Nato The Subjective Alliance The Debate Over The Future Rand Publication Series:

NATO, the Subjective Alliance Robert A. Levine, 1988-01-01 This report analyzes the range of differing views on policy with regard to the North Atlantic Treaty Organization NATO in the 1980s It considers 1 the issues over which those who debate NATO policy in the 1980s differ and 2 how these differences have developed from the debates of the 1960s The author concludes that Europe has been stable and Western Europe secure for a long time and this security and stability will continue if NATO remains strong In addition both the American and European sides of NATO need to avoid suspicions of each other Finally the Gorbachev era may make possible substantial improvements through arms control agreements that increase Western security and East West stability American Historians and the Atlantic Alliance Lawrence S.

Kaplan, 1991 This conference based work offers the views of seven American diplomatic historians on the role of NATO from an American perspective placing the alliance within the larger frame of America's foreign policy as a superpower Each reveals an aspect of how NATO has fashioned the American Century **A Bibliography of Selected Rand Publications**

Rand Corporation, 1988 **Weapons of Mass Destruction** Eric A. Croddy, James J. Wirtz, Jeffrey A. Larsen, 2004-12-22 The first accessible reference to cover the history context current issues and key concepts surrounding biological chemical and nuclear weapons A collection of information on everything from aerosols to zones of peace these two volumes cover historical background technology and strategic implications of biological chemical and nuclear weapons thus providing facts terms and context needed to participate in contemporary policy debate This encyclopedia is the only comprehensive reference dedicated to the three types of weapons of mass destruction With over 500 entries arranged alphabetically volume one covers biological and chemical weapons while volume two focuses on nuclear weapons Experts from eight countries cover issues related to these weapons policies strategies technologies delivery vehicles arms control concepts treaties and key historical figures and locations Entries are written to make difficult concepts easy to understand by cutting through military and scientific jargon Students lay readers scientists and government policy makers are provided with the broad range of information needed to place today's policy discussions in proper strategic or historical context *The Long Entanglement* Lawrence Kaplan, 1999-03-30 The fiftieth anniversary of the long entanglement between the United States and NATO is an appropriate occasion to reflect One of the few NATO studies to concentrate on the history of the alliance particularly the relationship between its senior partner and its European allies this study examines critical issues in depth to uncover the ability of the allies to surmount their internal divisions and to confront their Soviet adversary While NATO archives are still not fully open the use of declassified documents from the National Archives and the presidential libraries are of invaluable assistance in considering the historical role of America in the alliance and the continuing relevance of the organization in U S foreign policy The twelve chapters of this book provide analyses of important issues in the organization's history and are connected by brief contextual narratives The resulting picture depicts a fifty year history in which the difficulties in arriving at

a consensus among the fifteen allies each understandably concerned with its own national interests rival those of the alliance in dealing with the Communist threat The implosion of the Soviet empire in the early 1990s left the organization in search of new reasons for its own existence While centrifugal forces are arguably greater today than they were during the Cold War none of the allies seeks to terminate this long entanglement **NATO and 1992** Simon Webb,Rand Corporation,1989 Since the mid 1970s members of NATO have doubled annual spending in real terms on new equipment for their armed forces Throughout this period there have been calls for greater rationalization standardization and interoperability among the Allies Countries have also changed the way they acquire equipment This report tracks the changes in patterns of acquisition since the 1960s It also assesses the main forms of cooperation in more detail It reviews the growth in transatlantic trade following initiatives in the 1970s the emergence of collaborative development programs the role of licensed and co production schemes and trade in components and other subcontract items It examines the results of these policies on frontline forces in Europe and the North Atlantic and reviews the theoretical benefits expected from the free markets and the potential for securing similar gains in defense acquisition The author discusses defense and other reasons that countries may prefer to buy equipment from domestic industries He compares the evolving institutional frameworks of NATO and the European Economic Community for public sector purchasing He then discusses the broader implications for NATO of the free trade blocks and particularly how these might affect relationships between the United States and Europe Finally he considers possible ways in which free market principles might be reconciled in practice with key concerns of defense policy Still the Arms Debate Robert A. Levine,1990 **Weapons of Mass Destruction [2 volumes]** Eric A. Croddy,James J. Wirtz,Jeffrey A. Larsen,2004-12-22 The first accessible reference to cover the history context current issues and key concepts surrounding biological chemical and nuclear weapons **JPRS Report** ,1989 *The Transatlantic Alliance on the Eve of the New Millennium* Snežana Trifunovska,2024-09-02 Within these pages is a veritable banquet for those who savour the politics of international security The reader is offered factual analysis insight new perspectives revisited concepts problem spotting and recipes for solutions Academic observers from a dozen different countries in Eastern and Western Europe and on both sides of the Atlantic subject a large number of questions of topical interest in the security field to one or other of these forms of treatment Their debate embraces reinforcement of the European pillar of the Alliance adjustment of the balance of responsibilities between the two sides of the Atlantic and shoring up the transatlantic partnership and perhaps broadening it into that elusive concept a transatlantic community stretching into economic and other fields They address the perceived security vacuum in parts of Central and Eastern Europe and discuss measures to build up greater confidence between former Cold War antagonists and ways of developing in them the habits of co operation rather than counter operation They draw up architectural designs for the security of the twenty first century and grapple with the conflict of ideas circulating about the Alliance s future and particularly about its future relationship with Russia Isolationism nationalism multilateralism realism

constructivism and other isms are helpfully put into context Renationalisation denationalisation and identities in formation or in decline are also investigated
