Introduction to Political Theory John Hoffman, Paul Graham, 2015-02-20 Introduction to Political Theory is a text for the 21st century. It shows students why an understanding of theory is crucial to an understanding of issues and events in a rapidly shifting global political landscape. Bringing together classic and contemporary political concepts and ideologies into one book, this new text introduces the major approaches to political issues that have shaped the modern world and the ideas that form the currency of political debate. Introduction to Political Theory relates political ideas to political realities through effective use of examples and case studies, making theory lively, contentious, and relevant. This updated third edition comes with significant revisions which reflect the latest questions facing political theory, such as the French burqa controversy, ethnic nationalism, and the value of research from sociobiology. Accompanying these debates is a wealth of new and thought-provoking case studies for discussion, including consensual sadomasochism, affirmative action, and same-sex marriage. A new chapter on difference has also been added to complement those on feminism and multiculturalism. The revised glossary, revamped website for further reading, and new streamlined layout make Introduction to Political Theory third edition the perfect accompaniment to undergraduate study.

Philosophy of Probability J.P. Dubucs, 2013-04-17 Philosophy of Probability provides a comprehensive introduction to theoretical issues that occupy a central position in disciplines ranging from philosophy of mind and epistemology to cognitive science, decision theory, and artificial intelligence. Some contributions shed new light on the standard conceptions of probability, Bayesianism, logical and computational theories; others offer detailed analyses of two important topics in the field of cognitive science: the meaning and the representation of partial belief and the management of uncertainty. The authors of this well-balanced account are philosophers as well as computer scientists; among them L.J. Cohen, D. Miller, P.G. Ridenfors, J. Vickers, D. Dubois, and H. Prade. This multidisciplinary approach to probability is designed to illuminate the intricacies of the problems in the domain of cognitive inquiry. No one interested in epistemology or artificial intelligence will want to miss it.

The Metaphysics of Memory Sven Bernecker, 2008-05-08 This book investigates central issues in the philosophy of memory and is the first book on the metaphysics of memory in four decades. It defends a version of the causal theory of memory and argues for direct realism about memory.

Knowledge and Reality Thomas M. Crisp, Matthew Davidson, David Vander Laan, 2006-07-19 This volume was conceived as a Festschrift to surprise Alvin Plantinga on his 70th birthday. That original plan was not entirely successful. For one thing, the day came and went well before the work was complete. For another, the project wasn't quite a surprise. Plantinga caught wind of it, though not of its details, before the unveiling. The occasion was marked, however, by a presentation of a projected table of contents and an early draft of the cover painting by Keith Lehrer. Plantinga then saw the details and was quite taken aback that the editors and a few contributors had come to South Bend from as far as Virginia, Florida, and California to celebrate. Now we are pleased to offer the essays themselves. The collection ranges widely over

metaphysics and epistemology Its wingspan testifies to the breadth both of Plantinga s own work and of the audience that has valued it Some of the essays deal with ontology examining actualism presentism antirealism properties and artifacts Several essays in epistemology raise skeptical questions work through the implications of naturalism or internalism and engage Plantinga s own Reidian account of warrant Other contributions consider the bearing of philosophical ideas on the Christian faith of split brain cases on the doctrine of the Trinity for example and of materialism on the afterlife The contributors are friends colleagues and former students of Plantinga The editors thank all of them for their eager participation in this project

Moral Psychology Today David K. Chan, 2008-02-03 Moral Psychology Today David K Chan Philosophers working in the field of moral psychology concern themselves with issues and questions that straddle across more than one sub discipline in philosophy The answers that they propose and the theories that they propound have implications for moral philosophy the philosophy of mind epistemology and metaphysics Philosophers with an interest in the will or the motivational psychology of human action divide between those investigating psychological and behavioral concepts for their own sake and those working on action theory for the sake of answering larger questions especially ethical ones The essays in this volume all of which were presented at a conference on Values Rational Choice and the Will belong largely in the latter category of research The essays here contribute to debates and discussions on a wide range of topics that are of current interest in moral psychology These essays demonstrate both the breadth of the field of moral psychology and the importance of the questions investigated Artificial boundaries between sub disciplines of philosophy are crossed in putting these essays together in the same anthology There are essays here in meta

