Preserving The Press How Daily Newspapers Mobilized To Keep Their Readers:

The Vanishing Newspaper [2nd Ed] Philip Meyer, 2009-09 In this edition Meyer's analysis of the correlation between newspaper quality and profitability is updated and applied to recent developments in the newspaper industry Meyer argues that understanding the relationship between quality and profit is central to sustaining journalistic excellence and preserving journalism's unique social functions Provided by the publisher

Preserving the Press Leo Bogart, 1991 The Newspaper Readership Project 1977-1983 was an unprecedented cooperative attempt by the American newspaper industry to halt the downward trend in readership and circulation The Project had an enormous impact on American newspapers it spurred such changes in their content as special sections and new graphics and led to important innovations in distribution and promotion Leo Bogart was a central figure in the conception and execution of the Project so his account is truly an insider's view of the interplay of the Project and the people involved in it *Preserving the Press How Daily Newspapers Mobilized to Keep Their Readers* is an insider account that vividly describes the personalities organizations and policy debates of the American daily newspaper business at a critical moment in its history Exciting and informative it shows how this major American institution confronted the great social and technological changes that threatened its established position Bogart demonstrates the difficulties of translating research findings into actual changes in practice reviews controversies over the Project's promotional efforts and reports on dramatic changes that occurred in newspaper distribution methods

When MBAs Rule the Newsroom Doug Underwood, 1995 Writing with anger but with a deep affection for the trade he examines the growing economic pressures within the industry the roots of the managerial revolution and the impact of marketplace journalism on the operation of the newsroom and employee morale

Estimating Equilibrium Exchange Rates John Williamson, 1994 The problems of exchange rate misalignments and the resulting payments imbalances have plagued the world economy for decades At the Louvre Accord of 1987 the Group of Five industrial countries adopted a system of reference ranges for exchange rate management influenced by proposals of C Fred Bergstan and John Williamson for a target zone system The reference range approach has however been operated only intermittently and half heartedly and questions continue to be raised in policy and scholarly circles about the design and operation of a full fledged target zone regime This volume with chapters by leading international economists explores one crucial issue in the design of a target zone system the problem of calculating Williamson's concept of the fundamental equilibrium exchange rate FEER Williamson contributes an overview of the policy and analytic issues and a second chapter on his own calculations

Soft News Goes to War Matthew A. Baum, 2011-10-16 The American public has consistently declared itself less concerned with foreign affairs in the post Cold War era even after 9/11 than at any time since World War II How can it be then that public attentiveness to U.S. foreign policy crises has increased This book represents the first systematic attempt to explain this apparent paradox Matthew Baum argues that the answer lies in changes to television's presentation of political information In so doing he develops a

compelling byproduct theory of information consumption The information revolution has fundamentally changed the way the mass media especially television covers foreign policy Traditional news has been repackaged into numerous entertainment oriented news programs and talk shows By transforming political issues involving scandal or violence especially attacks against America into entertainment the soft news media have actually captured more viewers who will now follow news about foreign crises due to its entertainment value even if they remain uninterested in foreign policy Baum rigorously tests his theory through content analyses of traditional and soft news media coverage of various post WWII U S foreign crises and statistical analyses of public opinion surveys The results hold key implications for the future of American politics and foreign policy For instance watching soft news reinforces isolationism among many inattentive Americans Scholars political analysts and even politicians have tended to ignore the soft news media and politically disengaged citizens But as this well written book cogently demonstrates soft news viewers represent a largely untapped reservoir of unusually persuadable voters

Media, Profit, and Politics Joe Harper, Thom Yantek, 2003 A compilation of essays and commentary delivered at the second annual Kent State University Symposium on Democracy this work recognizes and considers the differences that arise when the competitive forces of commerce clash with the demand for the open availability of information in a democratic society The conflicting roles of advocate initiator and objective reporter for journalists who cover community politics the role of the news media in forming public attitudes toward things political and their role in affecting voter nonparticipation the role of financial considerations in the news media's attempt to provide citizens with needed news and perspective on political affairs and particularly the role of the conglomeration of ownership of news media organizations are a few of the topics discussed in this volume

Tuned Out David T. Z. Mindich, 2005 Illuminating the decline in informed citizenship *Tuned Out* is an insightful exploration of the generations of Americans who have turned their backs on serious news **Can Journalism Survive?** David M. Ryfe, 2013-08-27 Journalists have failed to respond adequately to the challenge of the Internet with far reaching consequences for the future of journalism and democracy This is the compelling argument set forth in this timely new text drawing on the most extensive ethnographic fieldwork in American newsrooms since the 1970s David Ryfe argues that journalists are unable or unwilling to innovate for a variety of reasons in part because habits are sticky and difficult to dislodge in part because of their strategic calculation that the cost of change far exceeds its benefit and in part because basic definitions of what journalism is and what it is for anchor journalism to tradition even when journalists prefer to change The result is that journalism is unraveling as an integrated social field it may never again be a separate and separable activity from the broader practice of producing news One thing is certain whatever happens next it will have dramatic consequences for the role journalism plays in democratic society and perhaps will transform its basic meaning and purpose **Can Journalism Survive** is essential and provocative reading for all concerned with the future of journalism and society **Participatory Journalism** Jane B. Singer, David Domingo, Ari Heinonen, Alfred Hermida, Steve Paulussen, Thorsten Quandt, Zvi Reich, Marina

Vujnovic,2011-05-06 Who makes the news in a digital age Participatory Journalism offers fascinating insights into how journalists in Western democracies are thinking about and dealing with the inclusion of content produced and published by the public A timely look at digital news the changes it is bringing for journalists and an industry in crisis Original data throughout in the form of in depth interviews with dozens of journalists at leading news organizations in ten Western democracies Provides a unique model of the news making process and its openness to user participation in five stages Gives a first hand look at the workings and challenges of online journalism on a global scale through data that has been seamlessly combined so that each chapter presents the views of journalists in many nations highlighting both similarities and differences both national and individual The Social Embeddedness of Media Use Henk Westerik,2009-05-05 Scholars in the field of communication research have extensively studied television viewing in general and watching television news in particular The book looks at the subject from an integrative theoretical perspective Based on Schutzian sociology and action theoretical approaches to media use the author argues that immediate social influences and other everyday life situations largely determine television use and that the influence of short term situational characteristics are often overlooked in person centered explanatory models In three empirical studies the role of short term situations and the influence of immediate social surroundings is analyzed The use of Discrete Time Event History Analysis is an innovative way to look at household diary data Findings reveal how family members influence each other in many ways Watching television turns out to be an integral part of everyday life in the family but also a force that may reduce family interaction It is shown that television may serve as a surrogate for those family members that are not present and that family members while present at home follow each others example Partners are shown to mimic each other children to mimic their parents and parents follow the example set by their children Television news viewing in contrast to general television viewing is less determined by the immediate influence of others Also the individual motivations for news viewing vary throughout the day First exposure to television news appears to be motivated by other factors than subsequent exposure A need for surveillance dominates first exposure but subsequent exposure appears to be governed by other more ritualistic motivations The book is important to scholars graduate level students and practitioners who are concerned with theoretical and methodological insights in the phenomenon of television viewing in everyday life
