Preservation Management of Digital Materials Maggie Jones, Neil Beagrie, 2001 *The Preservation Management Handbook* Ross Harvey, Martha R. Mahard, 2014-04-10

Cultural heritage professionals museum curators museum professionals archivists and librarians work with their specialized knowledge to prioritize the needs of their collections Preservation managers draw on experts in climate control fire safety pest management and more in developing the large overview of a collection and its needs And all the special materials within the collections have their experts too Here in one volume is a wide range of topic specific expertise that comprises both an enduring text for preservation students as well as an essential one stop reference for cultural heritage professionals particularly those in small to medium sized organizations where resources are limited and professional help is not always at hand The editors introduce the reader to the essential tools and principles of a preservation management program in the

twenty first century addressing the realities of diverse collections and materials and embracing the challenges of working with both analog and digital collections The sections on planning and managing a preservation program contain the basic starting point for any kind of collection regardless of size and content Written with the small collection in mind the principles are nevertheless scalable and widely applicable Preserving Digital Materials Ross Harvey,2011-11-30 This book provides a single volume introduction to the principles strategies and practices currently applied by librarians and recordkeeping professionals to the critical issue of preservation of digital information It incorporates practice from both the recordkeeping and the library communities taking stock of current knowledge about digital preservation and describing recent and current research to provide a framework for reflecting on the issues that digital preservation raises in professional practice

Preserving Digital Materials Douglas Ross Harvey,2008-12-18 This book provides a single volume introduction to the principles strategies and practices currently applied by librarians and record keepers to the preservation of digital information Also included are case studies of practice from the library record keeping audiovisual archiving data archiving and geospatial communities *Proceedings of the International Symposium, Science & Engineering Libraries for the 21st Century, Leuven, October 2-4, 2002, Arenbergkasteel, Leuven (Heverlee)* Raf Dekeyser,2004 The digital revolution of the last decades of the 20th century had a vast impact on scientific and other libraries worldwide Modern technology has made the access to information so much easier and faster and the Internet sometimes gives its users the false impression that all information can be obtained without any human intervention If this were true libraries would be reduced from intellectual laboratories to museums where visitors only come to look at those strange paper format precursors of the digital information carriers Even if such an extreme futuristic view cannot be completely excluded it is still very far away In the meantime libraries and librarians continue to play an important role especially in the digital environment where the traditional skills of librarians have found a new importance and new applications Their devotion to the preservation of historically significant documents may counterbalance the tendency of the Internet to become a dull collection of knowledge facts and to forget the logical processes through which this knowledge was obtained The long established experience of librarians as organizers of information and as facilitators of the access to this organised knowledge collection has already proven to be of immeasurable value for the use of all kinds of digital information sources *Electronic Records in the Manuscript Repository* Elizabeth H. Dow,2009-04-13 *Electronic Records in the Manuscript Repository* defines the problems related to electronic records and digital documents describes the steps the curator should take to manage those electronic records and digital documents and suggests ways to learn the specific skills and perspectives needed to do the job well It provides an introduction to vocabulary basic concepts and best practices to date by collecting and contextualizing data from several real world projects and it contains almost 30 pages of references to resources that the curator can consult for information on specific topics Dow starts with a review of archival concepts including a look at archival practices and then discusses the problems created by

electronic materials in that context as well as the research in progress to tackle these problems
