Regions State And Identity In Central And Eastern Europe:

Region, State and Identity in Central and Eastern Europe Judy Batt, Kataryna Wolczuk, 2013-01-11 The papers that comprise this collection examine the role of competing European national ethnic and regional identities over the introduction of new regional levels of government in the former Soviet and now Central and Eastern European states *Region, State, and Identity in Central and Eastern Europe* Judy Batt, Kataryna Wolczuk, 2002 Post communist state transformations in Central and Eastern Europe have been accompanied by an upsurge of identity politics as newly independent peoples sought to redefine themselves and their place in Europe National unity has proved elusive in practice as new democracies have debated constitutional and territorial administrative changes to prepare for the challenges of returning to Europe while at the same time integrating diverse historical regions and ethnic minorities The case of regional reform and resurgent regional politics presented in this volume highlight the divergent concepts of statehood which have emerged as Central and East Europeans struggle to come to terms with the meaning of their statehood today Competing models have been advocated in terms of their perceived conformity with national or local traditions and wider trends in modern European governance but local interests and identities have challenged this emphasis on the imperatives of sovereignty territorial unity and administrative efficiency The contributors investigate these pressing issues as new and tougher controls are enforced at the EU's emerging external borders posing fresh challenges to national regional and minority identities *Law, Culture and Identity in Central and Eastern Europe* Cosmin Cercel, Alexandra Mercescu, Mirosław Michał Sadowski, 2023-12-01 Combining insights from comparative legal theory jurisprudence and legal history this collection examines the legal and constitutional identity of Central and Eastern Europe Although the various countries of Central and Eastern Europe have often compared themselves to the West the failure of these countries to engage with one another has resulted in a whole spectrum of legal identities remaining hidden This book takes up a comparison of such identities within the region of Central and Eastern Europe and following from the prima facie similarity between the region's countries given the experience of communism and legal transfers The book thereby illuminates through comparisons the distinct legal identities of the 16 Central and Eastern European states whilst at the same time arguing for a shared Central and Eastern European legal identity This book will appeal to scholars and students in the area of comparative law as well as lawyers political scientists sociologists and historians with particular interests in Central and Eastern Europe **The New World Architecture** Jose Magone, 2017-07-28 The collapse of the bipolar world sustained by the United States and the former Soviet Union led to a power vacuum in the 1990s that the European Union has only reluctantly begun to fill It is under pressure to take over important international tasks and roles in order to develop a new equilibrium in the system of international relations After 2000 reforms were undertaken so that the European Union could deal more efficiently with the tasks the new political system had acquired since the early 1990s With respect to its international role reorganization of the EU's external relations

department was high on the list The New World Architecture explores the contribution that the European Union is making to the emerging global governance system It discusses the theoretical and historical aspects of European integration within the framework of the emerging regional EU and global governance systems It explores three regimes of governance that are contributing to holding together the new emerging EU multilevel governance system None of these is complete all are partial They include the political regime of governance the socioeconomic regime of governance and the territorial regime of governance The author assesses the impact of the European Union on global politics The Mediterranean and Latin America represent regions in which the European Union is investing considerable effort in order to create new forms of cooperation Magone argues that within the next twenty five years global governance may and should emerge as the new and reconfigured stable system of international relations In this system the European Union is and will remain the most advanced regional system This volume will be of interest to specialists scholars and students of European Politics and the European Union

Social and Economic Development in Central and Eastern Europe Grzegorz Gorzelak, 2019-08-13
The integration of post socialist Central and Eastern Europe into the EU is one of the success stories of European development The region has seen significant economic convergence dramatic changes in socio economic indicators and improvements in the natural environment However some challenges remain such as political divergence public governance issues and population demographics This book identifies and analyses the key post 1990 developments across the New Member States at the sub national and national levels with frequent country level and regional comparisons Careful attention is paid to drawing out commonalities in development trajectories while appreciating each country s unique context Drawing on the academic literature and illuminating empirical material the broad range of topics discussed in the book paints a detailed picture of both change and stability in Central and Eastern Europe It will be valuable reading for advanced students researchers and policymakers in regional studies European studies human geography political economy and transition economics

Central and Eastern European Economies Marcus Goncalves, Erika Cornelius Smith, 2016-07-25
Nearly seven decades ago six countries in Western Europe Belgium France West Germany Italy Luxembourg and the Netherlands decided to take economic cooperation to the next level The vision of the EU founding states epitomized by the Schuman Declaration in 1950 was to tie their economies so closely together that war would become impossible Robert Schuman author of the plan believed Europe could not be made all at once or according to a single plan It would have to be built through

concrete achievements which first create a de facto solidarity The countries within the European Community benefited enormously from free trade and common economic policies in particular structural funds designed to foster convergence by funding infrastructure and investments in poorer regions This book examines how similar transitions and integration into the European Union are experienced in individual central and eastern European states through the use of country scans in the regional blocks of CEE SEE and CIS

Borders in Post-Socialist Europe Tassilo Herrschel, 2016-04-08 Borders have attracted considerable attention in public and academic debates in light of the impact of globalisation and in Europe the end of the divisions of the Cold War era Instead being inside or outside of the EU has become a major paradigmatic divide between claimed spheres of influence by Brussels and Moscow respectively In the aftermath of the end of communism established certainties no longer seemed to apply And this included many of the borders within the former eastern Bloc with some losing their relevance while others re assert themselves As its particular contribution this book adopts a symbiotic approach to the analysis of borders drawing on a political economy perspective while also recognising the importance of the socio cultural dimension as found in border studies This seeks to do greater justice to the complex composite nature of borders as geo political state legal and cultural historic constructs in both theory and practice In addition the book s approach stretches across spatial scales to capture the multi level nature of borders The first part of the book presents the conceptual framework as it sets out to embrace this multi faceted multi layered nature of borders In the second part case studies from north central Europe including the Baltic Sea Region exemplify the complexity of borders in the context of post socialist transformation and continuing EU isation

Resilient States From A Comparative Regional Perspective: Central And Eastern Europe And Southeast Asia Francois Bafoil, 2013-01-28 Organizations such as ASEAN and EU were formed to promote economic growth social progress and cultural development among their members This book provides a comprehensive overview of the transformation which the newest members of ASEAN Cambodia Laos Myanmar and Laos and the newest members of EU ten new Members from Baltic Central and Eastern Balkan regions have experienced during the last two decades 1990 2010 It throws light on the different social economic and political causes which support these historical changes Emerging markets such as the Mekong region and Central Europe where new forms of capitalism are flourishing have been captured in this book Their policies in privatization regionalization industrial growth that support a new and deregulated form of capitalism have been mentioned in detail The author stresses upon the capacity and strengths of these two hitherto weak states to face worldwide and regional challenges

Identities, Nations and Politics after Communism Roger E. Kanet, 2013-10-18 This book focuses on questions of identity that have confronted the countries of Central and Eastern Europe after the collapse of the communist system that had previously provided them with an identity This development both facilitated and necessitated a reassessment of the now independent nations history orientation symbols and identity In some cases new states were created without a clear national identity while in others the nation was

regaining statehood but not always within borders that had an historical association with the nation concerned The multiethnic character of the space of the former Soviet Union and its erstwhile satellites and the long historical legacy of complex relations boundary changes population migration and economic and social changes presented different challenges to the various nations and states concerned The essays in this volume attempt to elucidate and understand the issues of ethnic and national identity and their relationship to the emerging statehood in various regions of the post communist world This study makes clear that some nation states were far better prepared to handle these issues than others and that the longer term impact of the communist experience has varied This book was previously published as a special issue of Nationalities Papers
