Text/Events in Early Modern England Sandra Logan,2018-01-18 Engaging with a range of events historical moments

theatrical performances public presentations and courtly intrigues and the texts that record them this book explores representational practice as a component of Elizabethan political culture Considering the inscriptive production of mediated indirect experience as an authorial challenge to the value of the immediate direct experience of events and conversely recognizing the multi valent impact of theatrical performance and performativity as a reinvigoration of the immediate this study traces the emergence of realness as a textual effect and a mode of political intervention This interactive refractive nexus of experience and inscription comprises what Sandra Logan calls the text event The four primary foci of this investigation the 1558 coronation entry the 1575 entertainments at Kenilworth the 1590s dramatizations of the reign of Richard II and the Essex trial of 1601 serve as exempla of four moments in the reign of Elizabeth I which suggest an increasingly complex interaction between events and texts developing in the last half of the sixteenth century Logan argues that in representing England s recent and distant past a wide range of social subjects engaged in a struggle for intellectual credibility and social viability and in the process generated a contingent public sphere within which history framed as a coherent narrative shaped by causal relationships was brought to bear on the concerns of the Elizabethan present and future Assessing how these chronicles short prose histories and historical dramas each made use of the materials and techniques of the others blurring the distinctions between historiography and poetry as well as between past and present Logan considers the conjunctions between the development of new genres and perceptions about inscription and experience and changing socioeconomic institutions and practices

Church Papists Alexandra Walsham, 1999 A study of clerical reaction to the sizeable number of Catholics who outwardly conformed to Protestantism in late 16c England An important and satisfying monograph Many insights emerge from this rich and original study which whets the appetite for more

ENGLISH HISTORICAL REVIEW Diarmaid MacCulloch Church Papist was a nickname a term of abuse for those English Catholics who outwardly conformed to the established Protestant Church and yet inwardly remained Roman Catholics The more dramatic stance of recusancy has drawn historians attention away from this sizeable if statistically indefinable proportion of Church of England congregations but its existence and significance is here clearly revealed through contemporary records challenging the sectarian model of post Reformation Catholicism perpetuated by previous historians Alexandra Walsham explores the aggressive reaction of counter Reformation clergy to the compromising conduct of church papists and the threat they posed to Catholicism s separatist image alongside this she explains why parish priests simultaneously condoned qualified conformity This scholarly and original study thus draws into focus contemporary clerical apprehensions and anxieties as well as the tensions caused by the shifting theological temper of the late Elizabethan and early Stuart church
