Exploring Japanese University English Teachers' Professional Identity Diane Hawley Nagatomo, 2012-01-30

This book contributes to the growing field of EFL teacher identity which is now recognized to influence numerous aspects of classroom teaching and of student learning It focuses on an under researched and yet highly influential group of teachers that shape English language education in Japan Japanese university English teachers In three interrelated narrative studies it

examines how four relatively new teachers develop professional identity as they become members of the community of practice of university English teachers how gender impacts the professional identity of seven female professors ranging in age from their early 30s to their 60s and how one teacher's teaching practices and beliefs reflect her personal and professional identity Attitudes to English Study among Japanese, Chinese and Korean Women Yoko Kobayashi, 2020-11-05 This edited book comprises chapters integrated around a central theme on college educated Japanese Korean and Chinese women's orientation to English study The collection is composed of two parts 1 East Asian women's motivation to study in the West and 2 East Asian women's dream to use English as a career The first part discusses their international migration as facilitated by factors characteristic of East Asian nations e.g. middle class women's access to advanced education and yet unequal access to professional career and other factors inherent in each nation e.g. different social evaluations of women equipped with competitive overseas degrees and English proficiency The second part sheds light on the dreams and realities of East Asian female adults who having been avid English learners aim for dream jobs e.g. interpreters or have few other career choices but to be re-trained as English specialists or even as Japanese language teachers working abroad This collection is suitable for any scholar interested in the lives and voices of young educated women who strive to empower themselves with language skills in the seemingly promising neoliberal world that is however riddled with ideological contradictions

Equity in Excellence Siao See Teng, Maria Manzon, Kenneth K. Poon, 2018-12-20 This book offers a comprehensive picture of high performing East Asian education systems beyond their outstanding achievements in international assessments such as PISA and TIMSS Situating excellence within discussions of equity it contextualises the conceptions and pursuits of equity amid the development of education systems policy and curricula in selected East Asian societies While parallels could be observed across the systems including high stakes assessment culture increasing credentialism and high investment of family educational resources there are also divergences in approaches and outcomes relating to equity policies and practices In light of the challenges presented by low fertility rates ageing populations migration and the economic demands of the 21st century the book addresses these systems attempts to cater to further diversified student populations and maintain equity in excellence As the international community relentlessly seeks to enhance equity in education there is much these East Asian education systems can share This book has appeal internationally to researchers policymakers educators and anyone interested in East Asian education and equity
