Reinventing Eden The Fate Of Nature In Western Culture:

Reinventing Eden Carolyn Merchant, 2013 Visionary quests to return to the Garden of Eden have shaped Western culture from Columbus voyages to today's tropical island retreats Few narratives are so powerful and as Carolyn Merchant shows so misguided and destructive as the dream of recapturing a lost paradise A sweeping account of these quixotic endeavors by one of America's leading environmentalists Reinventing Eden traces the idea of rebuilding the primeval garden from its origins to its latest incarnations in shopping malls theme parks and gated communities With eloquence and insight Merchant shows how the drive to conquer nature and to explore and settle the globe springs from this utopian pastoral impulse throughout Western history Time and again human manipulation of the environment is our downfall Eden is achieved by fencing off pristine beauty in national parks and wildlife preserves while leaving the majority of the earth in ruins Challenging both narratives Merchant argues that the green veneer of city park conservation has become a cover for the corruption of the earth and the neglect of its environment Reinventing Eden is a bold new way to think about the earth that includes green political parties sustainable development and a partnership between humans and earth that is nothing short of an ecological revolution

Book Review:

Reinventing Eden: the Fate of Nature in Western Culture. By Carolyn Merchant. New York: Routledge 2003. ISBN 0-41593-164-9 Ronald A. Davidson, 2005 **The Forest and the EcoGothic** Elizabeth Parker, 2020-02-13 This book offers

the first full length study on the pervasive archetype of The Gothic Forest in Western culture The idea of the forest as deep dark and dangerous has an extensive history and continues to resonate throughout contemporary popular culture The Forest and the EcoGothic examines both why we fear the forest and how exactly these fears manifest in our stories It draws on and furthers the nascent field of the ecoGothic which seeks to explore the intersections between ecocriticism and Gothic studies

In the age of the Anthropocene this work importantly interrogates our relationship to and understandings of the more than human world This work introduces the trope of the Gothic forest as well as important critical contexts for its discussion and examines the three main ways in which this trope manifests as a living animated threat as a traditional habitat for monsters and as a dangerous site for human settlement This book will appeal to students and scholars with interests in horror and the Gothic ecohorror and the ecoGothic environmentalism ecocriticism and popular culture more broadly The accessibility of the subject of *The Deep Dark Woods* coupled with increasingly mainstream interests in interactions between humanity and nature means this work will also be of keen interest to the general public After the Death of Nature Kenneth

Worthy, Elizabeth Allison, Whitney Bauman, 2018-11-09 Carolyn Merchant's foundational 1980 book *The Death of Nature: Women, Ecology, and the Scientific Revolution* established her as a pioneering researcher of human-nature relations Her subsequent groundbreaking writing in a dozen books and over one hundred peer-reviewed articles have only fortified her position as one of the most influential scholars of the environment This book examines and builds upon her decades-long legacy of innovative environmental thought and her critical responses to modern mechanistic and patriarchal conceptions of nature and women as well as her systematic taxonomies of environmental thought and action Seventeen scholars and activists assess, praise, criticize, and extend Merchant's work to arrive at a better and more complete understanding of the human place in nature today and the potential for healthier and more just relations with nature and among people in the future Their contributions offer personal observations of Merchant's influence on the teaching, research, and careers of other environmentalists **Monstrous Nature** Robin L. Murray, Joseph K. Heumann, 2016-10-01 5 *Zombie Evolution: A New World with or without Humans* 6 *Laughter and the Eco-horror Film: The Troma Solution* 7 *Parasite Evolution in the Eco-horror Film: When the Host Becomes the Monster* PART 4 *Gendered Landscapes and Monstrous Bodies* 8 *Gendering the Cannibal Bodies and Landscapes in Feminist Cannibal Movies* 9 *American Mary and Body Modification: Nature and the Art of Change* Conclusion *Monstrous Nature and the New Cli-Fi Cinema* Filmography Notes Works Cited Index **The Nature Essay**

