Premysl Otakar II Von Bohmen:

Přemysl Otakar II. von Böhmen Jörg Konrad Hoensch, 1989 The Expansion of Central Europe in the Middle Ages Nora Berend, 2017-05-15 This volume brings together a set of key studies on the history of medieval Central Europe Bohemia Hungary Poland along with others specially commissioned for the book or translated and a new introduction This region was both an area of immigration and one of politics in expansion Such expansion included the settlement and exploitation of previously empty lands as well as rulers attempts to incorporate new territories under their rule although these attempts did not always succeed Often German immigration has been prioritized in scholarship and the medieval expansion of Central Europe has been equated with the expansion of Germans Debates then focused on the positive or negative contribution of Germans to local life and the consequences of their settlement This perspective however distorts our understanding of medieval processes On the one hand Central Europe was not a passive recipient of immigrants Local rulers and eventually nobles benefited from and encouraged immigration they played an active role On the other hand German immigration was not a unified movement and cannot be equated with a *drang nach osten* Finally not just Germans but also various Romance speaking and other immigrant groups settled in Central Europe This volume therefore seeks to present a more complex picture of medieval expansion in Central Europe

Lords and Towns in Medieval Europe Howard B. Clarke, Anngret Simms, 2017-07-14 This volume is based on possibly the biggest single Europe wide project in urban history In 1955 the International Commission for the History of Towns established the European historic towns atlas project in accordance with a common scheme in order to encourage comparative urban studies Although advances in urban archaeology since the 1960s have highlighted the problematic relationship between the oldest extant town plan and the actual origins of a town the large scale cadastral maps as they have been made available by the European historic towns atlas project are still necessary if we want to understand the evolution of the physical form of our towns By 2014 the project consisted of over 500 individual publications from over 18 different countries across Europe Each atlas comprises at least a core map at the scale of 1:2500 analytical maps and an explanatory text The time has come to use this enormous database that has been compiled over the last 40 years This volume itself based on a conference related to this topic that was held in the Royal Irish Academy in Dublin in 2006 takes up this challenge The focus of the volume is on the question of how seigneurial power influenced the creation of towns in medieval Europe and of how this process in turn influenced urban form Part I of the volume addresses two major issues the history of the use of town plans in urban research and the methodological challenges of comparative urban history Parts II and III constitute the core of the book focusing on the dynamic relationship between lordship and town planning in the core area of medieval Europe and on the periphery In Part IV the symbolic meaning of town plans for medieval people is discussed Part V consists of critical contributions by an archaeologist an art historian and an historical geographer By presenting case studies by leading researchers from different European countries this volume combines findings that were

hitherto not available in English A comparison of the English and German bibliographies attached to this volume reveals some interesting insights as to how the focus of research shifted over time The book also shows how work on urban topography integrates the approaches of the historian archaeologist and historical geographer The narrative of medieval urbanization becomes enriched and the volume is a genuine contribution to European studies *Bohemia in History* Mikuláš Teich,1998-10-29 This original collection offers an account of key moments and themes in the history of the Czech lands from the time of the rise of the Premyslide dynasty in the ninth century to the fall of socialism in 1989 The pieces commissioned especially for this volume are written by prominent scholars almost all teaching and researching in the present day Czech Republic Apart from eleven historical essays along socio political times there are four contributions which focus broadly on the arts sciences and education emphasising political economic and other aspects Two further essays consider the worlds of the university and of science in the period 1800 1914 and 1800 1930 respectively The co existence and encounters between Czechs and Germans embedded in Czech history are emphasised throughout the book while the conflicts between the two nationalities in the nineteenth and twentieth centuries are examined in a separate chapter Lastly pursuing the ethnic theme there are essays on both the little explored question of Czech Jewish relations and on the sensitive Czech Slovak question

