Teaching Learning in the Preschool Marion Blank, 1983 **Eager to Learn** National Research Council, Commission on Behavioral and Social Sciences and Education, Committee on Early Childhood Pedagogy, 2001-01-22 Clearly babies come into the world remarkably receptive to its wonders Their alertness to sights sounds and even abstract concepts makes them inquisitive explorers and learners every waking minute Well before formal schooling begins children's early experiences lay the foundations for their later social behavior emotional regulation and literacy Yet for a variety of reasons far too little attention is given to the quality of these crucial years Outmoded theories outdated facts and undersized budgets all play a part in the uneven quality of early childhood programs throughout our country What will it take to provide better early education and care for our children between the ages of two and five *Eager to Learn* explores this crucial question synthesizing the newest research findings on how young children learn and the impact of early learning Key discoveries in how young children learn are reviewed in language accessible to parents as well as educators findings about the interplay of biology and environment variations in learning among individuals and children from different social and economic groups and the importance of health safety nutrition and interpersonal warmth to early learning Perhaps most significant the book documents how very early in life learning really begins Valuable conclusions and recommendations are presented in the areas of the teacher child relationship the organization and content of curriculum meeting the needs of those children most at risk of school failure teacher preparation assessment of teaching and learning and more The book discusses Evidence for competing theories

models and approaches in the field and a hard look at some day to day practices and activities generally used in preschool The role of the teacher the importance of peer interactions and other relationships in the child s life Learning needs of minority children children with disabilities and other special groups Approaches to assessing young children s learning for the purposes of policy decisions diagnosis of educational difficulties and instructional planning Preparation and continuing development of teachers Eager to Learn presents a comprehensive coherent picture of early childhood learning along with a clear path toward improving this important stage of life for all children **Preschool Learning and Teaching** Catherine Landreth,1972 **Teaching in the Digital Age for Preschool and Kindergarten** Brian Puerling,2018-04-03 Across the curriculum Teaching in the Digital Age for Preschool and Kindergarten will guide teachers toward integrating technology so it has an authentic meaningful and developmentally appropriate impact on children s exploration and learning By discipline including science math literacy art social studies health and safety physical education and music it will motivate teachers to dig deeper into each content area to see the various ways technology and digital media can support and strengthen children s learning as well as documentation and assessment Multicultural Teaching in the Early Childhood Classroom Mariana Souto-Manning,2013-03-15 EDUCATION Preschool Kindergarten **EBOOK: Rethinking Learning in Early Childhood Education** Nicola Yelland,Libby Lee,Maureen O'Rourke,Cathie Harrison,2008-08-16 I think a real strength of the book is the use of the case studies to ground the points made and to offer in depth insights into practice Jackie Marsh University of Sheffield UK This exciting book considers the nature of young children s lives and how this can and should inform early childhood education in practical ways It examines What is it like for young children to learn in the 21st century How can we link this to new and innovative ways of providing relevant and engaging learning contexts for young children What it means to be multiliterate in the 21st century The book explores how learning and engagement with ideas can be extended through the use of new technologies describing how information and communications technologies enable young people to extend the boundaries of their learning and social interactions These experiences have important implications for formal learning environments and the nature of the curriculum including bold new approaches to teaching and learning which offer opportunities for children to investigate in new ways This book provides examples of the ways in which early childhood teachers have extended opportunities for new types of learning for children by creating contexts in which they are able to explore and represent their ideas and thinking in multimodal formats using new technologies This book represents a research based discussion for rethinking learning in the 21st century and includes various case studies and scenarios to enable students and practising teachers to try out new ideas Finally it considers new ways of thinking about children s learning by creating a multiliteracies portrait pedagogies and pathways profile that enables teachers to build on their strengths to plan for effective learning outcomes Rethinking Learning in Early Childhood Education is key reading for students on Early Years courses or Primary Education pre service teacher education programmes **Skills for Preschool**