ethics and in normative ethics There are essays in ethical theory and in applied ethics There are essays that draw on discoveries in empirical psychology Shame Punishment Thom Brooks, 2019-10-28 Shame punishment has existed for perhaps as long as people have been punished and the issue has been revisited in recent years to help improve crime reduction efforts In this collection shame punishment is examined from various critical perspectives including its relation with expressivism the diversity of shame punishment used today the link between shame punishment and restorative justice the relationship between dignity and shame punishment shame punishment and its use for sex offenders and critics of shame punishment in its different incarnations The selected essays are from leading experts and represent the most important contributions to scholarly research in the field Truth, Rationality, Cognition, and Music K. Korta, Jesús M. Larrazabal, 2013-03-14 A speech for the defence in a Paris murder trial a road safety slogan Hobbes political theory each appeals to reason of a kind but it remains an oblique and rhetorical one Each relies on comparisons rather than on direct statements and none can override or supersede the conclusions of ethical reasoning proper Nevertheless just as slogans may do more for road safety than the mere recital of accident statistics or of the evidence given at coroners inquests so the arguments of a Hobbes or a Bentham may be of greater practical effect than the assertion of genuinely ethical or political statements however true and relevant these may be Stephen Toulmin Reason in Ethics 1950 The International Colloquium on Cognitive Science ICCS held in Donostia San Sebastian every two years since 1989 has become one of the most important plazas for cognitive scientists in Europe to present the results of their research and to exchange ideas The seventh edition co organized as usual by the Institute for Logic Cognition Language and Information ILCLI and the Department of Logic and Philosophy of Science both from the University of the Basque Country took place from May 9 to 12 2001 addressing the following main topics 1 Truth Epistemology and Logic 2 Rationality in a Social Setting 3 Music Language and Cognition VIII TRUTH RATIONALITY COGNITION AND MUSIC 4 The Order of Discourse Logic Pragmatics and Rhetoric

Thought-Contents Steven E. Boër, 2006-11-23 According to our commonsense view of the matter beliefs desires intentions and the like are special kinds of internal states the possession of which by a given creature potentially explains its behavior and otherwise renders the creature intelligible to us So called folk psychology provides us with a rough and ready network of counterfactuals delimiting the role supposedly played by these internal states vis perceptual input inference and behavioral output in a normal member of our species The exact empirical details of this network do not matter here for we are not undertaking further refinement or systematization of the relevant counterfactuals Instead our topic is the ontological analysis of the internal states that occupy the nodes of this complex network and the bearing of that analysis on the truth conditions of the sentences we use to ascribe beliefs and related states The relevant counterfactuals canonically describe particular belief desire and intention states as states of believing desiring and intending that such a such The use of infinitival clauses to describe desires and intentions is not really an exception for desiring or intending to do A or to be F is just having a self

regarding desire or intention that oneself does A or that oneself is F By the lights of our commonsense psychology then to be in a particular belief desire or intention state is to bear the corresponding attitudinal relation believing desiring or intending to a certain content Language, Knowledge, and Representation Jesus M. Larrazabal, Luis A. Pérez Miranda, 2013-11-09

Meirav, 2013-03-14 According to Ariel Meirav the root of some of our most noteworthy difficulties in the metaphysics of concrete entities has been the traditional tendency to focus on the horizontal dimension of wholes i e relations between the parts of a whole and to neglect the vertical dimension i e relations between the whole itself and its parts In Wholes Sums and Unities Meirav formulates a critique of widely accepted mereological assumptions presents a new conception of wholes as Unities and demonstrates the advantages of this new conception in treating a variety of metaphysical puzzles such as that of Tibbles the cat More generally he suggests that conceiving wholes as Unities offers us a new way of understanding the world in non reductive terms
