

REFUSAL OF THE RETURN

- Having found enlightenment, the hero may not want to return to the ordinary world to share his wisdom
- “the boon may redound to the community, the nation...Even Gautama Buddha, after his triumph, doubted whether the message of realization could be communicated”(Campbell 156).

Love's Return Gail M. Boldt, Paula M. Salvio, 2012-11-12 The idea that teachers love children is often taken for granted in education Rarely is the idea of love itself examined Bringing together the work of educators curriculum theorists and clinical psychoanalysts and drawing upon autobiographical and narrative case studies this groundbreaking collection examines the collision of love and learning including the ways in which such intersections are provoked repressed and denied Contributors turn to psychoanalysis to explore questions of love in all of its varying permutations ambivalence sexuality hatred desire projection and loss in order to demonstrate how the social ramifications of such work is critical to the ways teachers are currently being prepared for life in the classroom

The Affect Lab Grant Bollmer, 2023-09-29 Examines how our understanding of emotion is shaped by the devices we use to measure it Since the late nineteenth century psychologists have used technological forms of media to measure and analyze emotion In *The Affect Lab* Grant Bollmer examines the use of measurement tools such as electrical shocks photography video and the electroencephalograph to argue that research on emotions has confused the physiology of emotion with the tools that define its inscription Bollmer shows that the

psychological definitions of emotion have long been directly shaped by the physical qualities of the devices used in laboratory research To investigate these devices The Affect Lab examines four technologies related to the history of psychology in North America spiritualist toys at Harvard University serial photography in early American psychological laboratories experiments on psychopaths performed with an instrument called an Offner Dynograph and the development of the electropsychometer or E Meter by Volney Mathison and L Ron Hubbard Challenging the large body of humanities research surrounding affect theory The Affect Lab identifies an understudied problem in formulations of affect how affect is a construction inseparable from the techniques and devices used to identify and measure it Ultimately Bollmer offers a new critique of affect and affect theory demonstrating how deferrals to psychology and neuroscience in contemporary theory and philosophy neglect the material of experimental scientific research Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions
