President Eisenhower and Strategy Management Douglas Kinnard,1989-01-01 **Eisenhower and the Management of Prosperity** John W. Sloan,1991 Three years out of eight President Eisenhower achieved a balanced budget

Eisenhower's Pursuit Of Strategy: LTC Geoffrey C. De Tingo,2015-11-06 Eisenhower preferred to build consensus for his military and national strategies by using multiple communication techniques to convey his intent If consensus was not achieved though and his intent was not carried out he would aggressively move to eliminate the source of friction This monograph will analyze four case studies to demonstrate that it is critically important for subordinates and peers to understand the influence of leadership styles on strategic decision makers It will also argue that the consequences for not understanding strategic decision makers can mean the difference between individual organizational or national success or failure The four case studies will highlight the leadership styles that Eisenhower used when he pursued a strategy and how those leadership styles influenced his decision making The first case study is Eisenhower s fight to control Allied strategic bombers to support Operation Overlord in 1944 Second is his fight to develop implement and defend his New Look National Security Strategy in 1953 Third is how Eisenhower defended his administration s Middle East foreign policy and finally his strategy to seek a peaceful solution to the Suez Canal Crisis of 1956

Eisenhower's New-Look National Security Policy, 1953-61 S. Dockrill,1996-05-21 The New Look sought to formulate a more selective and flexible response to Communist challenges The New Look was not simply a bigger bang for a buck nor merely a device for achieving a balanced budget nor did it amount solely to a strategy of massive retaliation as is commonly assumed Dr Dockrill s incisive revisionist analysis of the subject throws new light on US ambitious global strategy during the Eisenhower years

Parameters ,1982 *Eyeing the Red Storm* Robert M. Dienesch,2016-04 In 1954 the U S Air Force launched an ambitious program known as WS 117L to develop

the world's first reconnaissance satellite. The goal was to take photographic images from space and relay them back to Earth via radio. Because of technical issues and bureaucratic resistance, however, WS 117L was seriously behind schedule by the time Sputnik orbited Earth in 1957 and was eventually cancelled. The air force began concentrating instead on new programs that eventually launched the first successful U.S. spy satellites. Eyeing the Red Storm examines the birth of space-based reconnaissance not from the perspective of CORONA, the first photo reconnaissance satellite to fly, but rather from that of the WS 117L. Robert M. Dienesch's revised assessment places WS 117L within the larger context of Dwight D. Eisenhower's presidency, focusing on the dynamic between military and civilian leadership. Dienesch demonstrates how WS 117L promised Eisenhower not merely military intelligence but also the capacity to manage national security against the Soviet threat. As a fiscal conservative, Eisenhower believed a strong economy was the key to surviving the Cold War and saw satellite reconnaissance as a means to understand the Soviet military challenge more clearly and thus keep American defense spending under control. Although WS 117L never flew, it provided the foundation for all subsequent satellites, breaking theoretical barriers and helping to overcome major technical hurdles, which ensured the success of America's first working reconnaissance satellites and their photographic missions during the Cold War.

The evolving role of nation-building in US foreign policy Thomas Seitz, 2017-10-03. How and why did the United States get involved in nation building overseas and how have these policies evolved? How has Washington understood the relationship between development abroad and security at home and how has this translated into policy? What is the relationship between security, order, and development in nation building and stabilisation efforts? This book explores the processes through which nation building approaches originated and developed over the last seven decades, as well as the concepts and motivations that shaped them. Weaving together International Relations theory and a rich history drawing mainly on declassified documents, interviews, and other primary sources, this book contributes to theoretical discussions of nation building while offering a critique of Realist and Critical Security School analyses of US policy in the developing world. Ultimately, the book illuminates lessons relevant to today's nation building, crisis management, stability, good governance, and reconstruction missions.
