

7 brilliant lesson planning tips from teachers.

Add learning intentions

Learning intentions set the scene for students and tell them what to expect for the lesson, and it's crucial to give them real-world context and ensure that the language you use is precise and suitable for their age. You can use acronyms, like **WALT** (we are learning to), **WILF** (what I'm looking for) and **TIB** (this is because) to engage them.

Work in cycles for each lesson

- ✓ **Model:** show the students how to complete an activity before starting, using examples and non-examples.
- ✓ **Practise together:** students work together and with your help to complete the activity.
- ✓ **Practise independently:** once students are comfortable, they can try completing the activity by themselves.

Include checks for understanding (CFU)

These are activities like "whip around" and "response cards" that tell you whether students have learned what was expected. They are a crucial part of every lesson!

Ask three key questions

1. What knowledge, skills and understanding do your students need to learn for this lesson?
2. What would be the best way to teach it?
3. How can I assess the knowledge and skills that were taught?

With these three questions, you can create your broad outline for the lesson and start getting into the details.

Add cumulative reviews

Students constantly move between topics throughout the day, so it's important to jog their memories by briefly discussing what was covered in the prior lesson – you need them to remember the fundamentals before moving forward! Make it fun, quick and sharp – a quiz, writing on a mini-whiteboard, a competition etc.

Add constraints for differentiation

Constraints are like in-built clues that help students complete tasks, such as filling in certain letters when trying to spell a word. You can give them lots of constraints at the start, and fewer and fewer as they practise and work through the activity.

Cater to all learning styles

Ensure that your lessons cater to visual, auditory and kinaesthetic learners. You can refer to the board, have students collect items, act out dramas and more. Kids get bored, so try to spend less time talking and more time engaged in learning!

MENC Handbook of Research on Music Learning: Volume 1: Strategies Richard Colwell, Peter R. Webster, 2011-10-26 The MENC Handbook of Research on Music Learning Volume 1 Strategies brings together the best and most current research on methods for music learning focusing squarely on the professions empirical and conceptual knowledge of how students gain competence in music at various ages and in different contexts The collection of chapters written by the foremost figures active in the field takes a broad theoretical perspective on current critical areas of research including music development music listening and reading motivation and self regulated learning in music music perception and movement The books companion volume Applications builds an extensive and solid position of practice upon the frameworks and research presented here Throughout both volumes in this essential set focus is placed on the musical knowledge and musical skills needed to perform create understand reflect on enjoy value and respond to music A key point of emphasis rests on the relationship between music learning and finding meaning in music and as music technology plays an increasingly important role in learning today chapters move beyond exclusively formal classroom instruction into other forms of systematic learning and informal instruction Either individually or paired with its companion Volume 2 Applications this indispensable overview of this growing area of inquiry will appeal to students and scholars in Music Education as well as front line music educators in the classroom **A Handbook for History Teachers** James A. Duthie, 2012-09-28 History is not a mere chronicle of facts but a dialogue between competing interpretations of the past it should be taught as such Teaching history in this way makes it both intellectually demanding and more interesting while at the same time helps students acquire the knowledge and skills necessary to become functioning citizens in a democracy The opening chapters provide the rationale for the study of history its epistemological basis and the logic of the discipline The bulk of the book deals with practical ways to help students acquire process and apply information In particular it addresses the specific thinking skills required by the discipline with many effective techniques for helping students to master them The implications of this approach for teacher evaluation of student work are also addressed A Teacher's Guide to Preschool Reading Instruction William E. Blanton, 1973 National History Standards Linda Symcox, Arie Wilschut, 2009-04-01 As educators in

the United States and Europe develop national history standards for K 12 students the question of what to do with national history canons is a subject of growing concern Should national canons still be the foundation for the teaching of history Do national canons develop citizenship or should they be modified to accommodate the new realities of globalization Or should they even be discarded outright These questions become blurred by the debates over preserving national heritages by so called history wars or culture wars and by debates over which pedagogical frameworks to use These canon and pedagogical debates often overlap creating even more confusion A misconceived skills vs content debate often results Teaching students to think chronologically and historically is not the same as teaching a national heritage or a cosmopolitan outlook But what exactly is the difference Policy makers and opinion leaders often confuse the pedagogical desirability of using a framework for studying history with their own efforts to reaffirm the centrality of national identity rooted in a vision of their nation s history as a way of inculcating citizenship and patriotism These are the issues discussed in this volume Today s students are citizens of the world and must be taught to think in global supranational terms At the same time the traditionalists have a point when they argue that the ideal of the nation state is the cultural glue that has traditionally held society together and that social cohesion depends on creating and inculcating a common national culture in the schools From an educational perspective the problem is how to teach chronological thinking at all How are we to reconcile the social political and intellectual realities of a globalizing world with the continuing need for individuals to function locally as citizens of a nation state who share a common past a common culture and a common political destiny Is it a duty of history education to create a frame of reference and if so what kind of frame of reference should this be How does frame of reference knowledge relate to canonical knowledge and the body of knowledge of history as a whole

Handbook of Research on Student Engagement

Sandra L. Christenson, Amy L. Reschly, CATHY WYLIE, 2012-02-23 For more than two decades the concept of student engagement has grown from simple attention in class to a construct comprised of cognitive emotional and behavioral components that embody and further develop motivation for learning Similarly the goals of student engagement have evolved from dropout prevention to improved outcomes for lifelong learning This robust expansion has led to numerous lines of research across disciplines and are brought together clearly and comprehensively in the Handbook of Research on Student Engagement The Handbook guides readers through the field s rich history sorts out its component constructs and identifies knowledge gaps to be filled by future research Grounding data in real world learning situations contributors analyze indicators and facilitators of student engagement link engagement to motivation and gauge the impact of family peers and teachers on engagement in elementary and secondary grades Findings on the effectiveness of classroom interventions are discussed in detail And because assessing engagement is still a relatively new endeavor chapters on measurement methods and issues round out this important resource Topical areas addressed in the Handbook include Engagement across developmental stages Self efficacy in the engaged learner Parental and social influences on engagement and achievement
