Physics as Metaphor Roger Stanley Jones, 1983 *Physics as Metaphor* Roger S. Jones, 1982 **Physics as metaphor** R. H. Hobart, 1974 *Aspects of Metaphor in Physics* Hanna Pulaczewska, 2011-05-03 With reference to copious case studies this book attempts to give a broad and comprehensive view of the multiplicity of forms taken by metaphor in physics A diachronic presentation of the views hitherto advanced on the role of metaphor in the natural sciences provides an introduction to the crucial issues By means of a broad definition of metaphor as a lexical semantic and conceptual phenomenon metaphor is identified at various levels of physics discourse in metatheory and methodology in the sociology of the origin and evolution of science in theory and conceptualization including physics models in education and finally in linguistic expression including terminology Whereas historians and theoreticians of science reduce the question of metaphor in physics to the question of the role of scientific models where one area of physics provides concepts and structures for another area the perspective adopted here is that of cognitive semantics The study inquires into the way in which concept formation and terminology in physics avails itself of the metaphoric bent immanent in everyday language conceptualizing abstract ideas in spatial terms inanimate things as intelligent measurable phenomena in terms of the visual Attention is also given to the way in which metaphoric processes make it possible to integrate new knowledge into old and sometimes obsolete structures rather than eliminating those structures altogether *Physics as Metaphor...with Drawings* by Mike Norman ,1982 *Metaphor and Mills* Honesto Herrera-Soler, Michael White, 2012-07-04 While the role of metaphor in economics and business has produced multiple research articles no comprehensive book length study has yet appeared The present book is a timely attempt to fill this gap giving a global coverage of the role of metaphor in business and economics It spans time from Classical Greece to the current business network meeting room space from Europe through the Americas to Asia cultures and languages from continental European languages Brazilian Portuguese to Chinese The theoretical grounding of the book is the Conceptual Theory of Metaphor taken in a dynamic sense as evolving with on going research The theory is thus used adapted and refined in accordance with the evidence provided Metaphor is shown to be theory constitutive in the elaboration of economic thinking down through the ages while at the same time the emphasis on evidence open to historical cross cultural and cross linguistic considerations align with the current notion of situatedness The book is a rich source of information for researchers and students in the fields of Metaphor Studies Economics Discourse Analysis and Communication Studies among others *Quantum-Social Investigations across Transnational Movements* Mehmet Akif Kumral, 2025-01-06 This book weaves theoretical empirical threads beyond pragmatic philosophy quantum cosmology and world affairs It offers a quantum social approach to inquire solidarity configurations among transnational movements The first part of the book develops an integrative framework to foreground quantum type features of social fields virtual movements and complex encounters Quantum conceptual keys open new gates for macro theorizing of non locality and comprehending fields around

cognate disciplines like psychology and sociology as well as international studies Accordingly emotional indeterminacy is found fundamental for understanding mesoscopic dynamics of virtual mobilizations All along micro layers phenomena of entanglement mold multiple pathways for transversal solidarities The empirical second part looks at how transnational solidarity springs emerge under quantum like contexts of liberation revolution redemption resistance movements Emotional memories and affective imageries dynamically co mingle across flowing fields and moving habitats of 1968 71 and 2008 11 Affective waves and sentimental circulations shape sanctified secularized constellations of altruisms and sacrifices through which solidarities spin

Canonizing Economic Theory Christopher D. Mackie, 2016-07-11 Historians of economic thought traditionally summarize critique and trace the development of existing theory History of thought literature provides information about the authors chronology and relative importance of influential works Generally missing from the literature however are answers to questions about why economic theory exists in its current form Why have economists chosen the theories they have to represent the discipline s formal content What are the criteria that determine the value of a theory or of research in general and how have these criteria changed over time In this insightful and well written work Christopher Mackie analyzes how ideas and theories are accepted in economics from the pre publication phase to the point at which once written a theory enters the accepted body of professional literature Drawing from economics the history of science and philosophy Mackie shows how both empirical and non empirical criteria determine how theory will actually evolve

Aspects of Metaphor in Physics Hanna Pulaczewska, 1997 **Non-natural Social Science** Neil De Marchi, 1993 Published in 1989 Philip Mirowski s *More Heat Than Light* Economics as Social Physics Physics as Nature s Economics offered a challenge to historians of economics that could not be ignored Neo classical economics he said adopted certain analytical tools of mid nineteenth century physics simply substituting utility for energy and in so doing chose a natural world model which denied that economic knowledge might be essentially social and cultural The essays in this collection represent the first collective effort to respond to Mirowski s challenge by examining and assessing the Mirowski enterprise In addition to questioning the veracity of the connection between physics and economics the contributors consider the far reaching

implications of Mirowski's thesis for the history of economics Mirowski shows that economic texts must be viewed in their relation to texts outside the field of economics and offers an alternative reading of economic texts as social and cultural inscriptions As historians of economics respond to Mirowski's challenge the style and direction of their work will be changed Ultimately a careful assessment of *More Heat Than Light* may introduce historians of economics to recognize that the discipline of economics may not be the most appropriate category from which to proceed Contributors Jack Birner Marcel Boumans A W Coats Avi J Cohen I Bernard Cohen Neil de Marchi Steve Fuller Clifford G Gaddy Wade Hands Albert Jolink Arjo Klammer Robert Leonard Philip Mirowski Theodore M Porter Margaret Schabas E Roy Weintraub

Pitt, 2011-03-24 As science becomes more deeply embedded in a complex technological infrastructure has this changed the relationship between the sciences and the various technologies that support them As our technologies help shrink our world can we restrict our ethical concerns or must we find a way to face the fact that we are now one world What do new forms of architecture say about whom we are Is the design process the new epistemological paradigm The answers to all of these is yes according to Joseph C Pitt VirginiaTech Doing Philosophy of Technology presents an updated and integrated overview of the most important thinking from this prominent philosopher of technology Throughout his career Joseph C Pitt has defended the view that to say anything meaningful about the value of a technology one must know something about that technology and how it functions in the world This starting point leads naturally to a pragmatist philosophical stance since it is the real world consequences of introducing a technology that must be the basis for any further normative judgements In the book we find an extended set of arguments that challenge the idea that there are eternal philosophical issues that transcend the impacts that technologies make on human beings and their world Rather it is claimed that as our technologies transform our world they transform us and the kinds of questions we find important to answer The Transgender Studies Reader Remix Susan Stryker, Dylan McCarthy Blackston, 2022-07-12 The Transgender Studies Reader Remix assembles 50 previously published articles to orient students and scholars alike to current directions in the fast evolving interdisciplinary field of transgender studies The volume is organized into ten thematic sections on trans studies engagements with feminist theory queer theory Black studies science studies Indigeneity and coloniality history biopolitics cultural production the posthumanities and intersectional approaches to embodied difference It includes a selection of highly cited works from the two volume The Transgender Studies Reader more recently published essays and some older articles in intersecting fields that are in conversation with where transgender studies is today Editors Susan Stryker and Dylan McCarthy Blackston provide a foreword an introduction and a short abstract of each article that taken together document key texts and interdisciplinary connections foundational to the evolution of transgender studies over the past 30 years A handy overview for scholars activists and all those new to the field this volume is also ideally suited for use as a textbook in undergraduate or graduate courses in gender studies
