or situational, small scale or micro level as well as bigger and more systemic or macro level. Micro level changes involve shifts and meaningful changes in communication and related patterns that are created in communication between people. Such transformative changes can radiate out into more systemic levels and systemic transformative changes can radiate inwards to more micro levels. This book engages this transformative framework. Within this framework, this book pulls together current work that epitomizes and highlights the contribution of communication scholarship and communication centered approaches to conflict transformation in local community, regional, environmental and global conflicts in various parts of the world. The resulting volume presents an engaging mix of scholarly chapters, think pieces and experiences from the field of practice. The book embraces a wide variety of theoretical and methodological approaches as well as transformative techniques and processes including narrative, dialogic, critical cultural, linguistic, conversation analytic, discourse analytic and rhetorical. This book makes a valuable contribution to the ongoing dialogue across and between disciplines and people on how to transform conflicts creatively, sustainably and ethically.

Capitalizing on Environmental Injustice Daniel Faber, 2008-07-17 *Capitalizing on Environmental Injustice* provides a comprehensive overview of the achievements and challenges confronting the environmental justice movement. Pressured by increased international competition and the demand for higher profits, industrial and political leaders are working to weaken many of America's most essential environmental, occupational and consumer protection laws. In addition, corporate led globalization exports many ecological hazards abroad. The result is a deepening of the ecological crisis in both the United States and the Global South. However, not all people are impacted equally. In this process of capital restructuring, it is the most marginalized segments of society, poor people of color and the working class that suffer the greatest force of corporate environmental abuses. Daniel Faber, a leading environmental sociologist, analyzes the global political and economic forces that create these environmental injustices. With a multi disciplinary approach, Faber presents both broad overviews and powerful insider case studies examining the connections between many different struggles for change. *Capitalizing on Environmental Injustice* explores compelling movements to challenge the polluter industrial complex and bring about meaningful social transformation.

The Change Handbook (Volume 1 of 2) (EasyRead Edition), *The Education Mayor* Kenneth K. Wong, Francis X. Shen, Dorothea Anagnostopoulos, Stacey Rutledge, 2007-10-22 In 2002 the No Child Left Behind Act rocked America's schools with new initiatives for results based accountability. But years before NCLB was signed, a new movement was already under way by mayors to take control of city schools from school boards and integrate the management of public education with the overall governing of the city. *The Education Mayor* is a critical look at mayoral control of urban school districts, beginning with Boston's schools in 1992 and examining more than 100 school districts in 40 states. The authors seek to answer four central

questions What does school governance look like under mayoral leadership How does mayoral control affect school and student performance What are the key factors for success or failure of integrated governance How does mayoral control effect practical changes in schools and classrooms The results of their examination indicate that although mayoral control of schools may not be appropriate for every district it can successfully emphasize accountability across the education system providing more leverage for each school district to strengthen its educational infrastructure and improve student performance Based on extensive quantitative data as well as case studies this analytical study provides a balanced look at America s education reform As the first multidistrict empirical examination and most comprehensive overall evaluation of mayoral school reform The Education Mayor is a must read for academics policymakers educational administrators and civic and political leaders concerned about public education

Civil Society and the Reform of Finance Charles McDaniel, Jr.,2015-07-16 Efforts to resolve the recent financial crisis have obscured a more deeply rooted financialization crisis that impacts not only the market economy but also the vital civic and moral traditions that support it This book reveals the cultural influence of finance in reshaping the foundations of American civil society and proposes a return to certain first principles of the Republic to restore the nation s economic vision This book demonstrates how funding concerns and financial incentives revalue faith traditions educational institutions non profit organizations and even the nation s healthcare system in ways that are eroding the diversity of American culture These changes also undermine the ethical framework of both democratic government and the free market system While financial influence has diminished the value of civil society this book proposes that revitalized intermediary institutions still offer the best path forward in restoring the financial sector and more broadly enriching the American competitive ethic toward development of a more virtuous economy The book is written for an academic and professional audience offering a blueprint for the involvement of civil society with government in providing more communally integrated oversight that could contribute to a genuine democratization of finance

The Change Handbook Peggy Holman,2009-06-24 This book is about effective change It describes methods for changing whole systems that is change based on two powerful foundation assumptions high involvement and a systemic approach to improvement High involvement means engaging the people in changing their own system It is systemic because there is a conscious choice to include the people functions and ideas that can affect or be affected by the work Whole system change methods help you initiate high leverage sustainable improvements in organizations or communities High leverage is emphasized because in any improvement effort we want the highest possible value for the effort invested We believe that involving people in a systematic way is a key to high leverage and that the methods in this book can provide this leverage for you You ll need to determine the one s best suited to moving your organization or community to the culture you want We wrote this book to support your efforts The book is intended to answer questions such as What methods are available that have proven successful in addressing today s needs for organizational or community change What are the key distinctions

among these methods How do I know if a method would be a good fit for my organization or community How do I get started after I select one or more methods To make a good choice you ll need some basic information Rather than provide details of how to do each method we give you an overview of what s available and some tools to help focus your exploration Urban Politics Bernard H. Ross, Myron A. Levine, 2011-08-10 This popular text mixes the best classic theory and research on urban politics with the most recent developments in urban and metropolitan affairs Its very balanced and realistic approach helps students to understand the nature of urban politics and the difficulty of finding effective solutions in a suburban and global age The eighth edition provides a comprehensive review and analysis of urban policy under the Obama administration and brand new coverage of sustainable urban development A new chapter on globalization and its impact on cities brings the history of urban development up to date and a focus on the politics of local economic development underscores how questions of economic development have come to dominate the local arena The book traces the changing style of community participation including the emergence of CDCs BIDs and other new style service organizations It analyzes the impacts of the New Regionalism the New Urbanism and much more at an approachable level The eighth edition is significantly shorter and more affordable than previous editions and the entire text has been thoroughly rewritten to engage students Boxed case studies of prominent recent and current urban development efforts provide material for class discussion and concluding material demonstrates the tradeoff between more ideal and more pragmatic urban politics Source material provides Internet addresses for further research