Unions and Divisions Paul Srodecki,Norbert Kersken,Rimvydas Petrauskas,2022-11-25 Providing a comprehensive and engaging account of personal unions composite monarchies and multiple rule in premodern Europe *Unions and Divisions New Forms of Rule in Medieval and Renaissance Europe* uses a comparative approach to examine the phenomena of the medieval and renaissance unions in a pan European overview In the later Middle Ages genealogical coincidences led to caesuras in various dynastic successions Solutions to these were found above all in new constellations which saw one political entity becoming co managed by the ruler of another in the form of a personal union In the premodern period such solutions were characterised by two factors in particular on the one hand the entry of two countries into a union did not constitute a military annexation even though claims to the throne were all too often imposed by force on the other hand the new unitarian constellation retained at least de jure the independence of its respective components The twenty four essays ranging in scope from Scandinavia to Iberia from England and France to Central and Eastern Europe examine whether the respective unions were the result of careful planning and deliberations in the face of a long foreseen succession crisis or whether they emerged from dynamic developments that were largely reactive and dependent upon various random factors and circumstances Each union is assessed to provide an understanding for students and researchers of the political and social forces involved in the respective countries and investigates how the unions were reflected in contemporary literature pamphlets memoranda chronicles diaries etc propaganda and in legal and historical discourses This volume is essential reading for students and researchers interested in the history of monarchy political history and social and cultural histories in premodern Europe **The Mongols and the West** Peter Jackson,2014-05-01 The Mongols had a huge impact on

medieval Europe and the Islamic world This book provides a comprehensive survey of contacts between the Catholic West and the Mongol world empire from the first appearance of Chinggis Khan's armies in 1221 down to the death of Tamerlane 1405 and the battle of Tannenberg 1410 This book considers the Mongols as allies as well as conquerors the perception of them in the West the papal response to the threat and opportunity they presented the fate of the Frankish principalities in the Holy Land in the path of the Mongol onslaught Western European embassies and missions to the East and the impact of the Mongols on the expanding world view of the maturing Middle Ages For courses in crusading history and medieval European history

Central Europe in the High Middle Ages Nora Berend, Przemysław Urbańczyk, Przemysław Wiszewski, 2013-12-19 A groundbreaking comparative history of the formation of Bohemia Hungary and Poland from their origins in the eleventh century

Papacy, Monarchy and Marriage 860-1600 David d'Avray, 2015-03-30 This analysis of royal marriage cases across seven centuries explains how and how far popes controlled royal entry into and exits from their marriages In the period between c 860 and 1600 the personal lives of kings became the business of the papacy d'Avray explores the rationale for papal involvement in royal marriages and uses them to analyse the structure of church state relations The marital problems of the Carolingian Lothar II of English kings John Henry III and Henry VIII and other monarchs especially Spanish and French up to Henri IV of France and La Reine Margot have their place in this exploration of how canon law came to constrain pragmatic political manoeuvring within a system increasingly rationalised from the mid thirteenth century on Using documents presented in the author's *Dissolving Royal Marriages* the argument brings out hidden connections between legal formality annulments and dispensations at the highest social level

Premodern History and Art through the Prism of Gender in East-Central Europe Daniela Rywиковá, Michaela Antonín Malaníková, 2021-12-15 Premodern History and Art through the Prism of Gender in East Central Europe is a representative collection of current Czech research in premodern history and art history using gender as a tool of analysis The common denominators of the texts collected in this volume are the art history of the premodern period gender perspectives and to a certain degree the Czech milieu The book is divided into four parts based on area of interest time frame and research perspective The first part sheds light on the state of research in the field of women's history along with the implementation of the concept of gender and highlights a certain paradigmatic conservatism of Czech art historiography The second gathers contributions that analyze visual sources of Czech origin The third includes texts that analyze gender issues on the level of literary representation The final part presents two case studies that involve analysis of the premodern West European source base Rywikov and Malan kov present this volume as an innovative way to introduce this specific segment of Central European art history to a broader audience in global academia

Disciplined Dissent Autori Vari, 2017-01-03T00:00:00+01:00 Inspired by current debates around political confrontation and the exercise of power Fabrizio Titone offers an interpretation based on the concept of disciplined dissent This interpretation is centred on the notion of diffused power and is designed to transcend the binary distinction

consensus resistance The aim is to identify the conservative process involved in mounting a critique a protest through which those who object may have intercepted and then deployed on their own account the cultural repertoire of those in a position of authority This was with a view to obtaining a hearing or even influencing the activities of the government and decentering the exercise of power The essays collected here take as their theoretical point of departure the concept of disciplined dissent In order to ascertain how adaptable the latter is the decision was taken to include studies relating to wholly distinct political contexts Contributions by scholars from different backgrounds shed light upon different circumstances prevailing in continental and non continental medieval Europe The aim is to offer a broad spectrum of analyses on political confrontation the formulation of critiques and the attainment of spaces for participation by means of non violent protest