Simone Schröder, 2019-01-04 *The Nature Essay: Ecocritical Explorations* is the first extended study of a powerful literary form born out of the traditions of Enlightenment and Romanticism It traces the varied stylistic paradigms of the nature essay down to the present day Reading essays as platforms for ecological discourse the book analyses canonical and marginalised texts mainly from German, English, and American literature Simone Schröder argues that the essay's environmental impact is rooted in its negotiation of scientific, poetic, spiritual, and ethical modes of perceiving nature Together the chapters on these four aspects form a historical panorama of the nature essay as a genre that continues to flourish in our time of ecological crisis Authors discussed include Alexander von Humboldt, Henry David Thoreau, Virginia Woolf, Robert Musil, Ernst Jünger, W. G. Sebald, Kathleen Jamie, and David Foster Wallace Rethinking Wilderness Mark Woods, 2017-07-30 The concept and values of wilderness along with the practice of wilderness preservation have been under attack for the past several decades In

Rethinking Wilderness Mark Woods responds to seven prominent anti wilderness arguments Woods offers a rethinking of the received concept of wilderness developing a positive account of wilderness as a significant location for the other than human value adding properties of naturalness wildness and freedom Interdisciplinary in approach the book combines environmental philosophy environmental history environmental social sciences the science of ecology and the science of conservation biology

Writing in Dust Jenny Kerber, 2011-03-17 Writing in Dust is the first sustained study of prairie Canadian literature from an ecocritical perspective Drawing on recent scholarship in environmental theory and criticism Jenny Kerber considers the ways in which prairie writers have negotiated processes of ecological and cultural change in the region from the early twentieth century to the present The book begins by proposing that current environmental problems in the prairie region can be understood by examining the longstanding tendency to describe its diverse terrain in dualistic terms either as an idyllic natural space or as an irredeemable wasteland It inquires into the sources of stories that naturalize ecological prosperity and hardship and investigates how such narratives have been deployed from the period of colonial settlement to the present It then considers the ways in which works by both canonical and more recent writers ranging from Robert Stead W O Mitchell and Margaret Laurence to Tim Lilburn Louise Halfe and Thomas King consistently challenge these dualistic landscape myths proposing alternatives for the development of more ecologically just and sustainable relationships among people and between humans and their physical environments Writing in Dust asserts that reading environmentally can help us to better understand a host of issues facing prairie inhabitants today including the environmental impacts of industrial agriculture resource extraction climate change shifting urban rural demographics the significance of Indigenous understandings of human nature relationships and the complex often contradictory meanings of eco cultural metaphors of alien invasiveness hybridity and wildness

Music, Nature and Divine Knowledge in England, 1650-1750 Tom Dixon, 2023 During a period of tumultuous change in English political religious and cultural life music signified the unspeakable presence of the divine in the world for many What was the role of music in the early modern subject's sensory experience of divinity While the English intellectuals Peter Sterry 1613-72 Richard Roach 1662-1730 William Stukeley 1687-1765 and David Hartley 1705-57 have not been remembered for their musicking this book explores how the musical reflections of these individuals expressed alternative and often uncustomary conceptions of God the world and the human psyche Music is always potentially present in their discourse emerging as a crucial form of mediation between states exoteric and esoteric material and spiritual outer and inner public and private rational and mystical Dixon shows how Sterry Roach Stukeley and Hartley's shared belief in truly universal salvation was articulated through a language of music implying a feminising influence that set these male individuals apart from contemporaries who often strictly emphasised the rational i.e. the supposedly masculine aspects of religion Musical discourse instead provided a link to a spiritual plane that brought these intellectuals closer to ultimate reality Theirs was a discourse firmly rooted in the real existence of contemporary musical practices both in terms of the

forms and styles implied in the writings under discussion and the physical circumstances in which these musical genres were created and performed Through exploring ways in which the idea of music was employed in written transmission of elite ideas this book challenges conventional classifications of a seventeenth century Scientific Revolution and an eighteenth century Enlightenment defending an alternative narrative of continuity and change across a number of scholarly disciplines from seventeenth century English intellectual history and theology to musicology and the social history of music
