Present Futures Architecture In Cities:

Emerging Perspectives on Teaching Architecture and Urbanism David Leite Viana, Emílio da Cruz Brandão, Franklim Morais, Isabel Cristina Carvalho, José P. Duarte, Nicolau Brandão, 2023-11-17 This book contains a set of essays on the teaching of Architecture and Urbanism written by university professors and researchers from several countries It argues that the teaching of architecture and urbanism is in a state of crisis architecture seems unable to respond to current problems and urbanism seems incapable of fulfilling the needs of a more balanced society and its built environment including the human right to housing The book comprises historical analyses systematization of concepts manifestos and social evaluations and above all an alignment of new objectives curricular plans and pedagogical methodologies

Architectural Theories of the Environment Ariane Lourie Harrison, 2013-03-05 As architects and designers we struggle to reconcile ever increasing environmental humanitarian and technological demands placed on our projects Our new geological era the Anthropocene marks humans as the largest environmental force on the planet and suggests that conventional anthropocentric approaches to design must accommodate a more complex understanding of the interrelationship between architecture and environment Here for the first time editor Ariane Lourie Harrison collects the essays of architects theorists and sustainable designers that together provide a framework for a posthuman understanding of the design environment An introductory essay defines the key terms concepts and precedents for a posthuman approach to architecture and nine fully illustrated case studies of buildings from around the globe demonstrate how issues raised in posthuman theory provide rich terrain for contemporary architecture making theory concrete By assembling a range of voices across different fields from urban geography to critical theory to design practitioners this anthology offers a resource for design professionals educators and students seeking to grapple the ecological mandate of our current period Case studies include work by Arakawa and Gins Arons en Gelauff Casagrande The Living Minifie van Schaik R Sie n SCAPE Studio Gang and xDesign Essayists include Gilles Clément Matthew Gandy Francesco Gonz les de Canales Elizabeth Grosz Simon Guy Seth Harrison N Katherine Hayles Ursula Heise Catherine Ingraham Bruno Latour William J Mitchell Matteo Pasquinelli Erik Swynedouw Sarah Whatmore Jennifer Wolch Cary Wolfe and Alben Yaneva

Present and Future Paradigms of Cyberculture in the 21st Century Atay, Simber, Kurubacak-Meriç, Gülsün, Sisman-Uğur, Serap, 2020-11-27 Cyberculture is a particularly complex issue It is seen as a fantastic meeting point of classic philosophers with postmodern theorists politicians with community engineers contemporary sophists with software engineers and artists with rhetoricians Today cyberculture is identified highly with new media and digital rhetoric and could be used to create a comprehensive map of modern culture Present and Future Paradigms of Cyberculture in the 21st Century is a comprehensive research publication that explores the influence of the internet and internet culture on society as a whole Highlighting a wide range of topics such as digital media activism and psychology this book is ideal for academicians researchers sociologists psychologists anthropologists and students

