Religion And Power In Morocco:

Religion and Power in Morocco Henry Munson, 1993-01-01 In this book a well known anthropologist traces the evolution of the political role of Islam in Morocco from the seventeenth century to present times Integrating history and anthropology in a way very different from Clifford Geertz's famous study of 1968 Henry Munson organizes his book around a series of conflicts that have exemplified the myth of the righteous man of God who dares to defy an unjust sultan Grounding his book in the relevant indigenous texts and on two years of ethnographic fieldwork Munson suggests a more solidly substantiated alternative to the social history of the imagination advocated by Geertz and he illustrates the consequences of neglecting the historical and symbolic contexts of events by examining Geertz's interpretation of the conflict between the seventeenth century scholar cum saint al Yusi and the sultan Mulay Ismail Munson argues that the religious facets of power cannot be understood without reference to factors like force and fear and he suggests that anthropological analyses of sacred kingship in Morocco have often been distorted by their neglect of such matters and by their failure to distinguish between the religious rhetoric of rulers and the religious beliefs of those they rule Munson examines the social historical roots of the fundamentalist opposition to the regime of King Hassan II who has reigned since 1961 and the reasons for its relative weakness when compared with its counterparts in Iran and Algeria He shows to what extent Moroccan fundamentalism is rooted in classical Islamic notions of just rule and to what extent it represents an invented tradition similar to recent forms of politicized revivalism in other religions

Sufism in Morocco's Religious Politics John C. Thibdeau, 2023-07-25 This book outlines the role of Sufism in Moroccan politics in the twenty first century through a comparative study of contemporary Sufi organizations The author begins his analysis by highlighting the strategies employed by the Moroccan state over the past twenty years aimed at regulating and producing an authorized Moroccan Islam in the kingdom Despite these policies of spiritual security and spiritual diplomacy including the state sponsorship of Sufi organizations the author argues that this has not decreased diversity nor produced a banal interpretation of Islam but rather given rise to diverse articulations and performances of this religiosity Through a comparative analysis of three Sufi organizations based on eighteen months of fieldwork two of which have never before been studied the author brings into relief the spaces of creative enactment of Sufism as an ethical tradition Ultimately it is argued that each Sufi organization reflects a different refraction of Islam a concept emphasising the cultivation of public piety which underpins the Moroccan state's formulation of Islam Focused on both theoretical contributions to Islamic studies and topical treatments of geopolitical issues like spiritual diplomacy the Western Sahara and Morocco Algeria the book spans multiple disciplines including anthropology religious studies sociology and political science

The Government and Politics of the Middle East and North Africa Mark

Gasiorowski, 2016-08-02 A comprehensive country by country examination of the history domestic politics and foreign policies of the Middle East and North Africa

Government and Politics of the Middle East and North Africa Sean Yom, 2019-10-30

The latest edition of this renowned textbook explores the states and regimes of the Middle East and North Africa. Presenting heavily revised fully updated chapters contributed by the world's leading experts, it analyzes the historical trajectory, political institutions, economic development, and foreign policies of the region's nearly two dozen countries. The volume can be used in conjunction with its sister volume, *The Societies of the Middle East and North Africa*, for a comprehensive overview of the region. Chapters are organized and structured identically, giving insightful windows into the nuances of each country's domestic politics and foreign relations. Data tables and extensive annotated bibliographies orient readers towards further research. Whether used in conjunction with its sister volume or on its own, this book provides the most comprehensive and detailed overview of the region's varied politics. Five new experts cover the critical country cases of Turkey, Lebanon, Jordan, Saudi Arabia, and Iran. All chapters cover the latest events, including trends that have remarkably changed in just a few years, like the gradual end of the Syrian civil war. As such, this textbook is invaluable to students of Middle Eastern politics. The ninth edition brings substantial changes. All chapters also have a uniform streamlined structure that explores the historical context, social and economic environment, political institutions, regime dynamics, and foreign policy of each country. Fact boxes and political maps are now far more extensive, and photographs and images also help illustrate key points. Annotated bibliographies are vastly expanded, providing nothing short of the best list of research references for each country.

