Now for the first time the modules are packaged into one resource to help teachers evaluate the quality and premise of their current assessment system Developing Culturally and Developmentally Appropriate Early STEM Learning Experiences Philip Hui Li, Anne Forbes, Weipeng Yang, 2023-12-11 This book informs best practice for enhancing young children's STEM learning experiences in formal settings such as preschool environments and less formal settings such as home environments. It is the first collection of multidisciplinary and multinational studies on early STEM programs worldwide and presents diverse authentic and current STEM relevant scenarios that address two fundamental problems: where are we in early STEM education and where shall we go? The book explores factors that influence young learners' abilities to make informed choices in authentic problem-based STEM relevant scenarios and how those abilities have been identified, documented, and enhanced. Chapters address topics related to curriculum and pedagogy, teacher education and professional development, family environment, and inclusive education from a variety of international settings including Australia, Germany, Hong Kong, Mainland China, Singapore, and the United States. Each chapter is based around a research project and describes relevant background information from the research literature, details of how the study was designed, findings from the study, and discussion as to what the findings mean for practical implementation. Developing Culturally and Developmentally Appropriate Early STEM Learning Experiences will be a key resource for researchers and practitioners of early childhood education and care, STEM education, educational psychology, educational research, and educational technology.
