Nations At War A Scientific Study Of International Conflict:

Nations at War Daniel S. Geller, J. David Singer, 1998-02-13 *Nations at War* provides an explanation of war in international politics grounded on data based empirical research The book classifies and synthesizes the research findings of over 500 quantitative analyses of war at the analytic level of the state dyad region and international system Because wars follow from political decisions two basic decision making models the rational and the non rational are examined in relation to the explanatory framework of the volume In addition case analyses of two wars the Iran Iraq War 1980 and World War I 1914 are provided as demonstrations of scientifically based explanations of historical events The primary structural factors responsible for the onset and seriousness of war are identified and the explanations are developed according to the scientific model of covering laws The conclusion presents a discussion of the potential for probabilistic conditional predictions of conflict within the context of war and peace studies

Nations at War Daniel S. Geller, J. David Singer, 1998-02-19 *Nations at War* provides a scientifically derived explanation of war It develops this explanation by reviewing data based studies of international conflict analyzing war from the fifteenth to the twentieth centuries and identifying factors such as geography regimes military capabilities alliances and trade associated with both the onset and destructiveness of these conflicts Two wars the Iran Iraq war of 1980 and World War I are examined in detail in an effort to show how wars begin and sometimes expand to include other states This unique book collates and synthesizes the findings of over five hundred scientific studies of war

Guide to the Scientific Study of International Processes Sara McLaughlin Mitchell, Paul F. Diehl, James D. Morrow, 2012-07-17 Dedicated to the empirical analysis of data from the world of international relations SSIP scholars tend to focus on interstate conflicts civil wars and conflict management The range of perspectives in this edited volume provide a comprehensive introduction to SSIP theory and methodology Fresh approach traces intellectual development of research approaches rather than merely summarizing results Features original SSIP material not found in other books Includes a number of essays with a broader assessment of SSIP methods ideal for younger scholars interested in the approach Includes recent SSIP analyses exploring issues such as civil wars

National and International Conflicts, 1945-1995 Frank R. Pfetsch, Christoph Rohloff, 2013-10-11 The information flow about crises and conflicts is highly selective the media only focus on a few major conflicts at a time Many conflicts are neglected others soon forgotten after the fighting ends This book fills the gaps and offers a systematic overview of all crises and conflicts in and among states since 1945 and traces the global trends of conflict development Based on the broad empirical basis of the Conflict Simulation Model KOSIMO Pfetsch and Rohloff use an integrated approach to cover many forms and types of political conflicts both peaceful and violent

International and Regional Security Benjamin Miller, 2016-11-10 This volume is a collection of the best essays of Professor Benjamin Miller on the subjects of international and regional security The book analyses the interrelationships between international politics and regional and national security with a special focus on the sources of international conflict

and collaboration and the causes of war and peace More specifically it explains the sources of intended and unintended great power conflict and collaboration The book also accounts for the sources of regional war and peace by developing the concept of the state to nation balance Thus the volume is able to explain the variations in the outcomes of great power interventions and the differences in the level and type of war and peace in different eras and various parts of the world For example the book's model can account for recent outcomes such as the effects of the 2003 American intervention in Iraq the post 2011 Arab Spring and the conflicts between Russia and Ukraine The book also provides a model for explaining the changes in American grand strategy with a special focus on accounting for the causes of the invasion of Iraq in 2003 Finally the book addresses the debate on the future of war and peace in the 21st century This book will be essential reading for students of international security regional security Middle Eastern politics foreign policy and IR

International Relations and Scientific Progress Patrick James, 2002 International Relations and Scientific Progress contends that a theory focusing on the structure of the international system explains a wider and more interesting range of events in world politics than other theories Such theorizing appears to be out of favor as the result of the apparent failure by structural realism the most prominent system level theory over the last two decades on any number of fronts most notably an inability to anticipate the ending of the Cold War and its aftermath This new book is put forward as the most comprehensive and innovative theoretical work on paradigms in international relations since the publication of Theory of International Politics which created structural realism more than two decades ago With appropriate revisions however structural realist theory can compete effectively and reclaim its primacy The first part of International Relations and Scientific Progress assesses the meaning of progress in the discipline of international relations a process that culminates in the creation of a new concept the scientific research enterprise The second part reviews structural realism within that context and identifies a lack of connection between theory and research that links power based indicators to international conflict crisis and war This part of the book makes the case for an elaboration of structural realism by showing that a system level theory based on structure has great unrealized explanatory potential By comparison the current overwhelmingly research oriented agenda on state dyads imposes severe limitations on understanding that are not currently appreciated Part Three sums up the work and explores new directions most notably as related to empirical testing of an elaborated version of structural realism that focuses on both continuity and change in the international system

The Scourge of War Paul Diehl, 2010-03-25 J David Singer's legendary Correlates of War project represented the first comprehensive effort by political scientists to gather and analyze empirical data about the causes of war In doing so Singer and his colleagues transformed the face of twentieth century political science Their work provoked some of the most important debates in modern international relations about the rules governing territory international intervention and the so called democratic peace Editor Paul F Diehl has now convened some of the world's foremost international conflict analysis specialists to reassess COW's contribution to our understanding of global conflict

Each chapter takes one of COW's pathbreaking ideas and reevaluates it in light of subsequent world events and developments in the field. The result is a critical retrospective that will reintroduce Singer's important and still provocative findings to a new generation of students and specialists. Paul F. Diehl is Professor of Political Science and University Distinguished Scholar at the University of Illinois Urbana-Champaign.

Escalation and Negotiation in International Conflicts I. William Zartman, Guy Faure, Guy Olivier Faure, 2005-12-08 This volume examines the point where the concepts and practices of escalation and negotiation meet.

Realism and Institutionalism in International Studies Michael Brecher, Frank P. Harvey, 2009-12-11 Realism and Institutionalism in International Studies represents a unique collection of original essays by foremost scholars in the field of International Studies. Six essays advocate critique or revise Realism, the theoretical paradigm that explains international politics by emphasizing security, competition, and war among states. The remaining four essays address Institutionalism, the paradigm that offers explanations for the formation, maintenance, variation, and significance of international institutions. The authors reflect on the strengths and weaknesses of these approaches and suggest research agendas for the future. Together, this volume provides an accessible and wide-ranging survey of the issues concerning two major paradigms in International Studies. This volume will be of interest to scholars and students alike and will undoubtedly determine the shape of future research.

Millennial Reflections on International Studies Michael Brecher, Frank P. Harvey, 2009-12-22 Collection of essays that debate the question of progress in the discipline.
