Reliability ,1984 Reliability Management and Engineering Harish Garg,Mangey Ram,2020-06-15 Reliability technology plays an important role in the present era of industrial growth optimal efficiency and reducing hazards This book provides insights into current advances and developments in reliability engineering and the research presented is spread across all branches It discusses interdisciplinary solutions to complex problems using different approaches to save money time and manpower It presents methodologies of coping with uncertainty in reliability optimization through the usage of various techniques such as soft computing fuzzy optimization uncertainty and maintenance scheduling Case studies and real world examples are presented along with applications that can be used in practice This book will be useful to researchers academicians and practitioners working in the area of reliability and systems assurance engineering Provides current advances and developments across different branches of engineering Reviews and analyses case studies and real world examples Presents applications to be used in practice Includes numerous examples to illustrate theoretical results

Reliability of Instrumentation Systems for Safeguarding & Control L. Boullart,J.P. Jansen,2014-05-23 Presents and discusses the various reliability aspects of modern instrumentation systems for industrial processes with special emphasis given to the influence of human behaviour on systems reliability Subject areas covered include the mathematical tools available to assess the reliability of instrumentation systems their applications and limitations the way in which theory is put into practice during the design of equipment the quality control aspects of both hardware and software and the availability of integrated systems in the field as compared with the design criteria Actual data test criteria and maintenance strategies are also included *Mathematical and Statistical Methods in Food Science and Technology* Daniel Granato,Gastón

Ares,2014-03-03 Mathematical and Statistical Approaches in Food Science and Technology offers an accessible guide to applying statistical and mathematical technologies in the food science field whilst also addressing the theoretical foundations Using clear examples and case studies by way of practical illustration the book is more than just a theoretical guide for non statisticians and may therefore be used by scientists students and food industry professionals at different levels and with varying degrees of statistical skill Management and Office Information Systems Shi-Kuo Chang,2012-12-06 Decision making is a very complex phenomenon Modern decision makers must deal with very complex problems which are constantly changing and often ill structured making modeling and analysis difficult In order to provide support for the decision makers computer based information systems are designed to collect store process and transport information Recent advances in computer technology data communications database systems office automation and knowledge engineering have made possible the design of very sophisticated information systems However rapid technological advances also create many problems not the least of which is the lack of integration among the various disciplines in information system design Without such integration a costly computer based information system is at best partially useful and at worst totally useless The aim

of this book therefore is to examine the various issues involved in designing management information systems decision support systems and office information systems for increasing productivity and providing decision support This book is the outcome of the Workshop on Management and Office Information Systems which was organized by the Knowledge Systems Institute and held at Chicago Illinois from June 28 to 30 1982 Twenty seven papers from the working papers presented at that workshop were selected for inclusion in the present volume which is organized into five parts I organization structures and management II decision support systems III database systems IV office information systems and V systems and applications
