They aim to provide a quick and informative guide to selecting the most appropriate relaxation technique for each client. Payne's handbook of Relaxation Techniques has, with the past 3 editions, established itself as a unique source book for all those health professionals involved in teaching relaxation. Focuses on the practical aspects of relaxation techniques in relation to patient care. Includes cognitive approaches e.g. self awareness, imagery, autogenics, meditation, and positive self talk. Also includes somatic approaches e.g. progressive relaxation, stretching, and the Mitchell method. Provides ready to use schedules and scripts for working with clients. Discusses the pitfalls as well as the benefits of each method. Fully illustrated with both line drawings and photographs. Evidence based text is supported by up to date references.
