National Security Strategy Of Engagement And Enlargement 1994:

America's Strategic Choices, revised edition Michael E. Brown, Owen R. Cote, Jr., Sean M. Lynn-Jones, Steven E. Miller, 2000-07-18 Contending perspectives on the future of US grand strategy More than a decade has passed since the end of the Cold War but the United States has yet to reach a consensus on a coherent approach to the international use of American power The essays in this volume present contending perspectives on the future of U S grand strategy U S policy options include primacy cooperative security selective engagement and retrenchment This revised edition includes additional and more recent analysis and advocacy of these options The volume includes the Clinton administration s National Security Strategy for a New Century the most recent official statement of American grand strategy so readers can compare proposed strategies with the official U S government position The Challenges of the U. S. -Japan Military Arrangement Anthony DiFilippo, 2002 This is an in depth analysis of the U S Japan security alliance and its implications for Japan and the Asia Pacific region It moves away from the official line that the alliance is a vital aspect of Japan s security policy and introduces issues and arguments that are often overlooked American security policy has failed to achieve its goals Japan s interests are not fully served by the alliance the alliance itself is a source of instability in the region and the arrangement has placed constraints on Japan s own political development The author measures current developments in U S foreign policy against Japan s role in the region and Japan s own political development He assesses the consequences of the alliance for the current regional situation in Northeast Asia looks at future policy options for Japan and makes the case for a neutralist security policy

interviews by the author with key members of the Clinton administration to reveal for the first time the development and implementation of US Grand Strategy from deep within the West Wing of the Clinton White House Proceedings of the Ninth Conference of the European Society for Central Asian Studies Tomasz Gacek, Jadwiga Pstrusińska, 2009-10-02 This is an important book which will greatly aid readers in their knowledge of Central Asia one of the crucial regions in the contemporary world It contains papers reflecting the interdisciplinary quality of recent research carried out in many academic institutions dealing with the region In this volume which undertakes the supreme challenge of understanding this vast area of Eurasia acknowledged experts offer their findings on such important topics as history archaeology sociology anthropology language literature religion philosophy civil society and human rights political science economics and the environment This collection undoubtedly constitutes a key gateway to study of the region through the advanced accurate and scholarly information required by contemporary academia **Faith and Fear** Gregory A. Daddis, 2025 In a groundbreaking reassessment of the long Cold War era historian Gregory A Daddis argues that ever since the Second World War's fateful conclusion faith in and fear of war became central to Americans thinking about the world around them With war pervading nearly all aspects of American society an interplay between blind faith and existential fear framed US policymaking and grand strategy often with tragic results A sweeping history Faith and Fear makes a forceful argument by examining the tensions between Americans overreaching faith in war as a foreign policy tool and their overwhelming fear of war as a destructive force Maritime Power and the Law of the Sea James Kraska, 2011 In Maritime Power and the Law of the Sea Expeditionary Operations in World Politics Commander James Kraska analyzes the evolving rules governing freedom of the seas and their impact on expeditionary operations in the littoral near shore coastal zone Coastal state practice and international law are developing in ways that restrict naval access to the littorals and associated coastal communities and inshore regions that have become the fulcrum of world geopolitics Consequently the ability of naval forces to project expeditionary power throughout semi enclosed seas exclusive economic zones EEZs and along the important sea shore interface is diminishing and as a result limiting strategic access and freedom of action where it is most needed Commander Kraska describes how control of the global commons coupled with new approaches to sea power and expeditionary force projection has given the United States and its allies the ability to assert overwhelming sea power to nearly any area of the globe But as the law of the sea gravitates away from a classic liberal order of the oceans naval forces are finding it more challenging to accomplish the spectrum of maritime missions in the coastal littorals including forward presence power projection deterrence humanitarian assistance and sea control The developing legal order of the oceans fuses diplomacy strategy and international law to directly challenge unimpeded access to coastal areas with profound implications for American grand strategy and world politics Seeing the Elephant Hans Binnendijk, Richard L. Kugler, 2006-11 An intellectual history of the post Cold War period US Naval Strategy and National Security Sebastian Bruns, 2017-09-22

This book examines US naval strategy and the role of American seapower over three decades from the late 20th century to the early 21st century. This study uses the concept of seapower as a framework to explain the military and political application of sea power and naval force for the United States of America. It addresses the context in which strategy and in particular US naval strategy and naval power evolves and how US naval strategy was developed and framed in the international and national security contexts. It explains what drove and what constrained US naval strategy and examines selected instances where American sea power was directed in support of US defense and security policy ends and whether that could be tied to what a given strategy proposed. The work utilizes naval capstone documents in the framework of broader maritime conceptual and geopolitical thinking and discusses whether these documents had lasting influences in the strategic mind set the force structure and other areas of American sea power. Overall this work provides a deeper understanding of the crafting of US naval strategy since the final decade of the Cold War its contextual and structural framework setting and its application. To that end the work bridges the gap between the thinking of American naval officers and planners on the one hand and academic analyses of Navy strategy on the other hand. It also presents the trends in the use of naval force for foreign policy objectives and into strategy making in the American policy context. This book will be of much interest to students of naval power maritime strategy US national security and international relations in general. **Defense**, 1994