Artwork by Steven Holl Jean Nouvel Contributions by Hans Kollhoff **Splintering Urbanism** Steve Graham, Simon Marvin, 2002-09-11 Splintering Urbanism makes an international and interdisciplinary analysis of the complex interactions between infrastructure networks and urban spaces It delivers a new and powerful way of understanding contemporary urban change bringing together discussions about globalization and the city technology and society urban space and urban networks infrastructure and the built environment developed developing and post communist worlds With a range of case studies illustrations and boxed examples from New York to Jakarta Johannesburg to Manila and Sao Paolo to Melbourne Splintering Urbanism demonstrates the latest social urban and technological theories which give us an understanding of our contemporary metropolis **Future Asian Space** Erwin Viray, Davisi Boontharm, Limin Hee, 2012-01-01 Rapid technological economic social and cultural changes are transforming the idea of Asian space With the shift to a global economy and an urban population explosion Asian cities have become a mainstay of progress national pride identity and positioning on the global stage The extraordinary pace and intensity of the changes have created a situation unique in the history of urban development Despite the immense diversity of Asian countries Asia ness is often treated as a distinctive quality that has emerged from unique recent circumstances affecting Asian urbanizations as a whole In Future Asian Space 15 authors explore broad concepts relating to the creation and re creation of Asian space and contemporary Asian identity and their examination of different sites and research approaches highlights the difficulty of pinpointing what Asia ness is or might become Appropriate design and planning of cities is a critical element in building a sustainable future and coping with environmental social and cultural problems Future Asian Space is designed to stimulate interests and engagement in discussions of the Asian city and its trajectories in architecture and urbanism but the authors conclusions will intrigue anyone interested in the future of cities and urban life in Asia *Planting New Towns in Europe in the Interwar Years* Helen Meller, Heleni Porfyriou, 2016-06-22 The key theme of the papers in this book concerns the prospects of building new urban environments and creating new societies in Europe during the interwar years The contributions do not focus on the system of government communist fascist or democratic but rather on what actually got built by whom and why and how the international communication of ideas was filtered through the prism of local concerns and culture As such the volume serves to tease out connections between urban form and social aspirations and between the moral basis of social planning and how it was interpreted Did the new towns of the interwar years actually create a planned society where visions met realities aided by the design of new urban forms This is one of the principal questions investigated by the contributors here in all the different political contexts of their chosen new towns *Integrated Architecture* Liangyong Wu, 2013-12-01 Integrated Architecture is both a historical and contemporary work The book was first published in 1989 by Wu Liangyong one of contemporary China's most influential architects and theoreticians with the title A General Theory on Architecture His eminence is also recognised by the international architectural community above all the group of architectural and urban

planning theoreticians battling for a more decisive reform to the concepts methodologies and practices presiding over the construction and requalification of the contemporary metropolis I first met professor Wu Liangyong in 2005 at the Faculty of Architecture at the Tsinghua University of Beijing his Faculty Wu Liangyong founded the school in 1949 at the age of 24 together with Liang Sicheng the father of modern Chinese architectural studies From this moment more than sixty seven years ago professor Liangyong has remained a central figure in Beijing's academic community He remains a constant source of inspiration not only national to education reforms and above all theoretical methodological and operative research into architecture the city and the territory He is a rare figure present throughout a lengthy historical period witness the world over to tumultuous upheavals in society and its cities A period whose most dramatic and exalting manifestations were perhaps to be found in China a period of war of hope of revolutions of great leaps forward of presumptions horrors errors new leaps forward and incomprehensible economic growth of irreversible social and cultural metamorphoses and what interests us most as architects of staggering urban growth and territorial transformations The intellect of this minute and genteel figure held fast against the storms of history The observation of events and the humanist and scientific principles of his personal culture continuously nourished an increasingly more effective reflection on the meaning of architecture in today's world He also clearly saw its inextricable ties to the substance of the city and the impossibility to substitute the figure of the architect scientist humanist and artist A few years after our meeting having absorbed direct lessons from Wu's work as an architect and theoretician I proposed an Italian translation of an anthology of his writings The material was to be drawn from his many books and essays on architecture and the city published continuously over the course of his incomparable career Professor Wu Liangyong responded with a challenge in lieu of this anthology of texts he proposed a full translation in Italian and English of a book published twenty years ago 1989's *A General Theory on Architecture* Given the pace of cultural debate it would not have been out of place to imagine a book firmly sedimented in history I understood instead that it was a milestone in the expression of Wu Liangyong's ideas a benchmark that in all likelihood served as the starting point for his later theories even the most recent Published in other fundamental essays they range across the vast field of human settlements touching on all components of the man made environment Lucio Valerio Barbera

Wright, 1870 **The Figure of Knowledge** Sebastiaan Loosen, Rajesh Heynickx, Hilde Heynen, 2020-10-01 It is a major challenge to write the history of post WWII architectural theory without boiling it down to a few defining paradigms An impressive anthologising effort during the 1990s charted architectural theory mostly via the various theoretical frameworks employed such as critical theory critical regionalism deconstructivism and pragmatism Yet the intellectual contours of what constitutes architectural theory have been constantly in flux It is therefore paramount to ask what kind of knowledge has become important in the recent history of architectural theory and how the resulting figure of knowledge sets the conditions for the actual arguments made The contributions in this volume focus on institutional geographical rhetorical and other

conditioning factors They thus screen the unspoken rules of engagement that postwar architectural theory ascribed to
