Regional Politics And World Order:

The Constitutional Foundations of World Peace Richard A. Falk, Robert C. Johansen, Samuel S. Kim, 1993-07-01 This book shows how significant a worldwide constitutional framework can be both analytically and politically in efforts to achieve a just and lasting peace The authors are careful to avoid the pitfalls of legalism and moralism that have often afflicted discussion of world governance in the past and their analyses are rooted directly within contemporary human struggles for peace justice prosperity and environmentally sustainable societies The authors demonstrate that when these struggles are examined in light of the planet's changing constitutional framework their origins and future trajectories are more fathomable intellectually By examining alternative images of world order these authors uncover an abundance of practical yet bold policy recommendations for addressing and solving global problems They also demonstrate that implementing desirable policies can indeed become politically feasible This book is a compendium of new ideas for managing threats to peace enhancing U N peacekeeping establishing an effective global environmental authority aiding the faltering global economy nurturing the growth of democracy both locally and globally protecting human rights and ethnic diversity holding governments and intergovernmental organizations accountable to those they govern and nurturing humanitarian values among all people

Turmoil and Order in Regional International Politics William R. Thompson, Thomas J. Volgy, 2023-04-10 This edited book complements and follows up on the book Thompson and Volgy et al Regions Power and Conflict Constrained Capabilities Hierarchy and Rivalry It is predicated in part on the paucity of published material available on comparing regional international politics Monadic dyadic and systemic approaches all have their uses and have been exploited extensively The same cannot be said about comparative regional analysis The premise is that a great deal of international politics takes place within regional parameters Most states simply lack the capability or interest in devoting many resources to extra regional affairs Yet each region is distinctive In some military coups remain common while they have died out as a form of political practice in others A few have been highly conflictual and then become more pacific while others persist in their conflict intensity Some have powerful neighbors with intervention tendencies while others are surrounded by relatively weak states Some are rich others are poor The point is that regions all with proper names have attributes that can be harnessed through comparison to explain why regional behavior differs greatly across the planet The aim is to replace the proper names with the leading variables that appear to drive behavior For instance to shrug and say that's the Middle East for you does not take us very far Replacing the Middle East label with conceptualization about how a set of small weak autocratic states behave subject to high penetration by major powers might take us farther than shrugging off regional identity We have good reasons to think that comparative regional analysis can deliver an explanatory value added product just as much as alternative levels of analysis can Ultimately we might desire to integrate separate levels of analysis rather than segregating them But in the short term we need to encourage comparative regional analysis because it is the least developed perspective Why that might

be the case can be debated but it stems in part from our disciplinary tendencies for some analysts to specialize in regional behavior largely in a descriptive vein while others prefer to focus on explaining universal behavior Comparative regional behavior tends to be squeezed out by regional scholars who suspect generalization about behavior and universal scholars who suspect particular contexts such as regions Comparative regional analysis requires analysts who are willing to explore generalization but acknowledge regional contexts more explicitly than is customary At the same time more general substitutes for those regional labels must be introduced if explanatory headway is to be achieved
