Five Lectures on Reincarnation Swami Abhedananda, 2019-11-25 In *Five Lectures on Reincarnation*, Swami Abhedananda offers a profound exploration of the concept of reincarnation, weaving together elements of Vedantic philosophy and modern spiritual thought. The book is structured as a series of lectures, each delving into different aspects of the soul's journey through multiple lifetimes, thus drawing on both ancient Hindu texts and contemporary metaphysical discussions. Abhedananda employs a clear, accessible literary style that balances philosophical rigor with an engaging narrative, encouraging readers to contemplate the implications of karma and the continuity of the soul across various incarnations. Swami Abhedananda, a disciple of the renowned Swami Vivekananda, was a pivotal figure in introducing Eastern philosophical concepts to Western audiences during the late 19th and early 20th centuries. His extensive travels and lectures throughout the United States and Europe helped shape the discourse on spirituality, making abstract principles of reincarnation relatable and applicable to modern seekers. Drawn from his deep understanding of Vedanta, his writings reflect a synthesis of Eastern wisdom and universal truths. This book is highly recommended for anyone seeking a deeper understanding of reincarnation and its relevance to personal growth and spiritual awakening. Abhedananda's insights challenge conventional views, offering transformative perspectives that resonate with both seasoned practitioners and newcomers to spiritual exploration. **Vedanta**

Philosophy Swami Abhedananda, 2004-10 The visible phenomena of the universe are bound by the universal law of cause and effect. The effect is visible or perceptible, while the cause is invisible or imperceptible. The falling of an apple from a tree is the effect of a certain invisible force called gravitation. Although the force cannot be perceived by the senses, its expression is visible. All perceptible phenomena are but the various expressions of different forces which act as invisible agents upon the subtle and imperceptible forms of matter. These invisible agents or forces, together with the imperceptible particles of matter, make up the subtle states of the phenomenal universe. When a subtle force becomes objectified, it appears as a gross object. Therefore, we can say that every gross form is an expression of some subtle force acting upon the subtle particles of matter. The minute particles of hydrogen and oxygen, when combined by chemical force, appear in the gross form of water. Water can never be separated from hydrogen and oxygen, which are its subtle component parts. Its existence depends upon that of its component parts, or in other words, upon its subtle form. If the subtle state changes, the gross manifestation will also change. The peculiarity in the gross form of a plant depends upon the peculiar nature of its subtle form, the seed. *Vedānta*
