State Terrorism and the United States Frederick H. Gareau, 2004-08 This is a chilling analysis of the immediate predecessor of the US war on terrorism its counter insurgency policy during the Cold War The US promised a low level response uniquely tailored to assisting third world states to respond to local insurgencies seeking social change Drawing on the reports of Truth Commissions from six countries Guatemala El Salvador Argentina Chile South Africa and Indonesia Frederick Gareau examines a harrowing array of human rights abuses by US supported dictators governments and paramilitary groups against their own peoples He shows that state and para statal forces committed by far the greatest proportion of violence and that these state repressions were perpetrated with Washington s full awareness complicity and military and politico diplomatic support if not at its instigation

The Psychology of Strategic Terrorism Ben Sheppard, 2009 This new volume explores terrorism and strategic terror examining how the public responds to terrorist attacks and what authorities can do in such situations The book uses a unique interdisciplinary approach which combines the behavioural sciences and international relations in order to further the understanding of the terror generated by strategic terror The work examines five contemporary case studies of the psychological and behavioural effects of strategic terror from

either terrorist attacks or aerial bombardment. It also looks at how risk communication and public health strategies can amplify or reduce psychological and behavioural responses and considers whether behavioural effects translate into political effects and what governments can do to relieve this. Ultimately the study argues that the public is not prone to panic but can change their behaviours to reduce their perceived risk of being exposed to a terrorist attack. This book will be of much interest to students of terrorism studies, homeland security, social psychology and politics in general.

The Root Causes of Terrorism Mahmoud Masaeli, Rico Sneller, 2017-01-06 Fifteen years after the tragic events of 9/11, bombs are still exploding and innocent people are being killed by terrorist groups in both western and Islamic societies. Most of these sinisterly threatening events are motivated by religious claims or are taking place in religiously affected places. Is religion the main cause of terrorism or does terrorism still arise because of leaders who brainwash and coach future terrorists so that they kill under the banner of religion? The religious imagination seems to hold here an influential power in the creation of delusion to orient the bigot believers toward fulfilling their religious duty against those who are religious in a different way or are not religious at all. Religion in this sense is tightly allied with political aspirations. In spite of the religious justification of the act of killing, enlightened religious leaders and religious minded people believe and argue that religion is a source of love and affection. Therefore the sacred texts of religious tradition must be read from a humanist perspective because the ultimate message of religion is about the appreciation of the principle of humanity. This is a growing attitude among many religious people today who believe that God is merciful and compassionate and never orders resentment, violence and killing of innocent people. In addition, no true religious tradition appreciates self-serving interpretations promoting violence against others. If religion disregards love, affection and compassion as its essence, it drops into the dire vortex of ideological dogma as it is in the case for the Taliban, ISIS, Boko Haram and Al Shabab. Therefore any interpretation that admits violence and killing would be a mere provincial reading of the religious texts agitated by purposeful intentions aimed at political goals. This book investigates and addresses the root causes of terrorism from a religious studies perspective. The themes analysed and discussed here mainly include a range of religious and philosophical issues such as religious violence in scriptural monotheism, radical interpretations of religious texts, militancy and sacrifice, apocalypticism and terrorism and religious terrorism today. The book brings together new approaches adopted by the authors to not only trace the causes of terrorism in various religious interpretations and realms but also reach a common definition of the main religious causes beyond diverse perspectives and advance solutions against religious inspired terrorism.

Risk Assessment for Water Infrastructure Safety and Security Anna Doro-on, 2011-08-17 One of the seventeen critical infrastructures vital to the security of the United States, the water supply system remains largely unprotected from the threat of terrorism, including possible revenge by Al Qaeda over the killing of Osama Bin Laden. Recognizing and identifying prospective events of terrorism against the water infrastructure is critical.

Psychological Responses to the New Terrorism Simon Wessely, Valeriy Krasnov, 2005

Terrorism is to create a state of terror and fear This book is concerned with the consequences of acts of terror and their impact on populations It describes what citizens professionals and governments can do to mitigate the consequences It focuses more on culture and place specific reactions than the timeless or universal trauma reactions *State Terrorism and the United States* Frederick Henry Gareau,2004 This study exposes the support that administrations in Washington have given right wing dictatorships that committed terrorism especially during the cold war and war on terrorism It rejects the narrow definition of terrorism insisted on by Washington that exempts terrorism committed by governments state terrorism from the definition and for political reasons restricts the term solely to the private terrorism committed by private individuals or non governmental organizations Every one of the six truth commission reports used in the study one each for El Salvador Chile Argentina and South Africa and two with remarkably similar conclusions for Guatemala found that the governments were responsible for the great preponderance of terrorism and other acts of repression that occurred in their respective countries much more so than the guerrillas publisher web site *Terrorism* Doug Lovelace,2008-03-27 Terrorism Documents of International and Local Control is a hardbound series that provides primary source documents on the worldwide counter terrorism effort Chief among the documents collected are transcripts of Congressional testimony reports by such federal government bodies as the Congressional Research Service and the Government Accountability Office and case law covering issues related to terrorism Most volumes carry a single theme and inside each volume the documents appear within topic based categories The series also includes a subject index and other indices that guide the user through this complex area of the law With the addition of commentary from a prominent member of the U S national security establishment Professor Douglas C Lovelace this series becomes the premiere resource for an informative and analytical discourse on terrorism and how it continues to have a catastrophic effect on our society Although Professor Lovelace acknowledges the current Iraq debate in his opening pages Understanding United States National Security Strategy Relating to Terrorism Part II Derivative and Supporting Strategies primarily focuses on the similarly difficult topic of how the U S may best secure its homeland By dividing this topic into three prominent categories aviation security maritime security and domestic security Professor Lovelace expertly presents a summary of current U S security policy and assesses the value of those policies Within the domestic security category he also provides detailed guidance on such specialized issues as bio defense and the connection between the drug trade and terrorist financing The Terrorism series remains a unique resource on all issues related to terrorism **The Double Horror of Fenley Place** Carolyn Keene,2001-10-18 Nancy visits a movie set and finds terror on location World famous director Hank Steinberg is filming a horror flick in Nancy s hometown of River Heights The movie tells a spine tingling story about a haunted house Most shocking of all though is what s going on across the street at an old Victorian mansion called Fenley Place Whatever happens on the movie set is mysteriously duplicated in the mansion red smoke billows from the chimney a ghostly figure appears in the window and blood oozes from the walls The

special effects are a real scream but Nancy must find out who is behind them before the movie and the mansion reach the final horrifying climax Narco Terrorism: A Unified Strategy to Fight a Growing Terrorist Menace Douglas Davids, 2021-10-01 OUT OF PRINT This well researched and informative book paves the way for policymakers to develop that will and take that necessary action With a convincingly detailed demonstration that narco terrorism is a thriving reality citing for example facilities that combine guerilla training and drug processing and documenting meetings between political leaders and drug lords the author lays out a powerful program that coordinates strong legal political military and social education initiatives which taken together will at last allow us to contain this growing menace Published under the Transnational Publishers imprint
