Preserving Family Lands: Book II Stephen J. Small, 1997 *Preserving Family Lands* Stephen J. Small, 1998 **A Planner's Guide for Oak Woodlands** Gregory A. Giusti, Douglas D. McCreary, Richard B. Standiford, 2005 Designed for professional planners consultants and landscape architects this new edition provides science based information that can guide decision making As more development occurs in the oak woodlands this guide can provide a framework for preserving this icon of the California landscape **The Tax Code and Land Conservation** United States. Congress. Senate. Committee on Finance, 2005 Searching the Law - The States Francis R Doyle, 2022-11-14 This revised two volume set reproduces the easy to use logically organized format of *Searching the Law* for each of the 50 U S states Arranged by state and by topic within each state it features a complete list of all the legal research materials available for each state jurisdiction thousands of citations to the legal literature of each state materials applicable to more than one topic listed under each topic repeated listings under each state and topic where they apply and author title publisher format and the latest known supplement for each citation *Searching the Law The States* is the companion text to *Searching the Law* Together the sets form one of the most comprehensive logical legal reference sources available Published under the Transnational Publishers imprint The print edition is available as a set of two volumes 9781571052872 **Conservation Trusts** Sally K. Fairfax, Darla Guenzler, 2001 In the wake of the Exxon Valdez oil spill a conservation trust helped stabilize and regenerate the damaged area When bird habitats along the Platte River were threatened by Grayrocks Dam a similar trust came to their rescue And if a family wants to protect its land for future generations establishing a trust may be the best solution For more than a century bequests of land and funds for environmental protection have been common but in recent decades the trusts used to address conservation issues and resolve environmental disputes have diversified and grown significantly This book examines a variety of conservation organizations built on or close to trust principles some government creations some private some combinations of the two to explain how conservation trusts are created and how they work It explores strengths and weaknesses of the trust concept considers the widespread use of land trusts and presents case studies that both illustrate successes and give instructive examples of potential pitfalls Drawing on cases from Maine to Hawaii the authors examine the different kinds and configurations of trusts They consider government trusts that blend federal state and local agencies into a single entity or that derive funding from outside legislative and executive channels trusts established by government and private cooperation to share responsibility for jointly held and managed resources and trusts established by private organizations and families For each type they explain why each is created how it operates and whether it has been proven effective They also address the important issue of accountability and consider when a trust is not the answer to a problem As more Americans reject federal control of land in favor of local determination land trusts have become the most popular tool for the preservation of land habitats and species And as the sharing of authority among public private

and diverse government partners becomes more prevalent sound guidelines for establishing effective trusts are critical This book shows how the trust template provides an invaluable approach for future conservation efforts and is a primer for anyone involved in environmental management
