Nato Airpower Organizing For Uncertainty:

NATO Airpower Willard E. Naslund,1993 In the future NATO forces must be prepared to respond quickly to events in regions within and beyond its borders This research addresses how this requirement will affect the organization of NATO forces particularly airpower by postulating two scenarios that would stress NATO to the extreme 1 an attack by Russia on Poland and 2 a Syria Iraq attack on Turkey The author uses these scenarios to develop operational concepts and alternative organizations that would enable NATO airpower to adapt to the uncertain post Cold War environment The report concludes that NATO s air reaction forces should be fully established in peacetime prepared for operations independent from existing command structures and that the future viability of these forces depends primarily on U S contributions **North Atlantic Treaty Organization (NATO)** ,1986 NATO Airpower Organizing for Uncertainty Willard E. Naslund,RAND CORP SANTA MONICA CA.,1993 In the future NATO will have to adapt to the realities of decreasing defense budgets and to changing and expanding the areas of responsibility brought on by German unification and the growing linkages with the former Warsaw Pact nations NATO will need to have forces ready to manifest its new strategy of reaction to uncertainty This new requirement for rapid reaction will greatly impact the nature of future NATO military organizations especially those that will be needed to plan deploy and employ air forces across its regions and beyond This research is focused on the concepts for these future organizations To provide a basis for this work we examined two major scenarios that would stress NATO to the extreme 1 an attack by Russia on Poland which would require NATO forces to deploy out of NATO s central region From the scenarios concepts of operations were developed for the employment of air forces that included basing command control and communications C3 and logistics Requirements for air organization were derived fro these and were used as a basis for alternative organization concepts **The Paths Of Heaven: The Evolution Of Airpower Theory: The School Of Advanced Airpower Studies** Philip S. Meilinger,2000 **Fear and Uncertainty in Europe** Roberto Belloni,Vincent Della Sala,Paul Viotti,2018-08-02 Russia s intervention in the Ukraine Donald Trump s presidency and instability in the Middle East are just a few of the factors that have brought an end to the immediate post Cold War belief that a new international order was emerging one where fear and uncertainty gave way to a thick normative and institutional architecture that diminished the importance of material power This has raised questions about the instruments we use to understand order in Europe and in international relations The chapters in this book aim to assess whether foreign policy actors in Europe understand the international system and behave as realists They ask what drives their behaviour how they construct material capabilities and to what extent they see material power as the means to ensure survival They contribute to a critical assessment of realism as a way to understand both Europe s current predicament and the contemporary international system **The Future of NATO's Tactical Air Doctrine** Linda E. Torrens,1997 This study analyzes the need for changes to the North Atlantic Treaty Organization NATO airpower doctrine to reflect current post cold war realities NATO air doctrine does not

yet reflect the actuality of today's operations nor does it anticipate the probable future employment of NATO's airpower. Out of area operations and Partnership for Peace participation in NATO operations will have profound effects on combined doctrine training organizational structures exercises and employment of forces. NATO's tactical doctrine revision process served the alliance well during the cold war. But today the international environment has drastically changed. Both the nature of the threat and the use of NATO airpower during conflict have changed. The current doctrinal revision process has proved too slow and cumbersome to provide adequate direction for air strategists during ongoing operations. There are many new doctrinal areas that must be thoroughly addressed so that NATO can chart a course for the future that in the end provides the best most effective mix of forces.
