Security Strategies of Small States in a Changing World

DOI 10.1515/jobs-2017-0006

received November 1, 2017; accepted November 16, 2017.

Abstract: How are small states adjusting to a changing security environment and managing tensions with greater powers in their neighbourhood? Much of the recent literature on small states spends a great deal of time examining challenges to small states and their security policies. Scholars offer several strategies that small states can employ to adjust to a changing security landscape. Small states have two broad options – to focus on their own defence posture, trying to keep their autonomy and stay neutral, or use different cooperative schemes – bandwagon with larger powers, form alliances against dominant powers, or seek shelter and develop hedging strategies. This article reviews survival strategies employed by small states and provides a basis to better understand the behaviour of small states in today's contested security environment.

Keywords: small state, security strategies, alliance, neutrality, autonomy, influence, hedging.

1 Introduction

The question of what strategies small states tend to employ to navigate the international system has been widely debated since the end of the Cold War. Changes in the international system following the dissolution of the Soviet Union resulted in the creation of many independent states that have become new players in international relations. A growing number of small states have generated an increased interest in the foreign policy behaviour of small states and their capacity to adapt to an evolving geopolitical landscape. Since the end of the Cold War, small states in central and eastern Europe have enjoyed peace and stability, as there has been no fear of invasion or extinction. Growing interdependence and the transformed geopolitical environment have reduced the risk of military incursions and widened the room to manoeuvre in terms of foreign policy for small states. With the growing importance of international organizations, small states have also gained new opportunities to exercise their influence and act more independently in the international arena.

However, the last three years have been a turbulent period in international politics. Russia's burgeoning assertiveness and annexation of Crimea, the first change by force of Europe's borders in decades, has refocused attention on traditional security concerns. Small European states have started reassessing their security strategies as they have once again found themselves facing a fundamentally altered strategic environment. To respond to emerging challenges, small European states in the Baltic Sea region and Central Europe have begun reviewing their security policies and adopting new measures to tackle emerging insecurities.
