Interpersonal Relations Prof. Dr. Bilal Semih Bozdemir, To understand the influence of industrialization on interpersonal relations it is crucial to analyze the structural shifts that characterized this period The rise of factories and mass production methods meant that large numbers of workers were concentrated in urban centers leading to the emergence of a new social order The factory system created environments where individuals from diverse backgrounds interacted on a daily basis fostering new forms of social relationships and networks However this proximity did not necessarily translate into solidarity or community Indeed the rapid urbanization often bred isolation and alienation as individuals were uprooted from their traditional communities and support systems leading to feelings of disconnection in the
