The Regional Economic Impact of Technological Change A. T. Thwaites, Raymond P. Oahey, 1985 Technological change economic implications regional development Innovation location of industry research and development public sector machinery industry information technology Graphs maps references statistical tables **High-Technology Development in Regional Economic Growth** Byung-Rok Choi, 2019-06-04 This title was first published in 2003 Korea has had considerable success in developing its high technology industries and these have become significant employers in this region By analysing the situation in Korea this book explores the effects of dynamic externalities on the growth of regional employment in the high technology industries It puts forward innovative simultaneous equation models to test three sets of hypotheses related to so called Jacobs and MAR effects differentiated by firm size organizational type and product Clear evidence is found for endogenous technological progress marked by positive feedback especially for small firms in diversified high technology enclaves There are technological externalities associated with knowledge spillovers and local employment has indirect effects on employment growth via dynamic externalities The implications for local economic development policy are outlined in a concluding section *The Regional Economics of Technological Transformations* Roberta Capello, Camilla Lenzi, 2021-08-30 The Regional Economics of Technological Transformations provides a comprehensive overview of 4 0 technological transformations in Europe and their socio economic impact with a particular emphasis on the regional dimension of the phenomena The authors employ extensive original data and robust quantitative methods to analyse technological change in all regions of the 27 EU countries plus the UK and shed light on this trend for Europe and beyond Structured in four parts the book first looks at conceptual definitions empirical measurements and expected impacts on both the economic performance GDP and productivity growth and the labour market and then moves on to analyse where 4 0 technological transformation actually takes place in Europe and the reasons for this Next it offers original empirical evidence on the impacts of the different transformations and of their intertwined effects on both the economy and the society Finally the book explores the policy implications of this technological transformation This book will be valuable reading for advanced students researchers and policymakers working across regional economics industrial economics and innovation policy It will be of primary interest to regional scientists interested in the field who may enjoy the conceptual and empirical solutions to the study of a very complex timely and still largely unexplored theme Sociologists engineers and political economists can benefit from the book s analysis noting the urgency of the development of new ethical rules governing the new digital and labour markets Finally the book may appeal to policymakers interested in opportunities to increase regional competitiveness and sustainability goals through the advent of 4 0 technologies **Technology, Innovation, and Regional Economic Development**, 1984 In recent years state and local governments universities and private sector groups have become increasingly active in promoting technological innovation and technology based business development in their local

economies These efforts have resulted in productive new forms of partnership and cooperation at all levels While federal programs have sometimes supported these efforts and while recent changes in federal policy have improved the climate for high technology development initiatives in most cases both the initiative and the ongoing leadership have come from imaginative state and local leaders This five chapter report provides 1 an overview of high technology development HTD 2 a definition and analysis of high technology industries 3 a discussion of entrepreneurship and venture capital in HTD 4 a discussion of state and local government university and private sector initiatives for HTD and 5 an examination of the federal role in regional HTD Three reports are appended they concern 1 the theoretical base for high technology location and regional development 2 a regional assessment of the formation and growth in high technology firms and 3 a preliminary investigation of recent evidence on high technology industries spatial tendencies One factor examined in the latter report is the nature and diversity among high technology industries in both growth performance and locational tendencies JN

Knowledge Flows, Technological Change and Regional Growth in the European Union Małgorzata

Runiewicz-Wardyn, 2013-06-14 The book provides conceptual and empirical insights into the complex relationship between knowledge flows and regional growth in the EU The author critically scrutinizes and enhances the RIS Regional Innovation System approach discussing innovation as a technological institutional and evolutionary process Moreover she advances the ongoing discourse on the role of space and technological proximity in the process of innovation and technological externalities The book closes with an investigation of the role of technological change and knowledge spillovers in the dynamic growth and catching up of EU regions **Routledge Library Editions: Economic Geography**

Various, 2021-06-23 The books in this set originally published between 1968 and 1992 introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy As well as providing a comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies these volumes examine the economic factors that have shaped cities and patterns of urbanization **The Social and Economic Impact of New Technology 1978-84: A Select Bibliography**

Leslie Grayson, 2012-12-06 Silicon chip technology microprocessor technology information technology or quite simply new technology These are some of the names representing the microelectronics revolution depending upon the audience being addressed by speaker or writer No previous new industrial development has caused such widespread publicity and discussion amongst users and researchers as the new technology Concern is being expressed about the effects of new technology on employment job satisfaction social life leisure activities and the economics of commerce and industry The late 70s saw many doom laden predictions of those effects but by 1983 both management and trade unions were taking a more objective view of the social and economic impacts and many correspondents now see the new technology as a means of opening up new industries and overcoming the effects of world recessions The chip has involved the factory floor the office

the supermarket and the home Electronic funds transfer electronic shopping microelectronic domestic appliances word processors and microprocessor controlled machinery mean that the new technology has pervaded all aspects of social and economic life and the developed countries are now coming to accept it as part of society as a whole Inevitably the flood of literature on the social and economic impacts of new technology has been overwhelming Unfortunately the quality of information and arguments propagated at conferences in journal papers and research reports has indicated that there has been little quantifiable evidence available on the effects of these impacts

New Technology and Regional Development Bert Van Der Knapp, Egbert Wever, 2003-08-16 First Published in 2004 Since the second half of the seventies a period of economic recession a growing interest for technological change can be noticed in all old industrial countries The reason for this phenomenon is the conviction that the economic future of these countries will depend to a large degree on their ability to create new products and processes and to make these commercially viable Hence the stimulation and subsidising of all kinds of Research and Development R D activities by the governments of these countries Against this background it was certainly not unexpected that the IGU Commission on Industrial Change presided by Godfrey Linge decided to organise a congress on Technology and Industrial Change This congress was held in August 1985 at Nijmegen in the Netherlands In this book some of the papers presented there are published We are very happy that we were allowed to include the very interesting contributions of the representatives of Philips in Eindhoven and of the European Commission in Brussels

Technology, Regions, and Policy John Rees, 1986 Technology Regions and Policy examines the links between technological change regional development and government policy This timely book provides a synthesis of recent scholarship the results of original research projects carried out by a distinguished group of academics It explores the complex questions of how high technology areas develop the factors influencing the spread of industrial technology and the impact of technological change on labor creation and displacement

Technological Change and Regional Development in Europe Ludwig Schätzl, Javier Revilla Diez, 2012-12-06 This book presents the findings of the extensive research programme funded by the Deutsche Forschungsgemeinschaft German Research Council and entitled Technological Change and Regional Development in Europe The goal of this programme was to carry out research by means of empirical surveys into the relationship between technological change and regional development Over a period of six years a total of 50 research projects have been undertaken in three phases each lasting two years This research programme has succeeded in actively involving leading German regional scientists from many universities as well as non university research institutions In addition numerous research projects were carried out in close co operation with internationally renowned partners We should like to express our gratitude for the support provided by the Deutsche Forschungsgemeinschaft Without their financial backing of the research programme it would not have been possible to undertake such an ambitious project Thanks also go to the contributors of this volume for their willingness to participate in our joint project We wish in addition to acknowledge the

contribution of Prof Dr Philip Cooke whose refereeing of the chapters has enhanced the quality of the work presented here Finally our thanks go to Angela Spence for her expert editorial assistance linguistic editing and the preparation of the Index and also Franco Vaio for taking care of the technical aspects and production of the final copy Their combined efforts have been crucial for successfully bringing together contributions from so many different authors in a single volume
