Present Concerns:

Present Concerns Clive Staples Lewis, 1986 Nineteen essays on democratic values threats to educational and spiritual fulfillment literary censorship and other topics all displaying Lewis's characteristic sanity and persuasiveness Introduction by Walter Hooper Willamette River Floodplain Restoration, Oregon United States. Office of the Assistant Secretary of the Army (Civil Works), 2014 Gadamer and the Social Turn in Epistemology Carolyn Culbertson, 2024-06-01 While some take Gadamer's Truth and Method to be a departure from epistemological questions and concerns author Carolyn Culbertson reads Gadamer's work as offering a valuable reflection on the nature of understanding one that is deeply resonant with the recent social turn in epistemology Like social epistemologists Gadamer worries about the epistemic irresponsibility that we encourage when we treat an attitude of objectivity wherein the inquirer lacks any awareness of their social and historical situation as an epistemic ideal Like social epistemologists too Gadamer argues that understanding that one is socially and historically situated does not mean believing that one is fated to simply repeat traditional ideas without critique or modification a concern frequently raised in response to critiques of Enlightenment epistemology By developing such parallels Gadamer and the Social Turn in Epistemology offers seasoned readers of Gadamer a new context in which to appreciate his discussion of understanding in Truth and Method and readers unfamiliar with Gadamer a productive point of access into his major work **Detaining Time** Eric P. Hernes, Sally Maitlis, 2012-05-31 Process Sensemaking and Organizing is the first in a series of volumes which explore perspectives on process theories an emerging approach to the study of organizations that focuses on understanding activities interactions and change as essential properties of organizations rather than structures and state an approach which prioritizes activity over product change over persistence novelty over continuity and expression over determination Process and sensemaking may be seen as mutually interlocking phenomena and as such are cornerstones in process thinking This volume brings together contributions from an international group of scholars energized by process organization studies The collection offers perspectives from different disciplines insights from diverse theoretical traditions and contexts and parallels made with a range of cultural forms including art poetry and cookery At the same time the chapters exhibit a clear emphasis on a process ontology process theorizing and narrative thinking Across this rich and varied collection recurrent themes emerge that distinguish process theorizing from the more logico scientific variance oriented research that dominates organization studies today This book will appeal to academics researchers and graduate students in management organization studies and sociology who wish to better understand the emergent changing and flow like character of organizational life and expand their understanding of the nature of sensemaking as a basis for organizing