Islamist Radicalisation in North Africa George Joffe, 2012-06-12 In the current climate of political extremism and violence, much attention has been directed towards radicalisation as the reasons behind such courses of action, along with a conviction that those who are radicalised represent an irrational deviation from the conventionally accepted norms of social and political behaviour. This book focuses on the current issues and analytical approaches to the phenomenon of radicalisation in North Africa. Taking a comprehensive approach to the subject, it looks at the processes that lead to radicalisation rather than the often violent outcomes. At the same time, chapters expand the discussion historically and conceptually beyond the preoccupations of recent years in order to develop a more holistic understanding of a complex individual and collective process that has represented a permanent challenge to dominant political, social, and on occasion economic norms. With contributions from academics and policy makers within and outside the region, the book is a comprehensive investigation of Islamist Radicalisation. As such, it will be of great interest to academics and students investigating North Africa and terrorism, as well as specialists in radicalism and extremism.

Structuring Conflict in the Arab World Ellen Lust-Okar, 2005-01-10 This book examines how ruling elites manage and manipulate their political opposition in the Middle East. In contrast to discussions of government opposition relations that focus on how rulers either punish or co-opt opponents, this book focuses on the effect of institutional rules governing the opposition. It argues that rules determining who is and is not allowed to participate in the formal political arena affect not only the relationships between opponents and the state but also between various opposition groups. This affects the dynamics of opposition during prolonged

economic crises It also shapes the informal strategies that ruling elites use toward opponents The argument is presented using a formal model of government opposition relations It is demonstrated in the cases of Egypt under Presidents Nasir Sadat and Mubarek Jordan under King Husayn and Morocco under King Hasan II *Guardians of Faith in Modern Times: 'Ulama' in the Middle East* Meir Hatina, 2008-11-30 This collective volume provides an integrative historical and contemporary discussion of Sunni ulama in the Middle East in both an urban and a semi tribal context The various chapters reinforce a renewed interest in the position of the ulama in modern times and offer new insights as to their ideological vitality and contribution to the public discourse on moral and sociopolitical issues

Understanding Women's Career Experiences in Moroccan Businesses Mouna Izelmaden, 2024-06-27 Existing literature on women career development focuses on western industrialized countries and gives little attention to regions where patriarchy is prevailing like in North African countries The limited available research in the region takes a business oriented perspective to investigate the topic and focuses on business process optimization for an increased profitability In an attempt to close this gap the present book takes a sociological lens to investigate meanings and interpretations that skilled women in Moroccan organizations give to their experiences This project sought to understand how Moroccan professional women take decisions about their career path while taking a multi level approach to examine contextual factors In this book Bourdieu's theory of practice was used as a theoretical framework to examine the interplay of the different factors impacting the development of women career paths Using a qualitative research approach under the interpretivist paradigm and drawing on in depth interviews with 10 participants this research investigated female and male conceptualization of career and work objectives

The Princeton Encyclopedia of Islamic Political Thought Gerhard Bowering, Patricia Crone, Mahan Mirza, 2013 In 2012 the year 1433 of the Muslim calendar the Islamic population throughout the world was estimated at approximately a billion and a half representing about one fifth of humanity In geographical terms Islam occupies the center of the world stretching like a big belt across the globe from east to west P vii

Revolutionaries and Reformers Barry Rubin, 2012-02-01 Islamist movements seeking power today are faced with difficult choices regarding strategy ranging from armed struggle to electoral efforts An emerging alternative consists of a rethinking of Islamist politics where the goal of a totally Islamic polity would be abandoned in favor of some form of Islamic oriented society In this reformulation Islamist politics would function as a pressure group to make society more Islamic reinforcing the walls of semi separate internal communities and reinterpreting Islam in more liberal ways The September 11 2001 terror attack on the United States however demonstrates that the radical approach remains attractive to many Islamists Addressing these issues the contributors look at the countries where Islamist movements have been most important Case studies of revolutionary and reformist groups are followed by chapters discussing future alternatives for Islamist politics presenting arguments both advocating and critical of a potential liberal reformist interest group Islamism
