The Arctic Climate System Mark C. Serreze, Roger G. Barry, 2005-10-13 The Arctic can be viewed as an integrated system characterised by intimate couplings between its atmosphere ocean and land linked in turn to the larger global system This comprehensive up to date assessment begins with an outline of early Arctic exploration and the growth of modern research Using an integrated systems approach subsequent chapters examine the atmospheric heat budget and circulation the surface energy budget the hydrologic cycle and interactions between the ocean atmosphere and sea ice cover Reviews of recent directions in numerical modelling and the characteristics of past Arctic climates set the stage for detailed discussion of recent climate variability and trends and projected future states Throughout satellite remote sensing data and results from recent major field programs are used to illustrate key processes The Arctic Climate System provides a comprehensive and accessible overview of the subject for researchers and advanced students in a wide range of disciplines

Treatise on Geomorphology, 2013-02-27 The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of the state of discipline The number of peer reviewed papers published in geomorphic journals has grown steadily for more than two decades and more importantly the diversity of authors with respect to geographic location and disciplinary background geography geology ecology civil engineering computer science geographic information science and others has expanded dramatically As more good minds are drawn to geomorphology and the breadth of the peer reviewed literature grows an effective summary of contemporary geomorphic knowledge becomes increasingly difficult The fourteen volumes of this Treatise on Geomorphology will provide an important reference for users from undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic Information on the historical development of diverse topics within geomorphology provides context for ongoing research discussion of research strategies equipment and field methods laboratory experiments and numerical simulations reflect the multiple approaches to understanding Earth's surfaces and summaries of outstanding research questions highlight future challenges and suggest productive new avenues for research Our future ability to adapt to geomorphic changes in the critical zone very much hinges upon how well landform scientists comprehend the dynamics of Earth's diverse surfaces This Treatise on Geomorphology provides a useful synthesis of the state of the discipline as well as highlighting productive research directions that Educators and students researchers will find useful Geomorphology has advanced greatly in the last 10 years to become a very interdisciplinary field Undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic will find the answers they need in this broad reference work which has been designed and written to accommodate their diverse backgrounds and levels of understanding Editor in Chief Prof J F Shroder of the University of Nebraska at Omaha is past president of the QG G section of the Geological Society of America and present Trustee of the GSA Foundation while being well respected in the geomorphology research community and having won numerous awards in

the field A host of noted international geomorphologists have contributed state of the art chapters to the work Readers can be guaranteed that every chapter in this extensive work has been critically reviewed for consistency and accuracy by the World expert Volume Editors and by the Editor in Chief himself No other reference work exists in the area of Geomorphology that offers the breadth and depth of information contained in this 14 volume masterpiece From the foundations and history of geomorphology through to geomorphological innovations and computer modelling and the past and future states of landform science no stone has been left unturned Traditional Ecological Knowledge in Georgia Zaal Kikvidze,2020-11-30 This multidisciplinary book develops a synthesis of traditional ecological knowledge in the Caucasus region in Georgia a hotspot of natural and cultural diversity Traditional ecological knowledge connects the knowledge of natural phenomena with the culture of a given human society and Georgia is an excellent case study for observing this knowledge The Caucasus region in particular is notable for its natural and ethnocultural diversity and this book weaves together the disciplines of history environment and ethnography to develop a synthesis of traditional ecological knowledge Tracing the history of Georgia through two main phases the hunter and gatherer bands and the agrarian phase the author examines important events such as the breeding of naked hexaploid wheat the domestication of the grapevine and the development of viticulture By utilising this historic perspective it allows us to clearly see how traditional ecological knowledge has increased in sophistication during the long prehistory of Georgia and most importantly how this type of knowledge underpins the social and economic progress of traditional societies not only in Georgia but throughout the world This book will be of great relevance to interdisciplinary minded scholars and students who have an interest in the relationships between nature and human society including anthropologists historians biologists ecologists botanists sociologists and ethnographers **The Oxford Handbook of Byzantine Studies** Elizabeth Jeffreys,John F. Haldon,Robin Cormack,2008 The Oxford Handbook of Byzantine Studies presents discussions by leading experts on all significant aspects of this diverse and fast growing field Byzantine Studies deals with the history and culture of the Byzantine Empire the eastern half of the Late Roman Empire from the fourth to the fourteenth century Its centre was the city formerly known as Byzantium refounded as Constantinople in 324 CE the present day Istanbul Under its emperors patriarchs and all pervasive bureaucracy Byzantium developed a distinctive society Greek in language Roman in legal system and Christian in religion Byzantium s impact in the European Middle Ages is hard to over estimate as a bulwark against invaders as a meeting point for trade from Asia and the Mediterranean as a guardian of the classical literary and artistic heritage and as a creator of its own magnificent artistic style **Polar Environments and Global Change** Roger G. Barry,Eileen A. Hall-McKim,2018-08-09 Surveys atmospheric oceanic and cryospheric processes present and past conditions and changes in polar environments The Anatomy of Deep Time Esther Jacobson-Tepfer,2020-03-12 Petroglyphic rock art in three valleys of Mongolia s Altai Mountains reveals the anatomy of deep time at the boundary between Central and North Asia Inscribed over a period of twelve millennia its subject matter styles

and manner of execution reflect the constraints of changing geology climate and vegetation These valleys were created and shaped by ancient glaciers Analysis of their physical environment projected from the deep past to the present begins to explain the rhythm of cultural manifestations where rock art appears when it disappears and why The material and this remote arena offer an ideal laboratory to study the intersection of prehistoric culture and paleoenvironment
