

Crime Prevention: Why are offenders important?

- Adolescence is the most common age period for law-breaking throughout the life-span. SA has a youthful population (42.3% of the population is under the age of 19)
- The vast majority of child offenders (including sexual offenders) will not grow up to become adult offenders. It is equally important to note the damage that can be done by the criminal justice system in terms of creating or exacerbating the risk factors for offending.
- There is a very strong relationship between child victimisation and child offending. Firstly, children and young people are twice as likely to be victimised as adults. Another trend: victims of violence were significantly more likely than non-victims to become violent offenders. RAPCAN's experience.
